Docket No. CWA-07-2017-0028

FINDINGS OF VIOLATION AND
ADMINISTRATIVE ORDER FOR COMPLIANCE

STATUTORY AND REGULATORY AUTHORITY

1. The following Findings of Violation are made and Administrative Order for Compliance ("Order") issued pursuant to the authority of Section 309(a)(3) of the Clean Water Act ("CWA" or "Act"), 33 U.S.C. § 1319(a)(3). This authority has been delegated by the Administrator of the United States Environmental Protection Agency ("EPA") to the Regional Administrator, EPA, Region 7, and re-delegated to the Director of Region 7's Water, Wetlands and Pesticide Division.

2. Section 101(a) of the CWA, 33 U.S.C. § 1251(a), states that the objective of the CWA is to restore and maintain the chemical, physical, and biological integrity of the nation's waters.

3. Section 301(a) of the CWA, 33 U.S.C. § 1311(a), prohibits the discharge of any pollutant by any person except in compliance with, *inter alia*, a permit issued pursuant to Section 402 of the CWA, 33 U.S.C. § 1342.

4. Section 502(12) of the CWA, 33 U.S.C. § 1362(12), defines the terms "discharge of a pollutant" and "discharge of pollutants" as, *inter alia*, any addition of any pollutant to navigable waters from any point source.

5. Section 502(6) of the CWA, 33 U.S.C. § 1362(6), defines the term "pollutant" as, *inter alia*, biological materials and agriculture waste discharged to water.

6. Section 502(7) of the CWA, 33 U.S.C. § 1362(7), defines the term "navigable waters" as, *inter alia*, the "waters of the United States," as defined at 40 C.F.R. § 122.2.

7. Section 502(14) of the CWA, 33 U.S.C. § 1362(14), defines the term “point source” to include “any discernible, confined and discrete conveyance, including but not limited to any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, [or] concentrated animal feeding operation . . . from which pollutants are or may be discharged.”

8. Section 502(5) of the CWA, 33 U.S.C. § 1362(5), defines the term “person” as, *inter alia*, an individual, corporation, partnership, or association.

9. Section 402 of the CWA, 33 U.S.C. § 1342, provides that pollutants may be discharged only in accordance with the terms of a National Pollutant Discharge Elimination System (“NPDES”) permit issued pursuant to that section.

10. Pursuant to Section 402 of the CWA, 33 U.S.C. § 1342, EPA authorizes states to issue NPDES permits that, among other things, prescribe conditions whereby a discharge may be authorized and establish design, construction, operation and maintenance requirements for the permit holder.

11. To implement Section 402 of the CWA, EPA promulgated regulations codified at 40 C.F.R. Part 122.

12. Pursuant to 40 C.F.R. § 122.1, a NPDES permit is required for the discharge of “pollutants” from any “point source” into “waters of the United States,” as those terms are defined at 40 C.F.R. § 122.2.

13. Pursuant to 40 C.F.R. § 122.23(a), “concentrated animal feeding operations,” or “CAFOs,” are point sources subject to NPDES permitting requirements.

14. “Concentrated animal feeding operation” or “CAFO” is defined by 40 C.F.R. § 122.23(b)(2) as an animal feeding operation that is defined as a Large CAFO or Medium CAFO in accordance with 40 C.F.R. § 122.23(b).

15. “Animal feeding operation” or “AFO” is defined by 40 C.F.R. § 122.23(b)(1) as a lot or facility where animals have been, are, or will be stabled or confined and fed or maintained for a total of 45 days or more in any twelve-month period, and where crops, vegetative, forage growth, or post-harvest residues are not sustained in the normal growing season over any portion of the lot or facility.

16. “Medium CAFO” is defined, according to 40 C.F.R. § 122.23(b)(6), as an animal feeding operation that stables or confines “300 to 999 cattle other than mature dairy cows or veal calves” and where either of the following conditions are met:

- a. Pollutants are discharged into waters of the United States through a man-made ditch, flushing system, or other similar man-made device; or
- b. Pollutants are discharged directly into waters of the United States which originate outside of and pass over, across, or through the facility or otherwise come into direct contact with the animals confined in the operation.

17. "Waters of the United States" are defined in 40 C.F.R. § 122.2 to include intrastate rivers and streams, and tributaries thereto.

18. "Process wastewater" is defined by 40 C.F.R. § 122.23(b)(7) as water "directly or indirectly used in the operation of the AFO for any or all of the following: spillage or overflow from animal or poultry watering systems; washing, cleaning, or flushing pens, barns, manure pits, or other AFO facilities; direct contact swimming, washing, or spray cooling of animals; or dust control. Process wastewater also includes any water which comes into contact with any raw materials, products, or byproducts including manure, litter, feed, milk, eggs or bedding."

19. "Production area" is defined by 40 C.F.R. K 122.23 as that part of an AFO that includes the animal confinement area, the manure storage area, the raw materials storage areas, and the waste containment areas. The animal confinement area includes, but is not limited to, open lots, housed lots, feedlots, confinement houses, stall barns, free stall barns, milkrooms, milking centers, cowyards, barnyards, medication pens, walkers, animal walkways, and stables. The manure storage area includes, but is not limited to, lagoons, runoff ponds, storage sheds, stockpiles, under house or pit storages, liquid impoundments, static piles, and composting piles. The raw materials storage area includes, but is not limited to, feed silos, silage bunkers, and bedding materials. The waste containment area includes, but is not limited to, settling basins, and areas within berms and diversions which separate uncontaminated storm water. Also included in the definition of production area is any egg washing or egg processing facility, and any area used in the storage, handling, treatment, or disposal of mortalities.

20. The Iowa Department of Natural Resources ("IDNR") is the state agency authorized to administer the federal NPDES program in the state of Iowa pursuant to Section 402 of the CWA, 33 U.S.C. § 1342. EPA maintains concurrent enforcement authority with authorized states for violations of the CWA.

FACTUAL BACKGROUND AND FINDINGS OF VIOLATION

21. Ronald Fricke ("Respondent"), doing business as Ronald Fricke Livestock, owns or operates an animal feeding operation that is located at: Southwest Quarter of the Southeast Quarter of Section 6 of Township 84 North, Range 34 West, in Carroll, County, Iowa, more commonly known as: 22757 170th Street, Carroll, Carroll County, Iowa 51401 ("the Facility").

22. Respondent is and, at all times referred to herein, was doing business in the State of Iowa.

23. Respondent is and, at all times referred to herein, was a “person” as defined by Section 502(5) of the CWA, 33 U.S.C. § 1362(5).

24. On or about September 20, 2016, a representative of the EPA conducted a compliance evaluation inspection at the Facility (the “inspection”). The inspection was conducted under the authority of Section 308 of the CWA, 33 U.S.C. § 1318, to evaluate Respondent’s compliance with the requirements of the CWA and the federal regulations promulgated thereunder. A copy of the inspection report was mailed to Respondent on December 21, 2016.

25. At all times relevant to the allegations herein, the Facility stabled or confined and fed or maintained animals for a total 45 days or more in any twelve (12) month period.

26. At all times relevant to the allegations herein, neither crops, vegetation, forage growth, nor post-harvest residues were sustained over any portion of the Facility’s confinement areas.

27. At all times relevant to the allegations herein, the Facility was an “animal feeding operation” or “AFO” as defined by 40 C.F.R. § 122.23(b)(1).

28. At all times relevant to the allegations herein, the Facility stabled or confined at least 300 head of cattle for a total of 45 days or more in any twelve (12) month period.

29. Observations made during the inspection revealed that the Facility lacks adequate engineered livestock waste control facilities to prevent discharges of manure and process wastewater.

30. Manure and process wastewater discharged from the Facility are “pollutants” as defined by Section 502(6) of the CWA, 33 U.S.C. § 1362(6).

31. Observations made during the inspection revealed that a culvert and a tile inlet facilitate the discharge of pollutants from production areas of the Facility into Storm Creek and its tributaries. The culvert and tile inlet are man-made ditches, flushing systems, or other similar man-made devices.

32. Storm Creek and its tributaries are “waters of the United States” within the meaning of 40 C.F.R. § 122.2 and, therefore, “navigable waters” pursuant to Section 502(7) of the CWA, 33 U.S.C. § 1362(7).

33. The Facility is a "Medium CAFO" as defined by 40 C.F.R. § 122.23(b)(6).
34. The Facility is a "concentrated animal feeding operation" or "CAFO" as defined by 40 C.F.R. § 122.23(b)(2).
35. The Facility is a "point source" as defined by 40 C.F.R. § 122.23(a) and Section 502(14) of the CWA, 33 U.S.C. § 1362(14).
36. At the time of the inspection, Respondent did not have a NPDES permit authorizing the discharge of pollutants from the Facility.
37. Analysis of samples obtained by the EPA inspector during the inspection document that Facility-related pollutants discharge into Storm Creek and its tributaries.
38. Based on the size of the Facility, the presence of a culvert and tile inlet that facilitate pollutant discharges, and the proximity of the Facility to Storm Creek and its tributaries, pollutants from production areas at the Facility will continue to flow intermittently into Storm Creek and its tributaries as a result of significant precipitation events.
39. The intermittent but continuing flow of process wastewater from the Facility to Storm Creek and its tributaries constitute unauthorized discharges of pollutants from a point source to waters of the United States. These discharges violate Section 301 of the CWA, 33 U.S.C. § 1311, and implementing regulations.

ORDER FOR COMPLIANCE

40. Based on the Findings of Violation set forth above, and pursuant to Section 309(a)(3) of the CWA, 33 U.S.C. § 1319(a)(3), Respondent is hereby ORDERED to take the following actions to eliminate violations of the CWA:
41. Respondent shall comply with the CWA and cease all discharges of pollutants from the Facility into the waters of the United States, unless authorized by a NPDES permit.
42. Within one hundred eighty (180) days of the Effective Date of this Order, Respondent shall reduce the number of cattle confined at the Facility below the Medium CAFO regulatory threshold of 300 head of beef cattle, unless:
- a. the Facility can be managed in a manner that permanently prevents the discharge of pollutants into waters of the United States through a man-made ditch, flushing system, or other similar man-made device; or
 - b. Respondent applies for a NPDES permit that authorizes pollutant discharges to waters of the United States.

43. If Respondent cannot immediately cease all discharges from the Facility into waters of the United States, regardless of whether the number of livestock is reduced below regulatory thresholds, then Respondent shall immediately remove and properly dispose of manure, litter, and process wastewater from areas that cannot be controlled in a manner to prevent discharges.

44. Within thirty (30) days of the Effective Date of this Order, Respondent shall inform EPA in writing of all actions that Respondent has taken or will take to comply with the CWA and terms of this Order.

45. If Respondent intends to apply for a NPDES permit that authorizes the discharge of pollutants, then upon issuance of that permit Respondent shall comply with all terms contained therein.

46. If Respondent intends to construct runoff control structures that enable confinement of beef cattle above regulatory thresholds, then Respondent shall submit written monthly progress reports to EPA beginning within sixty (60) days of the Effective Date of this Order and continuing monthly on the seventh (7th) day of each month until Respondent submits a Notice of Construction Completion to EPA. The monthly reports shall describe in detail the construction and related activities that occurred at the Facility during the reporting period, construction and related activities anticipated during the upcoming reporting period, and a description of any problems encountered or anticipated and how these problems were or will be addressed.

47. Upon completion of runoff control structures, Respondent shall submit to EPA a Notice of Construction Completion certified by a professional engineer within thirty (30) days of the completion of construction. The notification shall be in writing and shall include as-built drawings of the constructed improvements.

Opportunity to Confer

48. The Effective Date of this Order shall be thirty (30) days following Respondent's receipt of the Order. The terms of this Order shall become effective and enforceable against Respondent upon the Effective Date.

49. Prior to the Effective Date, Respondent has the opportunity to confer with and/or submit information to EPA concerning the validity of this Order, including the basis for the Order, the terms of the Order, and the applicability of the Order to Respondent. Within ten (10) days of receiving this Order, Respondent may request a conference regarding the Order or submit information to EPA. If Respondent requests a conference and/or wishes to submit information, the conference and/or submission of information shall occur within twenty (20)

days of receipt of this Order. EPA will deem a failure to request a conference or to submit information as a waiver of the opportunity to confer.

50. Requests for a conference shall be made in writing to the EPA contact identified herein.

Effect of Order

51. This Order shall not constitute a permit under the CWA. Compliance with the terms of this Order shall not relieve Respondent of its responsibility to obtain any required local, state, and/or federal permits. Respondent has the right to seek immediate federal judicial review of the Order pursuant to Chapter 7 of the Administrative Procedure Act, 5 U.S.C. §§ 701-706. Section 706 provides the grounds for such review and is available online at <https://www.gpo.gov/fdsys/pkg/USCODE-2010-title5/pdf/USCODE-2010-title5-partI-chap7-sec706.pdf>.

52. Compliance with the terms of this Order shall neither relieve Respondent of liability for any violations of the CWA nor preclude EPA from initiating an administrative or civil judicial enforcement action to recover penalties or seek additional injunctive relief pursuant to Section 309 of the CWA, 42 U.S.C. § 1319, for such violations.

53. Nothing in this Order shall limit EPA's right to obtain access to and/or inspect the Facility and/or to request additional information from Respondent pursuant to the authority of Section 308 of the CWA, 33 U.S.C. § 1318.

54. EPA may subsequently amend this Order in accordance with the authority of the CWA. For example, EPA may amend this Order to address any noncompliance with the CWA, including, but not limited to, any noncompliance with the requirements of Section 402 of the CWA. In the event of any such subsequent amendment to this Order, all requirements for performance of this Order not affected by the amendment shall remain as specified by this original Order.

55. If any provision or authority of this Order or the application of this Order to Respondent is held by federal judicial authority to be invalid, the application to Respondent of the remainder of this Order shall remain in full force and effect and shall not be affected by such a holding.

56. All submissions to EPA required by this Order shall be sent to:

Donald Hamera
Water Enforcement Branch

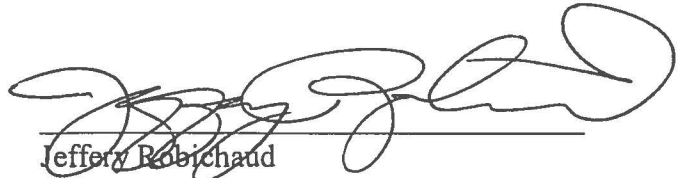

Water, Wetlands and Pesticides Division
U.S. Environmental Protection Agency, Region 7
11201 Renner Boulevard
Lenexa, Kansas 66219
hamera.donald@epa.gov

57. Pursuant to 40 C.F.R. §§ 2.201-2.311, Respondent may assert a business confidentiality claim covering any portion of the information submitted that is entitled to confidential treatment and which is not effluent data. For any such claim, Respondent must describe the basis for the claim under the applicable regulation. Any material for which business confidentiality is claimed should be placed in a separately enclosed envelope labeled "Confidential Business Information." Failure to assert a claim in the manner described in 40 C.F.R. § 2.203(b) allows EPA to release the submitted information to the public without further notice. EPA may disclose information subject to the business confidentiality claim only to the extent set forth in the above-cited regulations. Special rules governing information obtained under the Clean Water Act appear in 40 C.F.R. § 2.302.

58. Notice is hereby given that violation of, or failure to comply with, any of the provisions of the foregoing Order may subject Respondent to civil penalties of up to \$20,628 per day for each violation, pursuant to Section 309(d) of the CWA, 33 U.S.C. § 1319(d), and 40 C.F.R. Part 19; or civil action in federal district court for injunctive relief, pursuant to Section 309(b) of the CWA, 33 U.S.C. § 1319(b).
