South Coast Air Quality Management District
Engineering and Compliance
21865 Copley Drive
Diamond Bar, Calif 91765-4178

Attention: Khang Nguyen, Senior Air Quality Engineer

Subject: Marine Terminal Pier 400
Tank Farm (T2000) on Pier 300

The volumne of stored liquid and liquid processed each day is significant to an outside reader of the permit. What precautions or studies have been completed regarding the impact of an earthquake of high magnitude? Are the spill mitigation emergency plans strong enough to protect the general public from any unplanned incidents? Based on Japans recent earthquake, has the impact of a tidal wave been considered?

Sincerely
James J. Serici
