SUBJECT: BP West Coast Products LLC, BP Wilmington Calciner
Title V Facility Permit, Section D – Revision No. 10 (Facility ID: 131249)

Dear Mr. Rosu:

Attached are the revised Title Page, Table of Contents, and Section D of your Title V Facility Permit for the petroleum coke calcining facility located 1175 Carrack Avenue, Wilmington, CA 90744. The proposed Minor permit revision was submitted to EPA for 45-day review on December 8, 2011. The revised Facility Permit reflects the inclusion of the following applications that have been approved for Permits to Operate:

SECTION D (Permits to Operate), Revision No. 10

Appl. No.	Equipment	Device	Process	System	Description
517770	Scrubber	C68	1	3	Clarify that the scrubber is a "lime scrubbing system" instead of a "sodium alkali scrubbing system" as described in the EPA's PSD permit
527388	Baghouse	C69	1	3	New condition D28.2 to incorporate the PSD-permit-required annual source test for SOx emissions at 80% or greater capacity

The initial Title V Permit for this facility was issued on October 3, 2008. This revision is covered under application no. 517769.

Please review the attached Sections carefully. Insert the enclosed sections into you Title V Facility Permit and discard the earlier versions. Questions concerning the changes to your permit should be directed to Ms. Belinda Wan at (909) 396-2532 or by email at bwan@aqmd.gov.

Sincerely,

Jay Chen, P.E.
