

OVERHEAD CHAIN LUBRICATION SYSTEM

XACT FLUID SOLUTIONS HAS DEVELOPED A CHAIN LUBRICATION SYSTEM THAT PRECISELY DISPENSES LUBRICANT TO THE CHAIN SURFACE AND WILL NOT DRIP EXCESS INTO PRODUCTION AREAS. THIS LUBRICATOR IS DESIGNED TO COAT THE CHAIN AFTER WASHDOWN AND PREVENT CORROSION DURING HIGH MOISTURE, LOW TEMPERATURE OPERATION OF THE CHAIN.

TYPICAL SYSTEM COMPONENTS:

- ☞ THREE GALLON RESERVOIR WITH LOW LEVEL INDICATION.
- ☞ NEMA 4X STAINLESS STEEL ENCLOSED LOGIC AND PUMPS.
- ☞ ADJUSTABLE MOUNTING BRACKETS.
- ☞ PRECISION SPRAY NOZZLES AND MOUNTING HARDWARE.

WE USE JAX MAGNA-PLATE 78 WHICH PROVIDES AN EXCELLENT WATER DISPLACEMENT AND WASHOUT RESISTANCE IN OPERATION. IT ALSO PREVENTS CORROSION WITHIN THE CHAINS TO ALLOW FOR EXTENDED LIFE AND CONSISTENT PERFORMANCE.

EXTENSIVE FIELD TESTING HAS SHOWN A LIGHT COAT OF LUBRICANT ONCE A DAY PROVES EFFECTIVE FOR CHAIN PRESERVATION AND WILL NOT DRIP ONTO PRODUCTS DURING PRODUCTION. WE MANUFACTURE OTHER CONTINUOUS LUBRICATION SYSTEM, YET WE PROMOTE THIS SYSTEM FOR APPLICATIONS WHERE FREQUENT WASHDOWN AND LOWER TEMPERATURES PROMOTE CORROSION. MANUAL LUBRICATION OF CHAINS IS DANGEROUS AND RARELY CONSISTENT. WE CAN CUSTOM PROGRAM THIS UNIT TO COINCIDE WITH WASHDOWN AND MAINTENANCE SCHEDULES. THIS SYSTEM DOES NOT RUN DURING PRODUCTION AND WILL NOT ALLOW LUBRICANT TO CONTACT YOUR CONVEYED PRODUCT. FOR MORE INFORMATION ON OVERHEAD CHAIN LUBRICATION, PLEASE CONTACT OUR OFFICE.

DOES YOUR CHAIN LOOK LIKE THIS?

WATER-TIGHT ENCLOSURE AND CONDENSATE PROTECTION
