Statutory and Regulatory Background

9. Section 502(d)(1) of the Act, 42 U.S.C. § 7661a(d)(1), requires each state to develop and submit to EPA an operating permit program (Title V Permit Program). On December 4, 2001, 66 Fed. Reg. 62969, EPA granted Indiana final approval of its Title V Permit Program, effective November 30, 2001.

10. Section 502(a) of the Act, 42 U.S.C. § 7661a(a), and 40 C.F.R. § 70.7(b), provide that, after the effective date of any permit program approved or promulgated under Title V of the Act, no source subject to Title V may operate except in compliance with a Title V permit.

11. On February 20, 2008, 73 Fed. Reg. 9201-9203, EPA approved 326 IAC 8-5-6, fuel grade ethanol production at dry mills, to its volatile organic compounds (VOC) rules as a revision to the Indiana State Implementation Plan (SIP) at 40 C.F.R. § 52.770(c)(182).

12. 326 IAC 8-5-6(c)(1) states that the owner or operator of a fuel grade dry mill ethanol production plant shall install and operate a thermal oxidizer with an overall control efficiency of not less than 98% percent or resulting in a VOC concentration of not more than 10 parts per million (ppm).

13. 326 IAC 8-5-6(e)(1) provides that the owner or operator of a fuel grade ethanol dry mill production plant that was constructed or modified after April 1, 2007, that installs and operates a thermal oxidizer as its VOC control device, shall measure the three (3) hour average

operating temperature of the oxidizer using a continuous temperature monitor. The 3-hour average temperature must be greater than or equal to the minimum operating temperature established during the plant's most recent compliance demonstration.

14. On January 6, 2012, the Indiana Department of Environmental Management (IDEM) issued Title V Operating Permit No. T095-30443-00127 to POET-Alexandria. IDEM approved a significant permit modification to the Title V permit on January 23, 2013, and renumbered Title V Operating Permit as No. T095-31614-00127.

15. Part D.2.1(a) of the Title V Permit limits VOC emissions to 30.80 lbs/hour from scrubber CE008 and regenerative thermal oxidizer (RTO) CE009 unless operating under condition D.2.1(b) or D.2.1(c).

16. Part D.2.1(b) of the Title V permit limits VOC emissions when scrubber CE008 is not operating to 30.80 lbs/hour from RTO CE009.

17. Part D.2.1(c) of the Title V permit limits VOC emissions when RTO CE009 is not operating to 75.95 lbs/hour from scrubber CE008.

18. The Administrator of EPA (the Administrator) may assess a civil penalty of up to \$32,500 per day of violation up to a total of \$270,000 for violations that occurred after March 15, 2004 through January 12, 2009 and may assess a civil penalty of up to \$37,500 per day of violation up to a total of \$295,000 for violations that occurred after January 12, 2009 under Section 113(d)(1) of the CAA, 42 U.S.C. § 7413(d)(1), and 40 C.F.R. Part 19.

19. Section 113(d)(1) limits the Administrator's authority to matters where the first alleged date of violation occurred no more than 12 months prior to initiation of the administrative action, except where the Administrator and the Attorney General of the United

States jointly determine that a matter involving a longer period of violation is appropriate for an administrative penalty action.

20. The Administrator and the Attorney General of the United States, each through their respective delegates, have determined jointly that an administrative penalty action is appropriate for the period of violations alleged in this CAFO.
