APPENDIX G

Construction Photographs

Photo No. 01 - 25-May-04 – Looking West
USFW starting to unload and set filter vessels in the approx. location on the East concrete foundation slab in the plant expansion area.

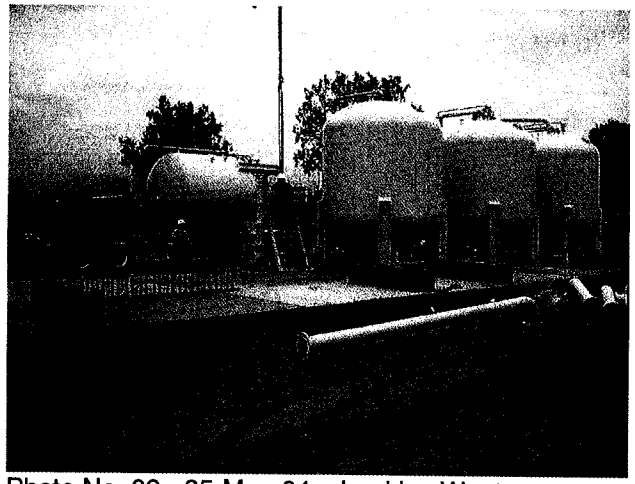

Photo No. 02 - 25-May-04 – Looking West
USFW continuing to unload and set filter vessels and filter vessel pipe manifolds from the low boy trailer truck onto the East concrete foundation slab in the plant expansion area.

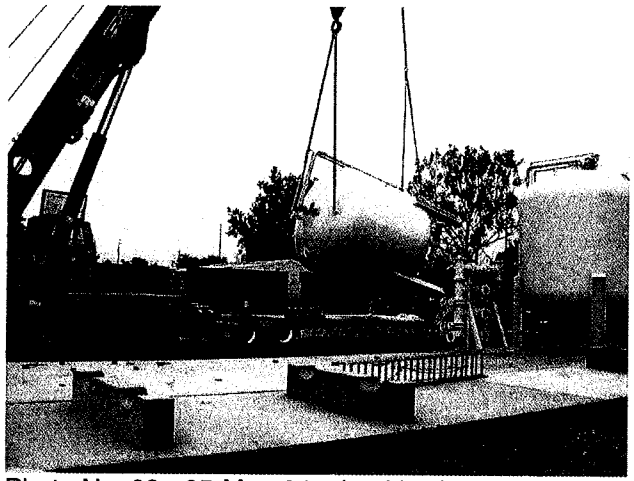

Photo No. 03 - 25-May-04 – Looking West
Lifting the filter vessels off the trailer truck with a truck crane and then setting filters into position on the East concrete foundation slab.

Photo No. 04 - 25-May-04 – Looking West
Continuing to use a truck crane to move the filter vessels from the trailer truck to the foundation slab.

Photo No. 05 - 25-May-04 – Looking North
Continuing to use the truck crane to place the filter vessels into approx. location on the East concrete foundation slab in the plant expansion area.

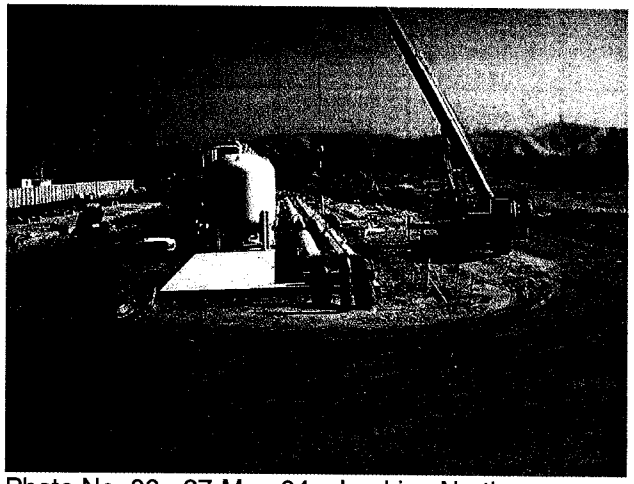

Photo No. 06 - 27-May-04 – Looking North
Installing the filter vessel influent and effluent steel header piping on the East concrete foundation slab in the plant expansion area.

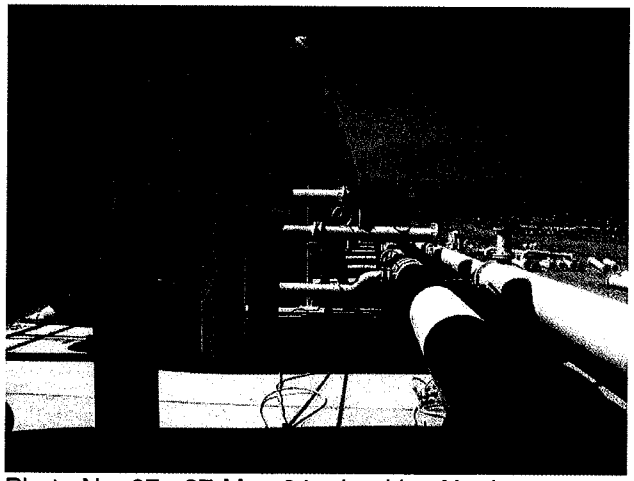

Photo No. 07 - 27-May-04 – Looking North
Installing the 8-inch steel lateral piping from the filter vessel valve manifold to the header piping on the East side of the filter vessels.

Photo No. 08 - 27-May-04 – Looking South
Continuing to install the steel lateral piping and installing the backwash header piping on the East side of the filter vessels in the plant expansion area.

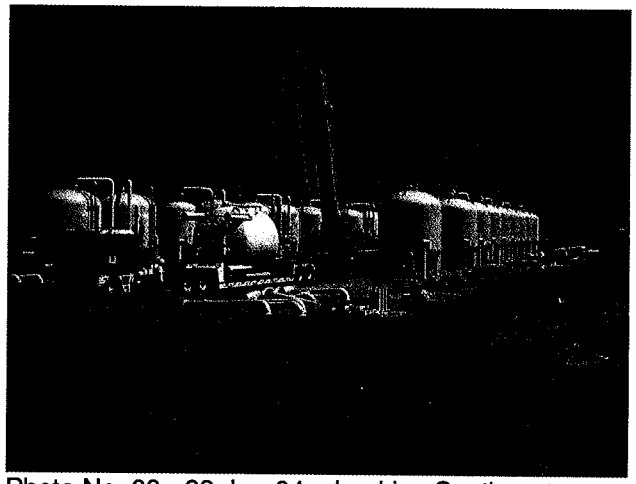

Photo No. 09 - 22-Jun-04 – Looking Southeast
USFW setting the filter vessels on the West concrete foundation slab using a truck crane in the plant expansion area.

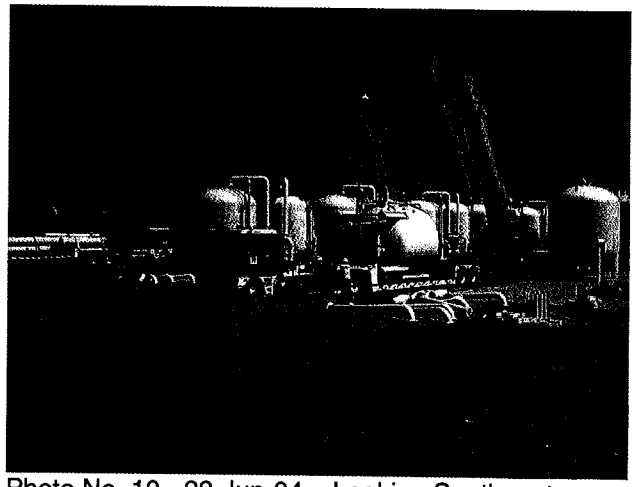

Photo No. 10 - 22-Jun-04 – Looking Southeast
Continuing to unload trailer trucks with a truck crane and placing the filter vessels on the West concrete foundation slab.

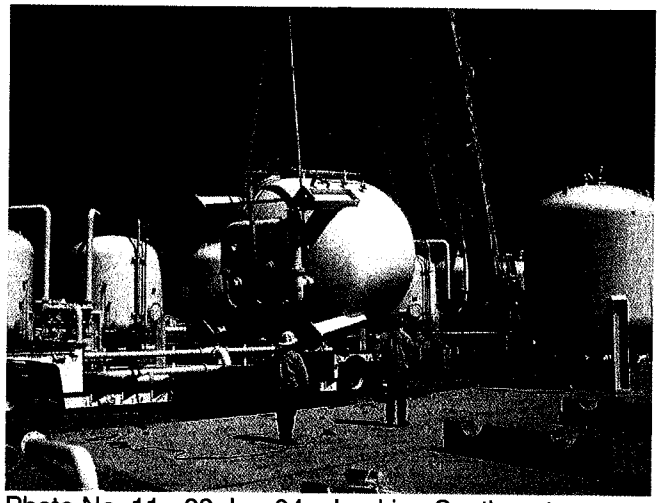

Photo No. 11 - 22-Jun-04 – Looking Southeast
Lifting the filter vessel off of the trailer truck with a truck crane and placing the filter vessels on the concrete foundation slab.

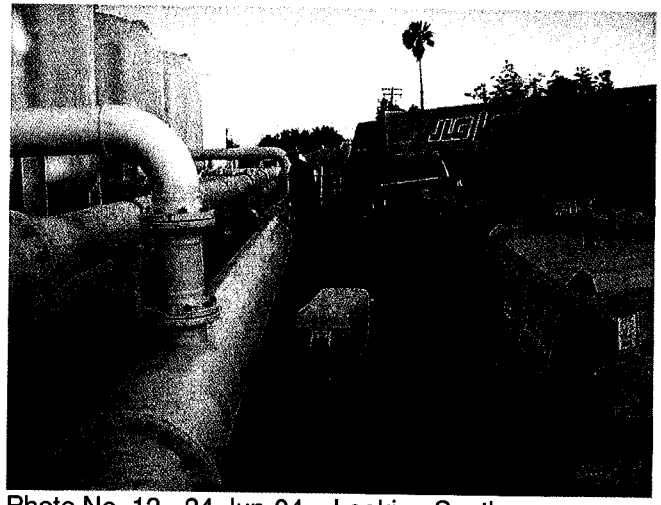

Photo No. 12 - 24-Jun-04 – Looking South
Continuing to install and bolt up the filter vessel header piping and 8-inch lateral piping from the vessel valve manifolds on the West concrete foundation slab.

Photo No. 13 - 28-Jun-04 – Looking East
Injecting epoxy in drilled anchor holes for the filter vessel support legs located on the West concrete foundation slab.

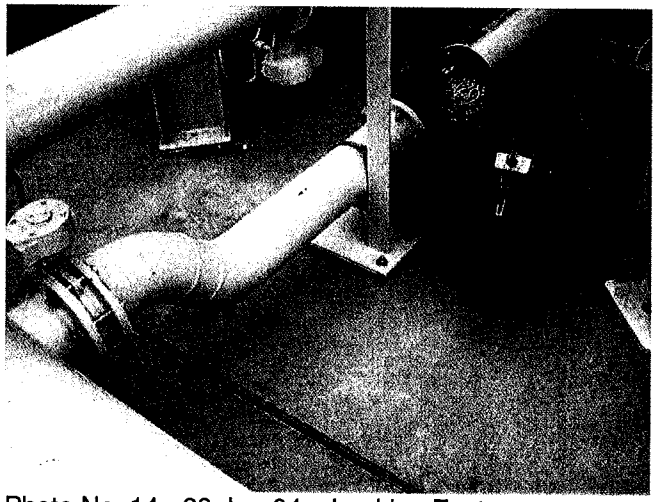

Photo No. 14 - 28-Jun-04 – Looking East
Setting the anchor bolts in the drill holes after the epoxy Was injected into the anchor holes on the West concrete foundation slab

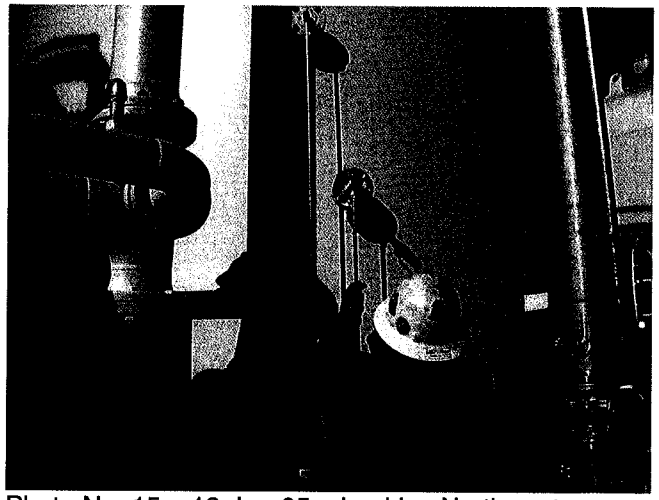

Photo No. 15 – 12-Jan-05 – Looking Northwest
Installed the granular activated carbon sample ports on the filter vessels in the plant expansion area.

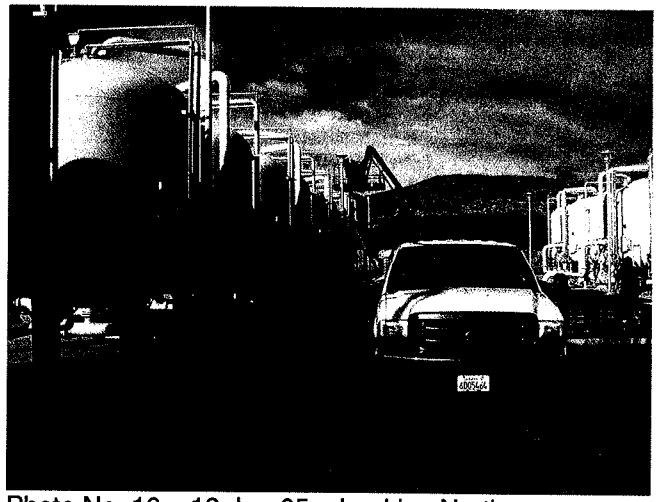

Photo No. 16 – 12-Jan-05 – Looking North
Chlorination and pressure testing the filter vessels and filter header piping at the plant expansion area.

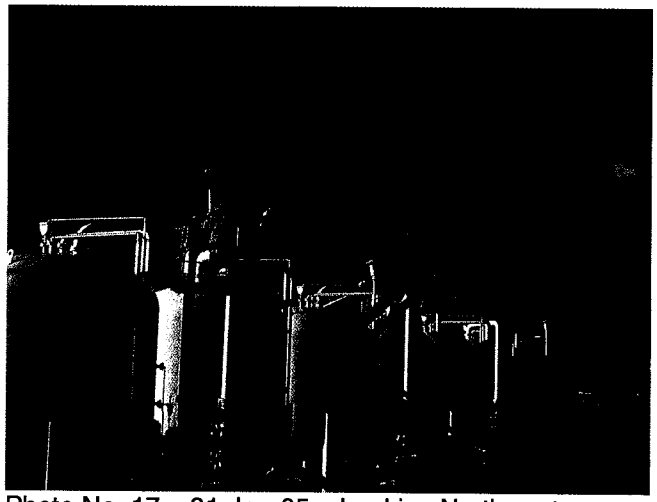

Photo No. 17 – 31-Jan-05 – Looking Northwest
Touch up painting on the outside of the filter vessels at the plant expansion area.
