**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

All compounds are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Toxicity PEC) - MacDonald PEC or other SQV SLV.

SLV (Toxicity TEC) - TEC SLV.

SLV (Eco DEQ 2001) - DEQ 2001 Bioaccumulative Sediment SLV and DEQ (2006) Ecological Bioaccumulative Sediment SLVs for DDx.

SLV (HH EPA Reg 9 Ind c) - EPA Region 9 Industrial PRGs

SLV (HH EPA Reg 9 Ind HQ 0.1), HH Reg 9 Ind nc - EPA Region 9 Industrial PRGs HQ 0.1 SLV.

SLV (HH DEQ 2006) - DEQ (2006) Human Health Bioaccumulative Sediment SLV for DDx.

Table C-1. Sediment Samples Summary.

| Analyte | CAS # | Units | Min Result | Min Detected Result | Max Result | Sample IDs showing Max Result | Max Detected Result | Max Non-detected Result | Mean (non-detected results included at full DL) | Median (non-detected results included at full DL) | # Samples | # Detected Results | % of Non-detected Results | SLVs exceeded to define chemical as COI | Tier Trigger for defining chemical as a COI | # Non-detected Results Exceeding SLV (Toxicity TEC) | % DL > SLV (Toxicity TEC) | SLV (Toxicity TEC) | # Detected Results Exceeding SLV (Eco DEQ 2001) | Frequency of Detected Exceedances (Eco DEQ 2001) | # Non-detected Results Exceeding SLV (Eco DEQ 2001) | % DL > SLV (Eco DEQ 2001) |

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

All compounds are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Toxicity PEC) - MacDonald PEC or other SQV SLV.

SLV (Toxicity TEC) - TEC SLV.

SLV (Eco DEQ 2001) - DEQ 2001 Bioaccumulative Sediment SLV and DEQ (2006) Ecological Bioaccumulative Sediment SLVs for DDx.

SLV (HH EPA Reg 9 Ind c) - EPA Region 9 Industrial PRGs

SLV (HH EPA Reg 9 Ind HQ 0.1), HH Reg 9 Ind nc - EPA Region 9 Industrial PRGs HQ 0.1 SLV.

SLV (HH DEQ 2006) - DEQ (2006) Human Health Bioaccumulative Sediment SLV for DDx.

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

All compounds are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Toxicity PEC) - MacDonald PEC or other SQV SLV.

SLV (Toxicity TEC) - TEC SLV.

SLV (Eco DEQ 2001) - DEQ 2001 Bioaccumulative Sediment SLV and DEQ (2006) Ecological Bioaccumulative Sediment SLVs for DDx.

SLV (HH EPA Reg 9 Ind c) - EPA Region 9 Industrial PRGs

SLV (HH EPA Reg 9 Ind HQ 0.1), HH Reg 9 Ind nc - EPA Region 9 Industrial PRGs HQ 0.1 SLV.

SLV (HH DEQ 2006) - DEQ (2006) Human Health Bioaccumulative Sediment SLV for DDx.

Table C-1. Sediment Samples Summary.

| Analyte | CAS # | Units | Min Result | Min Detected Result | Max Result | Sample IDs showing Max Result | Max Detected Result | Max Non-detected Result | Mean (non-detected results included at full DL) | Median (non-detected results included at full DL) | # Samples | # Detected Results | % of Non-detected Results | SLVs exceeded to define chemical as COI | Tier Trigger for defining chemical as a COI | Frequency of Detected Exceedances (HH EPA Reg 9 Ind HQ 0.1) | # Non-detected Results Exceeding SLV (HH EPA Reg 9 Ind HQ 0.1) | % DL > SLV (HH EPA Reg 9 Ind HQ 0.1) | SLV (HH EPA Reg 9 Ind HQ 0.1) | # Detected Results Exceeding SLV (HH DEQ 2006) | Frequency of Detected Exceedances (HH DEQ 2006) | # Non-detected Results Exceeding SLV (HH DEQ 2006) |

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

All compounds are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Toxicity PEC) - MacDonald PEC or other SQV SLV.

SLV (Toxicity TEC) - TEC SLV.

SLV (Eco DEQ 2001) - DEQ 2001 Bioaccumulative Sediment SLV and DEQ (2006) Ecological Bioaccumulative Sediment SLVs for DDx.

SLV (HH EPA Reg 9 Ind c) - EPA Region 9 Industrial PRGs

SLV (HH EPA Reg 9 Ind HQ 0.1), HH Reg 9 Ind nc - EPA Region 9 Industrial PRGs HQ 0.1 SLV.

SLV (HH DEQ 2006) - DEQ (2006) Human Health Bioaccumulative Sediment SLV for DDx.

Table C-1. Sediment Samples Summary.

| Analyte | CAS # | Units | Min Result | Min Detected Result | Max Result | Sample IDs showing Max Result | Max Detected Result | Max Non-detected Result | Mean (non-detected results included at full DL) | Median (non-detected results included at full DL) | # Samples | # Detected Results | % of Non-detected Results | SLVs exceeded to define chemical as COI | Tier Trigger for defining chemical as a COI | % DL > SLV (HH DEQ 2006) | SLV (HH DEQ 2006) |

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

All compounds are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Toxicity PEC) - MacDonald PEC or other SQV SLV.

SLV (Toxicity TEC) - TEC SLV.

SLV (Eco DEQ 2001) - DEQ 2001 Bioaccumulative Sediment SLV and DEQ (2006) Ecological Bioaccumulative Sediment SLVs for DDx.

SLV (HH EPA Reg 9 Ind c) - EPA Region 9 Industrial PRGs

SLV (HH EPA Reg 9 Ind HQ 0.1), HH Reg 9 Ind nc - EPA Region 9 Industrial PRGs HQ 0.1 SLV.

SLV (HH DEQ 2006) - DEQ (2006) Human Health Bioaccumulative Sediment SLV for DDx.

Table C-2a. Sediment Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Sediments: DEQ 2001 Bioaccumulative Sediment SLVs | EPA Region 9 Industrial PRGs | EPA Region 9 Industrial PRGs HQ 0.1 | MacDonald PEC or other SQV | TEC | DEQ (2006) |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

Table C-2a. Sediment Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Sediments: DEQ 2001 Bioaccumulative Sediment SLVs | EPA Region 9 Industrial PRGs | EPA Region 9 Industrial PRGs HQ 0.1 | MacDonald PEC or other SQV | TEC | DEQ (2006) |
|---|---|---|---|---|---|---|---|---|
| **Aroclors, ug/kg** | | | | | | | | |
| Aroclor 1016 | 12674-11-2 | ug/kg | 420 | 21000 | -- | 530 | -- | -- |
| Aroclor 1221 | 11104-28-2 | ug/kg | -- | -- | -- | -- | -- | -- |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

Table C-2a. Sediment Detail.

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

Table C-2b. Sediment Detail.

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
R - Rejected sample
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
All compounds are "total".
Data have been screened against all SLV sets separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
DEQ (2001, 2006) Ecological Bioaccumulative Sediment criterion is exceeded.
EPA Region 9 Industrial PRGs criterion is exceeded.
EPA Region 9 Industrial PRGs HQ 0.1 criterion is exceeded.
MacDonald PEC or other SQVcriterion is exceeded.
TEC criterion is exceeded.
DEQ (2006) Human Health Bioaccumulative Sediment criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at concentration shown
N - Natural sample
FR - Field Replicate
