2.4. A concise statement of the factual basis for alleging violations of the CAA, together with specific references to the provisions of the CAA and implementing regulations Respondent is alleged to have violated, appears in Part III of this CAFO.

III. ALLEGATIONS

3.1. Section 112(r) of the CAA, 42 U.S.C. § 7412(r), and its implementing regulations at 40 C.F.R. Part 68 require the owner and operator of a stationary source at which a regulated substance is present in more than a threshold quantity to develop and implement a risk management plan (“RMP”) to detect and prevent or minimize accidental releases of such substances from the stationary source and to provide a prompt emergency response to any such releases in order to protect human health and the environment.

3.2. 40 C.F.R. § 68.150 requires that an owner or operator of a stationary source that has more than a threshold quantity of a regulated substance in a process submit an RMP to EPA no later than the latest of the following dates: (1) June 21, 1999; (2) three years after the date on which a regulated substance is first listed under § 68.130; or (3) the date on which a regulated substance is first present above a threshold quantity in a process.

3.3. 40 C.F.R. § 68.190(b) requires that the owner or operator of a stationary source to revise and update the RMP submitted under 40 C.F.R. § 68.150 at least once every five years from the date of its initial submission or most recent update.

3.4. 40 C.F.R. § 68.3 defines “stationary source” as any buildings, structures, equipment, installations, or substance-emitting stationary activities which belong to the same industrial group, which are located on one or more contiguous properties which are under the control of the same person (or persons under common control), and from which an accidental release may occur.

3.7. 40 C.F.R. § 68.3 defines “process” as any activity involving a regulated substance including any use, storage, manufacturing, handling, or on-site movement of such substance, or combination of these activities.

3.8. Under 40 C.F.R. § 68.115, a threshold quantity of a regulated substance listed in 40 C.F.R. § 68.130 is “present at a stationary source” if the total quantity of the regulated substance contained in a process exceeds the threshold quantity.
