Lead in Water Dataset Provided to EPA by CDC

Please note that this dataset is not the same analytic dataset used in the Brown et al., 2011 paper. The analytic dataset for the paper selected one test per child according to the algorithm listed in the methods section of the paper.

Variable Descriptions for Dataset

- Address_ID – unique address ID
  - Missing address = 99999
- ChildID – the unique child ID
- SAMP_DATE – the date of the child's blood lead test
- new_SampType_1– the sample type of the blood lead test
  - 0 = Venous
  - 1 = Capillary
  - 9 = Unknown
- PBB_REST – the blood lead level of the child's blood lead test (µg/dL)
- Age1 – the age, in months, of the child at the time of the blood lead test
- Lheader – the presence of a lead header pipe at the housing unit where the child was living during the time of the blood lead test
  - 1 = Yes, there is/was a lead header pipe
  - 9 = Unknown
- Date_Replaced – the date the lead header pipe was replaced in the housing unit
- Partial_full – Whether the lead header pipe replacement was a full replacement or a partial replacement
  - F = Full replacement
  - P = Partial Replacement
- sampleyear – the year the blood lead test occurred
- Chlor – the time variable for the water disinfectant
  - 1 = chlorine
  - 2 = chloramine
  - 3 = chloramine + orthophosphate
- YRBLT – the year the housing unit was built that the child was living in at the time of the blood lead test
