NOTICE OF PROPOSED REVISION TO TITLE V PERMIT

This notice is to inform you that the South Coast Air Quality Management District (AQMD) has received applications for the permit revisions described below and intends to issue a revised Title V permit. The AQMD is the air pollution control agency for all of Orange County and portions of Los Angeles, Riverside and San Bernardino Counties. Anyone wishing to operate, install or modify equipment that could be a source of air pollution within this region must first obtain permits from the AQMD. For certain projects, such as this one, Rule 3006 (Title V) requires publication of a public notice prior to the issuance of a permit.

The AQMD has evaluated the permit applications for the following equipment and determined that the equipment will meet all applicable air quality requirements of our Rules and Regulations.

APPLICANT:	**Ultramar, Inc.**
FACILITY ID NO.:	**800026**
FACILITY LOCATION:	**2402 E. Anaheim Street, Wilmington, CA 90744**
FACILITY CONTACT:	**Wesley Waida, Environmental Manager** **Ultramar, Inc.** **2402 E. Anaheim Street, Wilmington, CA 90744**

The facility is a petroleum refinery which processes crude oil into products such as gasoline, diesel, jet fuel and petroleum coke. The project consists of the operation of Fuel Gas Treating Unit 88 at the Wilmington Refinery. This facility uses the best available technology for controlling air pollution on this equipment. Our calculations show that based on a 30-day average, a maximum of 8.37 pounds of VOC will be emitted from fuel gas treating unit in any one day. In addition, an internal combustion engine and storage tank were previously issued a non-Title V permit prior to the facility receiving its initial Title V permit. Per Rule 3003, this internal combustion engine and tank are being noticed herein for official incorporation into the Title V permit. These two equipment are also equipped with BACT for controlling air pollution. Based on a 30-day average, a maximum of 1.27 lbs/day NOx, 8.11 lbs/day VOC, 0.12 lbs/day CO, 0.02 lb/day SOx, and 0.02 lb/day PM10 will be emitted from both the internal combustion engine and storage tank in any one day.

As required by Title V of the federal Clean Air Act, the AQMD will revise the existing Title V permit of this facility to reflect the installation of the equipment at this facility. The revised Title V permit shall include all of the emission limits and operating conditions in the proposed Permits to Operate for the above mentioned equipment. The facility shall be required to certify compliance with the revised Title V permit in addition to recordkeeping and mandatory reporting of any violations of the permit conditions. The revised Title V permit shall be enforceable by the AQMD, by the federal government, and by citizens.

The air quality analysis of this project and the proposed permit are available for public review during normal business hours at the AQMD, 21865 Copley Drive, Diamond Bar, CA. The

proposed permit can also be viewed at http://www.aqmd.gov/webappl/PublicNotices/Search/aspx by entering the facility's ID number. Information regarding the facility's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to the AQMD based on credible information, is also available from the AQMD for public review

Anyone wishing to comment on the proposed issuance of the revised permit should submit their comments in writing to the AQMD by **January 29, 2010,** at:

South Coast Air Quality Management District
Engineering and Compliance
21865 Copley Drive
Diamond Bar, CA 91765-4178
Attention: Connie Yee, Air Quality Engineer

For additional information or to review the supporting documents, please contact Ms. Connie Yee at (909) 396-2619, or cyee@aqmd.gov.

The public may request the AQMD conduct a public hearing on the proposed Title V permit by submitting a Hearing Request Form (Form 500-G) to Ms. Connie Yee at the above AQMD address. The AQMD will hold a public hearing if there is evidence that the proposed Title V permit is incorrect or inadequate to ensure compliance with regulatory requirements, and that a public hearing will likely provide additional information that will affect the drafting and/or issuance of the permit. Public hearing request forms and the schedule of public hearings may be obtained from the AQMD by calling the Title V hotline at (909) 396-3013 or downloading from the Internet at http://www.aqmd.gov/titlev. The public must submit hearing requests to the AQMD by **January 15, 2010**, and must send a copy of the hearing request by first class mail to the facility contact person listed above.
