**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

Compounds that are not labeled as "dissolved" are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all Drinking Water criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Fish) - EPA's 2004 NRWQC (organism only; fish consumption @ 17.5 g/day) SLV, or DEQ's 2004 AWQC (organism only; fish consumption @ 17.5 g/day) SLV if the first is not available.

SLV (DW MCL) - Drinking Water MCL SLV.

SLV (DW PRG) - Tapwater Region 9 PRG (HQ 1) SLV.

SLV (DW PRG HQ 0.1), PRG nc - Tapwater Region 9 PRG (HQ 0.1) SLV.

SLV (DW SCAT) - Drinking Water SCAT SLV.

SLV (Eco) - obtained applying hierarchically the following SLV sources in the following order: EPA's 2004 NRWQC (chronic), DEQ's 2004 AWQC (chronic), Oak Ridge National Laboratory's Tier II SCV and DEQ's AWQC (acute) criteria (whichever is lower), ORNL Tier II SAV (acute for monchlorobenzene only).

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

Compounds that are not labeled as "dissolved" are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all Drinking Water criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Fish) - EPA's 2004 NRWQC (organism only; fish consumption @ 17.5 g/day) SLV, or DEQ's 2004 AWQC (organism only; fish consumption @ 17.5 g/day) SLV if the first is not available.

SLV (DW MCL) - Drinking Water MCL SLV.

SLV (DW PRG) - Tapwater Region 9 PRG (HQ 1) SLV.

SLV (DW PRG HQ 0.1), PRG nc - Tapwater Region 9 PRG (HQ 0.1) SLV.

SLV (DW SCAT) - Drinking Water SCAT SLV.

SLV (Eco) - obtained applying hierarchically the following SLV sources in the following order: EPA's 2004 NRWQC (chronic), DEQ's 2004 AWQC (chronic), Oak Ridge National Laboratory's Tier II SCV and DEQ's AWQC (acute) criteria (whichever is lower), ORNL Tier II SAV (acute for monchlorobenzene only).

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
TZW - Transition Zone Water
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

Table C-8. TZW Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for TZW: Human Health: Fish Consumption: EPA's 2004 NRWQC (organism only) 17.5 g/day | EPA's 2004 NRWQC (organism only) 175 g/day | DEQ's 2004 AWQC (organism only) 17.5 g/day | DEQ's 2004 AWQC (organism only) 175 g/day | Drinking Water: MCL | Tap Water PRGs | Region 9 PRGs HQ 0.1 | SCAT | Ecological Receptors: EPA's 2004 NRWQC (chronic) | DEQ's 2004 AWQC (chronic) | Oak Ridge National Laboratory's Tier II SCV | DEQ's AWQC (acute) criteria | ORNL Tier II SAV (acute) |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
TZW - Transition Zone Water
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

Table C-8. TZW Detail.

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
TZW - Transition Zone Water
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

Table C-8. TZW Detail.

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
TZW - Transition Zone Water
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGS HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
TZW - Transition Zone Water
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGS HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
N - Compound quantified using presumptive evidence
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

Table C-9. Groundwater Samples Summary.

| Analyte | CAS # | Units | Min Result | Min Detected Result | Max Result | Sample IDs showing Max Result | Max Detected Result | Max Non-detected Result | Mean (non-detected results included at full DL) | Median (non-detected results included at full DL) | # Samples | # Detected Results | % of Non-detected Results | SLVs exceeded to define chemical as COI | Tier Trigger for defining chemical as a COI | # Detected Results Exceeding SLV (Fish) | Frequency of Detected Exceedances (Fish) | # Non-detected Results Exceeding SLV (Fish) | % DL > SLV (Fish) | SLV (Fish) | # Detected Results Exceeding SLV (DW MCL) |

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

Compounds that are not labeled as "dissolved" are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all Drinking Water criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Fish) - EPA's 2004 NRWQC (organism only; fish consumption @ 17.5 g/day) SLV, or DEQ's 2004 AWQC (organism only; fish consumption @ 17.5 g/day) SLV if the first is not available.

SLV (DW MCL) - Drinking Water MCL SLV.

SLV (DW PRG) - Tapwater Region 9 PRG (HQ 1) SLV.

SLV (DW PRG HQ 0.1), PRG nc - Tapwater Region 9 PRG (HQ 0.1) SLV.

SLV (DW SCAT) - Drinking Water SCAT SLV.

SLV (Eco) - obtained applying hierarchically the following SLV sources in the following order: EPA's 2004 NRWQC (chronic), DEQ's 2004 AWQC (chronic), Oak Ridge National Laboratory's Tier II SCV and DEQ's AWQC (acute) criteria (whichever is lower), ORNL Tier II SAV (acute for monchlorobenzene only).

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

Compounds that are not labeled as "dissolved" are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all Drinking Water criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Fish) - EPA's 2004 NRWQC (organism only; fish consumption @ 17.5 g/day) SLV, or DEQ's 2004 AWQC (organism only; fish consumption @ 17.5 g/day) SLV if the first is not available.

SLV (DW MCL) - Drinking Water MCL SLV.

SLV (DW PRG) - Tapwater Region 9 PRG (HQ 1) SLV.

SLV (DW PRG HQ 0.1), PRG nc - Tapwater Region 9 PRG (HQ 0.1) SLV.

SLV (DW SCAT) - Drinking Water SCAT SLV.

SLV (Eco) - obtained applying hierarchically the following SLV sources in the following order: EPA's 2004 NRWQC (chronic), DEQ's 2004 AWQC (chronic), Oak Ridge National Laboratory's Tier II SCV and DEQ's AWQC (acute) criteria (whichever is lower), ORNL Tier II SAV (acute for monchlorobenzene only).

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

Compounds that are not labeled as "dissolved" are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all Drinking Water criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Fish) - EPA's 2004 NRWQC (organism only; fish consumption @ 17.5 g/day) SLV, or DEQ's 2004 AWQC (organism only; fish consumption @ 17.5 g/day) SLV if the first is not available.

SLV (DW MCL) - Drinking Water MCL SLV.

SLV (DW PRG) - Tapwater Region 9 PRG (HQ 1) SLV.

SLV (DW PRG HQ 0.1), PRG nc - Tapwater Region 9 PRG (HQ 0.1) SLV.

SLV (DW SCAT) - Drinking Water SCAT SLV.

SLV (Eco) - obtained applying hierarchically the following SLV sources in the following order: EPA's 2004 NRWQC (chronic), DEQ's 2004 AWQC (chronic), Oak Ridge National Laboratory's Tier II SCV and DEQ's AWQC (acute) criteria (whichever is lower), ORNL Tier II SAV (acute for monchlorobenzene only).

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

Compounds that are not labeled as "dissolved" are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all Drinking Water criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Fish) - EPA's 2004 NRWQC (organism only; fish consumption @ 17.5 g/day) SLV, or DEQ's 2004 AWQC (organism only; fish consumption @ 17.5 g/day) SLV if the first is not available.

SLV (DW MCL) - Drinking Water MCL SLV.

SLV (DW PRG) - Tapwater Region 9 PRG (HQ 1) SLV.

SLV (DW PRG HQ 0.1), PRG nc - Tapwater Region 9 PRG (HQ 0.1) SLV.

SLV (DW SCAT) - Drinking Water SCAT SLV.

SLV (Eco) - obtained applying hierarchically the following SLV sources in the following order: EPA's 2004 NRWQC (chronic), DEQ's 2004 AWQC (chronic), Oak Ridge National Laboratory's Tier II SCV and DEQ's AWQC (acute) criteria (whichever is lower), ORNL Tier II SAV (acute for monchlorobenzene only).

**Notes:**

-- Stands for either nonexistent SLV value, or for any statistical value which is not available because of a nonexistent SLV value, or for any other value which is not available (e.g. "--" would appear in column 'Maximum Detected Value' or '# Detected Results Exceeding SLV' if there are no detected values throughout the whole dataset).

Compounds that are not labeled as "dissolved" are "total".

DL = Detection Limit

SLV = Screening Level Value

COI - Chemical of Interest

Only result values > SLV have been screened out.

All SLV units are the same as chemical units given in column C.

Column 'SLVs exceeded to define chemical as COI' lists those SLV sets which were exceeded by **a detected result**, or by a non-detected result provided **non-detected results** in ≥ 10 % of all samples are above an SLV.

Data have been screened against all Drinking Water criteria separately without applying any hierarchy.

No averaging of samples has been performed. Each sample and each replicate sample were screened individually.

Tier Trigger I: at least one detected value exceeds one or more SLVs.

Tier Trigger II: only non-detected results in ≥ 10% of the samples exceed one or more SLVs.

Column 'Sample IDs showing Max Result' can display up to 255 characters. If Sample ID's list forms a longer string, it is truncated to 255 characters.

SLV (Fish) - EPA's 2004 NRWQC (organism only; fish consumption @ 17.5 g/day) SLV, or DEQ's 2004 AWQC (organism only; fish consumption @ 17.5 g/day) SLV if the first is not available.

SLV (DW MCL) - Drinking Water MCL SLV.

SLV (DW PRG) - Tapwater Region 9 PRG (HQ 1) SLV.

SLV (DW PRG HQ 0.1), PRG nc - Tapwater Region 9 PRG (HQ 0.1) SLV.

SLV (DW SCAT) - Drinking Water SCAT SLV.

SLV (Eco) - obtained applying hierarchically the following SLV sources in the following order: EPA's 2004 NRWQC (chronic), DEQ's 2004 AWQC (chronic), Oak Ridge National Laboratory's Tier II SCV and DEQ's AWQC (acute) criteria (whichever is lower), ORNL Tier II SAV (acute for monchlorobenzene only).

Table C-10a. Groundwater Detail.

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

Table C-10a. Groundwater Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Groundwater: Human Health: Fish Consumption: EPA's 2004 NRWQC (organism only) 17.5 g/day | EPA's 2004 NRWQC (organism only) 175 g/day | DEQ's 2004 AWQC (organism only) 17.5 g/day | DEQ's 2004 AWQC (organism only) 175 g/day | Drinking Water: MCL | Tap Water PRGs | Region 9 PRGs HQ 0.1 | SCAT | Ecological Receptors: EPA's 2004 NRWQC (chronic) | DEQ's 2004 AWQC (chronic) | Oak Ridge National Laboratory 's Tier II SCV | DEQ's AWQC (acute) criteria | ORNL Tier II SAV (acute) |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

Table C-10b. Groundwater Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Groundwater | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | | | Human Health | | | | | | | | Ecological Receptors | | | | |
| | | | Fish Consumption | | | | Drinking Water | | | | | | | | |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

Table C-10b. Groundwater Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Groundwater | | | | | | | | | | | | |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.

Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.

J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

Table C-10b. Groundwater Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Groundwater | | | | | | | | | | | | |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

Table C-10c. Groundwater Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Groundwater: Human Health: Fish Consumption: EPA's 2004 NRWQC (organism only) 17.5 g/day | EPA's 2004 NRWQC (organism only) 175 g/day | DEQ's 2004 AWQC (organism only) 17.5 g/day | DEQ's 2004 AWQC (organism only) 175 g/day | Drinking Water: MCL | Tap Water PRGs | Region 9 PRGs HQ 0.1 | SCAT | Ecological Receptors: EPA's 2004 NRWQC (chronic) | DEQ's 2004 AWQC (chronic) | Oak Ridge National Laboratory's Tier II SCV | DEQ's AWQC (acute) criteria | ORNL Tier II SAV (acute) |

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FR - Field Replicate
N - Natural sample

**Notes**

Both detected and non-detected results have been screened.
Missing or zero depths from electronic source data - sample depths not available.
Only result values > SLV have been screened out.
-- = Data not availbale.
No averaging of samples has been performed. Each sample and each replicate sample were screened individually.
Compounds that are not labeled as "dissolved" are "total".
Data have been screened against all Drinking Water criteria separately without applying any hierarchy.
All SLV units are the same as chemical units given in column C.
Human Health Fish Consumption criterion is exceeded.
Human Health Drinking Water MCL criterion is exceeded.
Human Health Drinking Water PRG criterion is exceeded.
Human Health Drinking Water Region 9 PRGs HQ 0.1 criterion is exceeded.
Human Health Drinking Water SCAT criterion is exceeded.
Ecological Receptors criterion is exceeded.
More than one criterion is exceeded.
J - Estimated value
T - Result derived or selected from more than one reported value
U - Undetected at the concentration shown
FD - Field Duplicate
FR - Field Replicate
N - Natural sample

Table C-10d. Groundwater Detail.

| Chemical | CAS # | Units | JSCS Screening Levels for Groundwater: Human Health: Fish Consumption: EPA's 2004 NRWQC (organism only) 17.5 g/day | EPA's 2004 NRWQC (organism only) 175 g/day | DEQ's 2004 AWQC (organism only) 17.5 g/day | DEQ's 2004 AWQC (organism only) 175 g/day | Drinking Water: MCL | Tap Water PRGs | Region 9 PRGs HQ 0.1 | SCAT | Ecological Receptors: EPA's 2004 NRWQC (chronic) | DEQ's 2004 AWQC (chronic) | Oak Ridge National Laboratory's Tier II SCV | DEQ's AWQC (acute) criteria | ORNL Tier II SAV (acute) |
