Group	Field name	Field description
Source Data	api	API well number.
	latitude	Well latitude, NAD83 datum.
	longitude	Well longitude, NAD83 datum.
	td	Well depth (assumed to be relative to ground surface).
Location	QA	QA flag of location. Indicates whether well was missing coordinates, is located far outside the 8-county area, or is located just outside the 8-county area.
	Elevation	Surface elevation above sea level in feet, accurate to within +/- 10 feet.
	Plume	Flag of whether the well is located within the maximum extent of the plume, 1=yes, 0=no. (cm24_c2_22yr_plume_polygon_NAD1983UTM16Nft.shp)
	AOR	Flag of whether the well is located within the AOR, 1=yes, 0=no. (AqDiffPress60yr_10psi_polygon_NAD1983UTM16Nft.shp)
Property	Property	Name of nearby or overlapping property, either Leinberger or Critchelow.
	Dist	Distance to nearby property (in meters), or 0 if overlapping. Only applies to wells in sections 2, 3, 4, 9, 10, 11, 14, 15, and 16 of township 15N 9W.
Formation	Deeper	Deeper bound of contour intersecting with well, in feet below sea level.
	Shallower	Shallower bound of contour intersecting with well, in feet below sea level.
	WellElevation	Elevation of the base of the well below sea level, calculated by subtracting <i>Elevation</i> from <i>td</i> . Negative values are below sea level, positive values are above sea level.
	BelowFormation	Flag of whether well depth (<i>td</i>) is shallower than shallower bound (0), between the deeper and shallower bounds (1), or deeper than the deeper bound (2).
Corrective Action Evaluation Notes	WellType	From the <i>st</i> field in the source data (only listed for selected wells).
	TDFormation	From the <i>tdform</i> field in the source data (only listed for selected wells).
	Additional Notes	Miscellaneous notes for selected wells.
