Re: Administrative Order
Restway Travel Park Public Water System
Docket No. SDWA-08-2010-0009
PWS ID #5601292

Dear Ms. Sherman:

The Administrative Order (Order) issued by the Environmental Protection Agency (EPA) December 30, 2009, required the installation and continuous operation of disinfection equipment if the system's water exceeded the total coliform maximum contaminant level (MCL). The system's water exceeded the total coliform MCL on August 30, 2010, just prior to closing for the season; therefore, prior to opening for the season in May 2011 continuous disinfection must be installed and continuously operated.

You must notify EPA in writing within 10 days of installing disinfection. Please note that the Wyoming Department of Environmental Quality may require a permit prior to making any changes to the system. Failure to comply with the Order may lead to substantial civil penalties and/or a Federal court injunction ordering compliance.

If you have any questions, please contact me at the above address (with the mailcode 8ENF-W) or by phone at (800) 227-8917, extension 312-6481 or (303) 312-6481.

We urge your prompt attention to this matter.

Sincerely,

Kathelene Brainich, Enforcement Officer
Drinking Water Enforcement Program
Office of Enforcement, Compliance
and Environmental Justice
