In re:

Archer Daniels Midland Company
Decatur, Illinois
Facility CCS#2

UIC Permit No. IL-115-6A-0001

UIC Appeal No. 14-72

**ORDER TO SHOW CAUSE
WHY PETITION SHOULD NOT BE DISMISSED
AND STAYING OTHER DEADLINES**

On October 28, 2014, the U.S. Environmental Protection Agency ("EPA") received Mr. Jeffrey Sprague's petition for review of Underground Injection Control ("UIC") Permit No. IL-115-6A-0001, issued by EPA Region 5 on September 23, 2014, to Archer Daniels Midland Company ("ADM"). The permit authorizes ADM to construct and operate a new injection well in Decatur, Illinois, for carbon capture and sequestration purposes.

On November 12, 2014, EPA Region 5 filed a motion to dismiss Mr. Sprague's petition, claiming it was one day late under the permitting regulations set forth in 40 C.F.R. part 124. Those regulations require petitions to be filed within thirty days after a final permit decision is issued, plus three days if EPA served the final permit by mail. 40 C.F.R. §§ 124.19(a)(3), .20(d). In this case, a thirty-three-day post-permit issuance period places the petition-filing deadline on Monday, October 27, 2014.

Before ruling on Region 5's motion to dismiss, the Environmental Appeals Board would benefit from obtaining Mr. Sprague's response to the Region's motion. Accordingly,

Mr. Sprague is hereby ordered to provide a response to the Board, in writing, on or before

Thursday, December 4, 2014.

In addition, the Region's motion for extensions of time to file a response to

Mr. Sprague's petition and to respond to the Board's offer to participate in the Alternative

Dispute Resolution ("ADR") program are hereby granted. Both of these deadlines are stayed

until such time as the Board issues an order ruling on the Region's motion to dismiss

Mr. Sprague's petition. If the Board decides not to dismiss the petition, the Board will establish

deadlines for briefing and responding to the Board's offer to participate in ADR for further

orderly progress in this case.

So ordered.
