CONSENT AGREEMENT
AND
FINAL ORDER

Docket No.
SDWA-02-2018-8402

I. PRELIMINARY STATEMENT

1. This administrative proceeding for the assessment of a civil penalty was instituted pursuant to Section 1414(g)(3)(B) of the Safe Drinking Water Act (the "Act"), 42 U.S.C. §300g-3(g)(3)(B).
2. EPA is initiating and concluding this administrative proceeding for the assessment of a civil penalty pursuant to Section 1414(g)(3)(B) of the Safe Drinking Water Act (the "Act"), 42 U.S.C. §300g-3(g)(3)(B) and 40 C.F.R. § 22.13(b) of the "Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties, Issuance of Compliance or Corrective Action Orders, and the Revocation, Termination or Suspension of Permits" ("CROP"), which sets forth procedures for simultaneous commencement and conclusion of administrative civil penalty assessment proceedings through issuance of a consent agreement and final order pursuant to 40 C.F.R. §§ 22.18(b)(2) and (3).
3. This Consent Agreement is entered into by the Director of the Division of Enforcement and Compliance Assistance ("Director"), Region 2, United States Environmental Protection Agency ("Complainant") and Reno Mannino ("Respondent"), pursuant to Section 1414(g)(3)(B) of the Act, 42 U.S.C. §300g-3(g)(3)(B), and in accordance with 40 C.F.R. Part 22. The authority to issue this Consent Agreement has been duly delegated by the Regional Administrator of Region 2 to the Director.
4. The Complaint has charged Respondent with violating the terms and conditions of an Administrative Order ("AO") issued to Respondent pursuant to Section 1414(g) of the Act,

42 U.S.C. §300g-3(g), requiring compliance with an applicable requirement of the Act at Respondent's public water system (Frank's Pizza) located in Ringoes, New Jersey.

5. This Consent Agreement and Final Order (collectively "CA/FO") resolves violations of specific requirements under EPA AO Docket Number [SDWA-02-2017-8032].

II. FINDINGS OF FACT AND CONCLUSIONS OF LAW

1. Respondent owns and/or operates Frank's Pizza "public water system," within the meaning of Section 1401(4) of the SDWA, 42 U.S.C. §300f(4) and 40 C.F.R. §141.2, located in Ringoes, New Jersey.
2. Respondent is a "supplier of water" as that term is defined in Section 1401(5) of the SDWA, 42 U.S.C. §300(f)(5), and 40 C.F.R. §141.2.
3. Respondent is a "person" within the meaning of Section 1401(12) of the SDWA, 42 U.S.C. §300f(12).
4. According to SDWA §1414(g)(3)(b), 42 U.S.C. §300g-3(g)(3)(B), each person that owns or operates any public water system is subject to and must comply with, all federal, State, interstate, and local requirements, both substantive and procedural, to the same extent as any supplier of water is subject to such requirements.
5. Respondent provides piped water for human consumption and serves at least 25 individuals per day for at least 6 months per year, and is therefore a transient non-community water system ("TNCWS") as defined by Section 1401(16) of the SDWA, 42 U.S.C. §300f(16), and 40 C.F.R. 141.2. Respondent is therefore subject to the requirements of Part B of the SDWA, 42 U.S.C. §300g, and its implementing regulations found at 40 C.F.R. Part 141.
6. EPA published the Revised Total Coliform Rule ("RTCR") in the Federal Register ("FR") on February 13, 2013 (78 FR 10269) and minor corrections on February 26, 2014 (79 FR 10665). The RTCR is the revision to the 1989 Total Coliform Rule ("TCR") and is intended to improve public health protection. The RTCR establishes a maximum contaminant level ("MCL") for E. coli and total coliforms to initiate a "find and fix" approach to address fecal contamination that could enter into the distribution system. It requires public water systems ("PWSs") to perform assessments to identify sanitary defects and subsequently take action to correct them.
7. EPA published the Ground Water Rule ("GWR") in the Federal Register ("FR") on November 8, 2006 (71 FR 65574) and corrections on November 21, 2006 (71 FR 67427). The GWR establishes a risk-targeted approach to identify GWSs susceptible to fecal contamination and requires corrective action to correct significant deficiencies and source water fecal contamination.
8. The New Jersey Department of Environmental Protection ("NJDEP") administers the Public Water Supply Supervision Program in New Jersey pursuant to Section 1413 of the SDWA.

The approval of primary enforcement responsibility from EPA to New Jersey was effective as of July 13, 1979. NJDEP is the primacy agency, as that term is defined in 40 C.F.R. §142.2. NJDEP has not yet obtained primary enforcement responsibility for the RTCR, therefore, as of the date of the AO, the USEPA has primary responsibility for enforcement of the RTCR. On July 14, 2017, NJDEP referred the case to EPA for appropriate enforcement to address GWR violation(s) as well.

9. Respondent was required to begin complying with the compliance monitoring provisions of the RTCR beginning April 1, 2016.
10. Pursuant to 40 C.F.R. §141.854(a)(3), once all monitoring required for a calendar month has been completed, systems must determine whether any coliform treatment technique triggers specified in 40 C.F.R. §141.859 have been exceeded. If any trigger has been exceeded, systems must complete assessments as required by 40 C.F.R. §141.859.
11. Pursuant to 40 C.F.R. §141.858, Respondent must collect a set of repeat samples within 24 hours of being notified of any total coliform positive result. No fewer than 3 repeat samples must be collected for each total coliform-positive sample. If any routine or repeat sample is total coliform-positive, Respondent must analyze that total coliform-positive culture medium to determine if *E. coli* are present.
12. Pursuant to 40 C.F.R. §141.859(a)(2), a Level 2 Assessment is required if:
 - (a) Respondent has an *E. Coli* MCL violation, or
 - (b) Respondent triggers a second Level 1 Assessment within a rolling 12-month period.
13. Pursuant to 40 C.F.R. §141.859(b)(4), the completed Level 2 Assessment form must be submitted to the State within 30 days after it learns that the treatment technique trigger was exceeded.
14. Pursuant to 40 C.F.R. §141.860(a), a system is in violation of the MCL for *E. Coli* when any of the following conditions are met:
 - (a) The system has an *E. Coli*-positive repeat sample following a total coliform-positive routine sample.
 - (b) The system has a total coliform-positive repeat sample following an *E. Coli*-positive routine sample.
 - (c) The system fails to take all required repeat samples following an *E. coli*-positive routine sample.
 - (d) The system fails to test for *E. Coli* when any repeat sample tests positive for total coliform.
15. Pursuant to 40 C.F.R. §141.860(b), a treatment technique violation occurs when a system exceeds a treatment technique trigger in 40 C.F.R. §141.859(a) and then fails to conduct the required assessment or corrective action within the timeframe specified.

16. Pursuant to 40 C.F.R. §141.854(f), systems that have an *E. coli* MCL violation and/or a coliform treatment technique violation must monitor monthly for total coliform. The system must continue monthly monitoring until it meets the reduced monitoring requirements outlined in §141.854(g).
17. Pursuant to 40 C.F.R. §141.402, a groundwater system that does not provide 4-log treatment of viruses must conduct triggered source water monitoring within 24 hours of notification of a total coliform positive sample collected under 40 C.F.R. §§141.854 – 141.857 beginning April 1, 2016.
18. On July 14, 2017, NJDEP provided information to EPA indicating that Respondent failed to comply with the monitoring, reporting and MCL requirements for total coliform as outlined below and is, therefore, in violation of 40 C.F.R. Part 141, Subpart S and Y:
 - (a) In February 2017, Respondent had 1 total coliform-positive result which triggered the Ground Water Rule requiring Respondent to take a raw water bacteriological sample from the well. Respondent failed to take the raw water sample.
 - (b) In February 2017, Respondent had 1 total coliform-positive repeat result and 2 *E. coli* positive repeat results. Respondent was required to conduct a Level 2 Assessment by March 20, 2017. Respondent failed to complete the assessment and received a treatment technique violation.
 - (c) In April 2017, Respondent was notified to begin increased (monthly) monitoring.
 - (d) In May, June and July 2017, Respondent failed to conduct monitoring for total coliforms.
19. August 17, 2017, EPA issued an Administrative Order, Docket Number SDWA-02-2017-8032, requiring Respondent to comply with the monitoring, reporting, maximum contaminant level and treatment technique requirements for total coliform in accordance with 40 C.F.R. Part 141, Subparts S and Y. Additionally, the AO required Respondent to submit a copy of its sample siting plan and comply with all public notice requirements specified in 40 C.F.R. Part 141, Subpart Q within thirty (30) days of receipt of the Order, and to submit a copy of the public notice and certification that public notice was completed to EPA and NJDEP within forty-five (45) days of receipt of the Order.
20. According to EPA's records in the form of the United Parcel Service mail receipt (Tracking Number 1Z132 735 12 5116 8387), the AO was received by Respondent on October 2, 2017.
21. On October 12, 2017, EPA informed Respondent via telephone of the requirements of the AO. However, to date, Respondent has failed to send any of the required information to EPA.

III. CONSENT AGREEMENT

1.
