Mail Stop A-5-2
75 Hawthorne Street
San Francisco, California 94105

Dear Mr. Rios:

Proposed De-Minimus Significant Revision to Title V Permit for Chevron USA Inc., Montebello (ID# 800032)

Enclosed for your review is the proposed revision, under application 509197 to the Title V permit for Chevron USA Inc. located at 601 S. Vail Ave., Montebello, CA 90640. This revision is considered to be a de-minimus significant revision and a public notice is not required. Chevron is requesting this change to increase the throughput of diesel fuel in storage tank 4. We are enclosing a draft permit as shown below, and the engineering evaluation.

Chevron USA Inc. (ID 800032) has proposed to revise their Title V permit by increasing their throughput in their diesel storage tank.

SECTION D (Permit to Operate) Revision # 2

Appl. No.	Equipment	Description
508212 (previously identified as 228675)	Diesel Storage Tank No. 4	Increase throughput from 22,472 to 27800 barrels per day

The initial Title V permit for this facility was issued on May 25, 2009, and then subsequently revised under application 500190 on January 15, 2010.

The proposed changes will result in a negligible increase of emissions from the increase in throughput in the diesel storage tank.

This package is being submitted electronically in order to facilitate your review. If you have any questions or need additional information concerning the proposed Title V package, please contact Mr. Arturo Arreola, P.E. at 909.396.2534.

Very truly yours,

Jay Chen, P.E.
