HARRISBURG, PA

Sienna,

Sorry for the delay in answering the complaint. I cannot dispute the complaint as I feel that I was negligent in my duties in doing the water samples as required.

I had a manager that I felt was competent to do the samples. I filled out all the paper work for her and asked that she fill the jugs and mail them. She did not do as I requested. She still insists that she sent the samples for the third quarter, April thru June, but when I inquired at the lab in Billings they said they have not been received.

I have tried to remedy the issue by taking the water samples to Billings personally and will continue this as long as I own the business

In order to be able to afford to pay bills, I have been forced to gain employment outside of my own business as this is a very small community and cash flow is very limited. Being a small business in a very small community and with limited cash flow, I find that I am in a situation which I don't know how to deal with. As for the fine of \$1200.00, I find myself having the inability to pay, so I am requesting the necessary application to file for inability to pay.

I would also like to request a fair hearing regarding these issues.
If I need to write any thing else in regards to my defense please notify me as soon as possible.

Thank you,
Niki Smoker
