NOTICE OF INTENT TO ISSUE "PERMITS TO CONSTRUCT and OPERATE" PURSUANT TO RULE 212 AND RULE 3006

This notice is to inform you that the South Coast Air Quality Management District (AQMD) has received nine applications for Permits to Construct and Operate to relocate two spray booths, add one new spray booth and change permit conditions on six existing spray booths at a location in your neighborhood. The AQMD is the air pollution control agency for all of Orange County and portions of Los Angeles, Riverside and San Bernardino Counties. Anyone wishing to operate, install or modify equipment that could be a source of air pollution within this region must first obtain permits from the AQMD. Rule 212 requires the applicant for certain projects to distribute and publish a public notice prepared by the AQMD prior to the issuance of a permit. This notice is being distributed because of the level of emissions.

The AQMD has evaluated the permit applications for the following equipment and determined that the equipment will meet all applicable air quality requirements of our Rules and Regulations.

APPLICANT:	**EXTREME CUSTOM TRAILERS (CO. ID 152895)**
APPLICATION NOs.:	**477678, 477679, 477680, 477682, 477683, 477684, 477685, 477686 and 477687**
LOCATION:	**5490 VIA RICARDO, RIVERSIDE, CA 92509**
PROJECT DESCRIPTION:	**RELOCATE TWO SPRAY BOOTHS, ADD ONE NEW SPRAY BOOTH AND CHANGE PERMIT CONDITIONS ON SIX EXISTING SPRAY BOOTHS.**

This company is in the business of manufacturing boat trailers. The spray booths are used to apply coatings to the trailers. This company currently operates two spray booths at a facility in Whittier under a VOC cap of 39 pounds per day, and six spray booths at this facility in Riverside under a facility VOC cap of 900 pounds per month (equivalent to 30 pounds per day). The company is proposing to relocate the two spray booths from their Whittier facility which will be closed, to the Riverside facility, install an additional spray booth, and change permit conditions on the existing spray booths at the Riverside facility to reflect the new facility VOC cap. The company will operate the consolidated facility in Riverside under a facility VOC cap of 2070 pounds per month. In addition, our calculations show that a maximum of 15 pounds of particulate matter less than 10 microns (PM_{10}) could be emitted into the air from the relocated and new spray painting operations. Generally, the emissions from this facility will be less, as most companies do not operate at their maximum potential. But even at the maximum amount, this project complies with all aspects of the AQMD's air pollution control requirements, including Best Available Control Technology.

The painting operation emits small quantities of a toxic compound. The AQMD has evaluated the short term (acute) and long term (chronic) health impacts associated with the maximum potential emissions from the coating operation. Using worst case conditions, our evaluation shows that the chronic and acute health risks are both below our rule's toxic thresholds (below a Hazard Index of 1). According to the state health experts, a hazard index of one or less means that the surrounding community including the most sensitive individuals such as very young children and the elderly will not experience any adverse health impacts due to the toxic nature of these emissions.

The air quality analysis of this project is available for public review at the AQMD's headquarters in Diamond Bar, and at the Riverside Main Library, 3581 Mission Inn Avenue, Riverside, CA 92501. Copies of the draft permits can be viewed at www.aqmd.gov/webappl/PublicNotices/Search.aspx by entering the company's name. Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to AQMD, based on credible information, is also available from the AQMD for public review. Anyone wishing to comment on the proposed issuance of these permits should submit their comments in writing by June 22, 2008. If you are concerned primarily about zoning decisions and the process by which this facility has been sited at this location, you should contact your local city or county planning department. Please submit comments related to air quality to Mrs. Wilma Wilson, Air Quality Engineer, Coating, Printing, and Aerospace Operations, Engineering and Compliance, South Coast Air Quality Management District, 21865 Copley Drive, Diamond Bar, California 91765-4178. For additional information, please call Mrs. Wilma Wilson at (909) 396-2444.

For your general information, anyone experiencing air quality problems such as dust or odor can telephone in a complaint to the AQMD by calling 1-800-CUT-SMOG (1-800-288-7664).

Proposed Title V Permit

As required by Title V of the federal Clean Air Act, the AQMD is proposing to issue the permits in the form of an Initial Title V permit. The Title V permit will not only contain all of the emissions limits and operating conditions, but will require monitoring, record keeping, mandatory reporting of any violations of permit conditions, and annual certifications by the operator that their facility is in compliance with the new permit. The Title V permit shall be enforceable by the AQMD, the federal government and, for the first time, by citizens. The AQMD will consider all public comments and may revise the proposed Title V permit in accordance with AQMD rules and regulations.

The public may request the AQMD to conduct a public hearing on the proposed Title V permit by submitting a Hearing Request Form (Form 500-G) to Mrs. Wilma Wilson of the AQMD. The AQMD will hold a public hearing if there is evidence that the proposed Title V permit is incorrect or inadequate to ensure compliance with regulatory requirements, and that a public hearing will likely provide additional information that will affect the drafting and/or issuance of the permit. Public hearing request forms and the schedule of public hearings may be obtained from the AQMD by calling the Title V hotline at (909) 396-3013 or downloading from the Internet at http://www.aqmd.gov/titlev. The public must submit hearing requests by June 7, 2008 to the AQMD, and must send a copy of the hearing request by first class mail to Mr. Eric Day, Safety & Compliance Coordinator, Extreme Custom Trailers, Division of Lippert Corporation Inc., 5490 Via Ricardo, Riverside, CA 92509.
