The Sudbury River Boater's Trail
From Little Farms Road (Framingham) to Old Calf Pasture/Egg Rock (Concord) runs approximately 15 miles. It consists of three major segments, each of approximately 5 miles

- 1. Little Farms Road to Route 27
- 3. Lincoln Boat Launch Route 117 to Old Calf Pasture/Egg Rock

1. Little Farms Road to Route 27

This section of the Boater's Trail begins in the shaded, meandering reaches of the Sudbury River

and runs about 5 miles to the beginnings of the wide open flood plains in Sudbury and Wayland. Take modest precaution because the water can be quick moving in the upper portion of this section in the spring. Along the way there are many natural and historical sites of interest, including the Oxbow, a natural river feature near the put-in, and remnants of the Old Stone Bridge. The River passes to the east of Heard Pond in Wayland and enters Great Meadows National Wildlife Refuge. Towards the conclusion of this section, the flood plains open in to wide meadows where there is opportunity to view numerous water birds.

Boat Launch on

What is a Wild and

Enacted in 1968, the Wild a program to permanently protect selected free flowing to possess outstandingly remarkable scenic recreational, ecological, recreational, ecological, historical or cultural resources are included in the Wild and Scenic System. Nationally, 166 rivers are designated. The Sudbury, Assabet and Concord Rivers are recognized, along with 6 other New England Rivers.

From Little Farms Road (Framingham) to Old Calf Pasture/Egg Rock (Concord) runs approximately 15 miles. It consists of three major segments, each of approximately 5 miles:

- 1. Little Farms Road to Route 27
- 2. Route 27 to the Lincoln Boat Launch on Route 117
- 3. Lincoln Boat Launch Route 117 to Old Calf Pasture/Egg Rock

1. Little Farms Road to Route 27

This section of the Boater's Trail begins in the shaded, meandering reaches of the Sudbury River

and runs about 5 miles to the beginnings of the wide open flood plains in Sudbury and Wayland. Take modest precaution because the water can be quick moving in the upper portion of this section in the spring. Along the way there are many natural and historical sites of interest, including the Oxbow, a natural river feature near the put-in, and remnants of the Old Stone Bridge. The River passes to the east of Heard Pond in Wayland and enters Great Meadows National Wildlife Refuge. Towards the conclusion of this section, the flood plains open in to wide meadows where there is opportunity to view numerous water birds.

2. Route 27 to Route 117, Lincoln Boat Launch on Route 117

The meadows reach their widest just down-

stream of Route 27. This section of the Boater's Trail is open and the River is slow moving as it flows northward. As you travel you will see open land — some farms, and land that is now protected which was once active farmland. Headquarters of the Great Meadows National Wildlife Refuge is just past Sherman's Bridge and a nice spot to get out and stretch your legs. You will also pass under Lee's Bridge in Lincoln, an historic granite bridge, recently reconstructed.

3. Lincoln Boat Launch, Route 117 to Old Calf Pasture

This section of the Trail is both naturally and culturally interesting. Just downstream

of the boat launch on Route II7 in Lincoln you will enter Fairhaven Bay, a beautiful wide open section of the River, and an area written of by Thoreau and others. From here, the River loses some of its wide floodplains and becomes a bit more developed, traveling by the hospital and under Route 2. It is a gentle trip through the Town of Concord with a lot to see. The Trail concludes at the Old Calf Pasture, at the confluence of the Sudbury and Assabet Rivers, and a fun place to explore. You can take your boat out at the Lowell Road Boat Launch (on the right adjacent to the Calf pasture) or you can continue, either up the Assabet a short way or down the Concord to the Old North Bridge.

What is a Wild and Scenic River?

Enacted in 1968, the Wild and Scenic Rivers Act created a program to permanently protect selected free flowing rivers. Those rivers deemed to possess outstandingly remarkable scenic, recreational, ecological, historical or cultural resources are included in the Wild and Scenic System. Nationally, 166 rivers are designated. The Sudbury, Assabet and Concord Rivers are recognized, along with 6 other New England Rivers.
