

MEMO TO THE FILE

From: Jeffrey R. McDonald
Date: August 28, 2014
Subject: Phone conversation with Bryan Huff of the ISGS regarding wells in the Gas Storage Field in Waverly, Illinois

On June 27, 2014, I spoke with Bryan Huff of the ISGS to learn more about two deep wells that are in the Area of Review for FutureGen. These are the Criswell # 1-16 and the Whitlock # 7-15 wells. On June 30th, Bryan e-mailed me some scanned images from the records on these two wells (8 and 12 pages for the Criswell and Whitlock wells, respectively). Both are operated by Panhandle Eastern Pipe Line Co.
