APPENDIX B

LABORATORY ANALYTICAL DATA

APPENDIX B

LABORATORY ANALYTICAL DATA

A comprehensive listing of laboratory analytical results for soil gas, soil, groundwater and physical testing samples is presented in the following pages. The data set includes data generated during the RI process as well as data generated outside of the RI process ("non-RI data") that satisfied minimum quality assurance/quality control criteria, as described in Section 4.3.15 and Appendix E.

Groundwater analytical data presented herein is limited to VOC data from the 2000 groundwater monitoring report for water table zone sampling locations since these are the data considered in the Baseline Risk Assessment for the site. Indoor air data are not included in Appendix B, but are summarized in Table 20 of this report. A comprehensive presentation of indoor data is available in the Workplace Air Monitoring Report (URS, 2001c).

This hard-copy data presentation is included to satisfy EPA requirements. An electronic presentation of the data is included on compact disk that may be more amenable to searching for specific analytical results.

APPENDIX B
LABORATORY ANALYTICAL RESULTS FOR SOIL GAS

Location ID	Sample Depth (ft. bgs)	Sample Date	Analytical Method	Analyte	Concentration (ppmv)	QA/QC Flag
