Re: Administrative Order Addendum #2  
Kennington Springs Pipeline Public Water System  
Docket No. SDWA-08-2011-0030  
PWS ID #WY5601199

Dear Ms. White:

This letter is the second addendum to the Administrative Order (Order) issued March 8, 2011, and amended on August 5, 2011, to Kennington Springs Pipeline, Inc. (Kennington). The purpose of this letter is to approve the December 19, 2012, plan and schedule from Ernie Eaton, Kennington's operator, in response to additional total coliform maximum contaminant level violations in August and September 2012. Clarifying details of the plan were obtained during telephone conversations on January 2<sup>nd</sup> and 15<sup>th</sup>, 2013, between Kathelene Brainich of EPA and Mr. Eaton.

Since Mark Baron, WYDEQ District Engineer, will require installation of continuous disinfection as a condition of issuing a permit to reconstruct the spring collection area, the two actions have been combined in this approved plan rather than separate triggered action as was submitted by Mr. Eaton. The plan and schedule shown below are hereby incorporated into the Order per paragraph 15 (page 3) of the Amended Order.

<u>Action</u>	<u>Completion Date</u>
Determine if there is a leak from the spring to the collection box (hire a leak detection company; repair leak(s) if found)	April 30, 2013
If no leaks are found OR if another sample is total coliform positive after leak detection is completed, reconstruct the spring collection area (estimates currently being obtained) AND install a chlorinator and continuously disinfect (bid for chlorinator already obtained)	within three weeks of leak detection completion or after next total coliform positive result (whichever soonest)

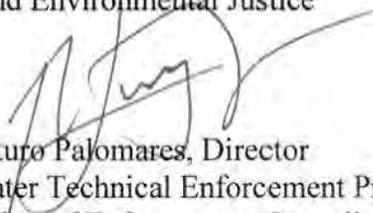

Please note that the EPA expects this approved schedule to be met. While not creating any right to an extension, the EPA in its discretion may consider granting an extension to compliance order deadlines under limited circumstances. If unexpected events occur that are beyond Kennington's control and that may require Kennington to request an extension of these deadlines, Kennington is responsible for notifying the EPA well in advance of the deadline dates. The EPA will not consider extending these deadlines without a clear justification for their need. Kennington must provide the following information in writing for any request for extensions: a description of the work that has been completed and the additional work that may not be completed by the deadline dates, the unexpected events that have occurred or may occur and how Kennington has attempted to foresee and use its best efforts to overcome these obstacles, and proposed new deadline dates with justification for the length of the proposed new deadlines.

Please contact Kathelene Brainich, Environmental Specialist, at (303) 312-6481 if you have any questions concerning this Addendum.

Sincerely,

James H. Eppers, Supervisory Attorney  
Legal Enforcement Program  
Office of Enforcement, Compliance  
and Environmental Justice

Arturo Palomares, Director  
Water Technical Enforcement Program
