FedCenter

Assisting Federal Agencies with their Environmental Compliance Needs

Federal agencies, as Center partners, will determine and often be a part of services and activities for *FedCenter*. Potential features may include:

- **Compliance assistance and P2 hotlines, guidance and other tools**
- **Environmental Management System (EMS) guidance and training**
- **Regulatory proposals and updates**
- **Executive order guidance**
- **Green purchasing resources and tools**
- **Listserves and other interactive member services and forums**

FedCenter

Meeting the Environmental Stewardship & Compliance Assistance Needs of Federal Agencies.

FedCenter

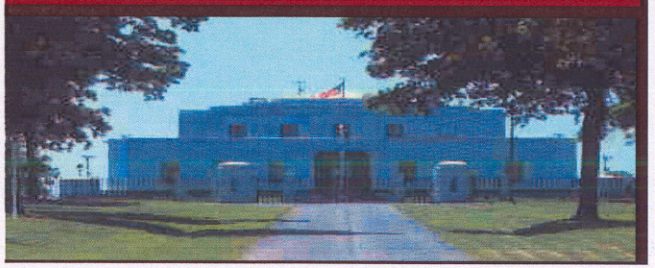
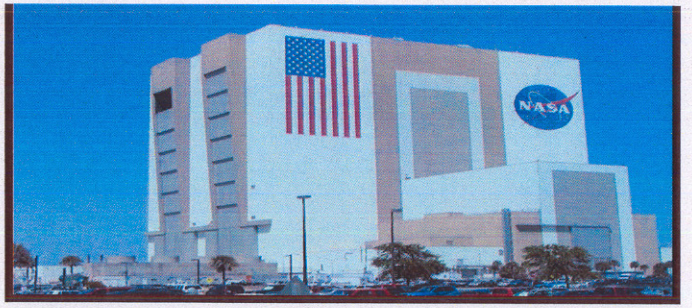
What is it ?

fedcenter.gov **replaces *FedSite* the EPA's former online environmental resource for Federal facilities.**

The new web-based Center provides comprehensive environmental stewardship and compliance assistance information focused solely on the needs of federal government facilities.

fedcenter.gov **is managed by the U.S. Army Corps of Engineers Construction Engineering Laboratory (CERL). CERL has extensive experience operating similar web-based military centers, and long history of helping federal agencies with environmental stewardship and compliance assistance matters.**





Through FedCenter, U.S. government agencies pool environmental resources and expertise to address their growing environmental compliance challenges and stewardship performance goals.

A wealth of web-based compliance assistance, regulatory, vendor and green product information already exists. Fedcenter is designed to serve as a venue for broader distribution of existing information within and among agencies.

FedCenter integrates and makes more accessible Federal Facilities compliance assistance information in one place. In the future, FedCenter will also develop and provide new information as well as improved compliance assistance tools.

FedCenter

Why should Federal agency officials be interested?

FedCenter will eventually facilitate training and self-certification, and assist agencies in meeting the requirements of various Executive Orders.

***FedCenter* will be governed and directed by the federal agencies which use it. This new federal partnership will promote more efficient use of new and existing compliance assistance resources.**
