Re: DuPont Toledo Plant
Administrative Order on Consent under 3008(h) of RCRA
EPA ID # OHD 005 041 843
U.S. EPA Docket # *RCRA-05-2008-0010 20.*

Dear Ms. Angelo:

I am enclosing a fully executed copy of the 3008(h) Administrative Order on Consent covering the corrective action work at the DuPont Toledo Plant. The agreement is effective immediately.

In accordance with Paragraph V of the agreement, I am hereby designating Christopher Black as the U.S. EPA project manager for this project. We look forward to working closely together to make sure that all of the work will be completed by the deadlines contained in the agreement.

If you have any questions, please contact Mr. Black at (312) 886-1451.

Sincerely,

A handwritten signature in black ink that reads "George J. Hamper".

George J. Hamper
Chief

Corrective Action Section 2
Remediation and Reuse Branch
Land and Chemicals Division

Enclosure

**UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION 5**

In the Matter of:)	ADMINISTRATIVE ORDER
)	ON CONSENT
DuPont Toledo Plant)	
1930 Tremainsville Road)	U.S. EPA Docket No. <u>RCRA-05-2008-0010²⁰</u>
Toledo, Ohio 43697)	
)	
U.S. EPA ID#: OHD005041843)	Proceeding under Section 3008(h) of the
)	Resource Conservation and Recovery Act,
Respondent.)	as amended, 42 U.S.C. § 6928(h)

I. JURISDICTION

1. The Administrator of the United States Environmental Protection Agency (U.S. EPA) is issuing this Administrative Order on Consent ("Order") to E.I. du Pont de Nemours & Co (DuPont) under Section 3008(h) of the Solid Waste Disposal Act, commonly referred to as the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. § 6928(h). The Administrator has delegated the authority to issue orders under Section 3008(h) of RCRA to the Chief, Remediation and Reuse Branch, Land and Chemicals Division, U.S. EPA, Region 5.

2. DuPont currently operates a resin manufacturing facility located at 1930 Tremainsville Road, Toledo, Ohio (the "Facility"). DuPont has operated at the Facility since 1934. DuPont historically manufactured acrylic resins and surface coatings, and currently manufactures acrylic resins at the Facility.

3. DuPont agrees not to contest U.S. EPA's jurisdiction to issue this Order, to enforce its terms, or to impose sanctions for violations of the Order.

4. DuPont waives any right to request a hearing on this matter pursuant to Section 3008(b) of RCRA, 42 U.S.C § 6828(b), and 40 C.F.R. Part 24, and consents to the issuance of this Order without a hearing under Section 3008(b) of RCRA as a Consent Order issued pursuant to Section 3008(h) of RCRA.

II. DEFINITIONS

5. This Order incorporates the definitions in RCRA, 42 U.S.C. § 6903, and the regulations promulgated under RCRA unless otherwise specified.

III. PARTIES BOUND

6. This Order applies to and binds U.S. EPA, DuPont and its agents, successors, assignees, trustees, receivers, and all persons acting for or on behalf of DuPont. DuPont will be responsible for and liable for any violations of this Order, regardless of DuPont's use of employees, agents, contractors, or consultants to perform work required by this Order. To the extent that DuPont uses employees, agents, contractors or consultants to perform work required by this Order, DuPont shall inform such persons of the contents of this Order.

7. No change in ownership or corporate or partnership status relating to the Facility will alter DuPont's obligations under this Order. Any conveyance of title, easement, or other interest in the Facility, or a portion of the Facility, will not affect DuPont's obligations under this Order. DuPont will give written notice of this Order to any successor in interest prior to transferring ownership or operation of the Facility or a portion thereof and will notify U.S. EPA in writing within fourteen (14) days of the transfer. This written notice will describe how DuPont has assured that, despite the transfer, all institutional controls required now or in the future for the Facility will be implemented and maintained. This paragraph will not apply if U.S. EPA and DuPont agree that this Order has terminated as to the Facility or any relevant portion of the Facility.

IV. DETERMINATIONS

8. After consideration of the Administrative Record, the Division Director, Land and Chemicals Division, U.S. EPA, Region 5 has made the following conclusions of law and determinations:

- a. DuPont is a "person" within the meaning of Section 1004(15) of RCRA.
- b. DuPont is the owner or operator of a facility that has operated under interim status subject to Section 3005(e) of RCRA.
- c. Certain wastes and constituents found at the Facility are hazardous wastes and/or hazardous constituents pursuant to Sections 1004(5) and 3001 of RCRA, and 40 C.F.R. Part 261.
- d. There is or has been a release of hazardous wastes or hazardous constituents into the environment from the Facility.
- e. The actions required by this Order are necessary in order to protect human health or the environment.
- f. U.S. EPA has determined, in its sole discretion, that DuPont is a responsible entity with sufficient technical ability and resources to proceed on an expedited basis under an Order on Consent for the work described herein.

V. PROJECT MANAGER

9. U.S. EPA and DuPont must each designate a Project Manager and notify each other in writing of the Project Manager selected within fourteen (14) days of the effective date of this Order. To the extent practicable, all communications between U.S. EPA and DuPont, and all documents, reports, approvals, and other correspondence concerning the activities undertaken pursuant to this Agreement, shall be directed through the Project Managers. Each Project Manager will be responsible for overseeing the implementation of this Project. The parties must provide prompt written notice whenever they change Project Managers.

VI. WORK TO BE PERFORMED

10. Pursuant to Section 3008(h) of RCRA, DuPont agrees to and is hereby ordered to perform the actions specified in this section (Work to be Performed), in the manner and by the dates specified here. DuPont represents that it has the technical and financial ability to carry out an investigation and corrective action at the Facility. DuPont must perform the work undertaken pursuant to this Order in compliance with RCRA and other applicable federal and state laws and their implementing regulations, and consistent with all relevant U.S. EPA guidance documents as appropriate to the Facility. This guidance includes, but is not limited to, the Documentation of Environmental Indicator Determination Guidance, and relevant portions of the Model Scopes of Work for RCRA Corrective Action and various U.S. EPA risk assessment guidances.

11. DuPont will complete activities necessary to identify and define the nature and extent of releases of hazardous waste and/or hazardous constituents at or from the Facility. This includes:

- a. Historical Data/Facility Condition. Prior to the date of this Order, a Final Preliminary Review/Visual Site Inspection Report (the "Report") dated March 1990, was performed by A.T. Kearney, Inc., and identified 63 Solid Waste Management Units (SWMUs) and two Areas of Concern (AOCs) of hazardous waste and hazardous constituents at the Facility. Within thirty (30) days after the effective date of this Order, DuPont shall provide to U.S. EPA copies of all other reports available to DuPont that provide information on current and historic site conditions, including SWMUs and AOCs, and the results of prior Facility investigation activities.
- b. Current Conditions Report. Provide to U.S. EPA, within 60 days after the effective date of this Order, a brief Current Conditions Report that includes any recent sampling data from the Facility and a summary of the historic operations and physical setting of the Facility. The Current Conditions Report will describe, at a minimum, conditions at all locations specified in the report "Preliminary Assessment/Visual Inspection Report" for the Facility and any other past or present locations at the Facility for which DuPont knows of past treatment, storage, or disposal of hazardous waste or hazardous constituents.
- c. Environmental Indicator Reporting. DuPont will perform an investigation to identify the nature and extent of any releases of hazardous waste and/or hazardous

constituents at or from the Facility which may pose an unacceptable risk to human health and the environment and provide a report (“Environmental Indicators Report”) to U.S. EPA. The report must also describe the nature and extent of any releases of hazardous waste and/or hazardous constituents at or from the Facility which do not pose an unacceptable risk to human health and the environment, and provide the basis for those conclusions, including an evaluation of the risks. DuPont may prepare and submit the report in phases to provide timely support for the demonstrations described in paragraph 13, below, and for the determinations and proposal described in paragraph 15, below.

U.S. EPA may require DuPont to perform additional investigative measures if U.S. EPA concludes that such measures are required for a full assessment of the conditions at the Facility. The Environmental Indicator Report shall be submitted on or before December 31, 2009.

12. DuPont may proceed with interim actions to limit site investigation or risk assessment activities to complete the work as defined in paragraphs 13 through 15, below.

13. DuPont will demonstrate by the date required in paragraph 11(c), above, through submitting an Environmental Indicators Report and by performing any other necessary activities, consistent with this Section, that:

- a. All current human exposures to contamination at or from the Facility are under control, except to the extent that DuPont establishes that such contamination originates from some place other than the Facility as a result of off-site migration. That is, significant or unacceptable exposures do not exist for all media known or reasonably suspected to be contaminated with hazardous wastes or hazardous constituents above risk-based levels, for which there are complete pathways between contamination and human receptors.
- b. Migration of contaminated groundwater at or from the Facility is stabilized, except to the extent that DuPont establishes that such contamination originates from some place other than the Facility as a result of off-site migration. That is, the migration of all groundwater known or reasonably suspected to be contaminated with hazardous wastes or hazardous constituents above acceptable levels is stabilized to remain within any existing areas of contamination as defined by monitoring locations designated at the time of the demonstration. In addition, any discharge of groundwater to surface water is either insignificant or shown to be currently acceptable according to an appropriate interim assessment. DuPont will collect monitoring and measurement data in the future as necessary to verify that migration of any contaminated groundwater is stabilized.

14. To prepare for and provide the demonstrations required by paragraph 13, above, DuPont will:

- a. Determine appropriate risk screening criteria under current use scenarios and provide the basis and justification for the use of these criteria.

- b. Determine any current unacceptable risks to human health and the environment and describe why other identified risks are acceptable.
- c. Control any unacceptable current human exposures that are identified. This may include performing any corrective actions or other response measures (“Corrective Measures”) necessary to control current human exposures to contamination to within acceptable risk levels.
- d. Stabilize the migration of contaminated groundwater. This may include implementing any Corrective Measures necessary to stabilize the migration of contaminated groundwater.
- e. Conduct groundwater monitoring to identify the migration of contaminated groundwater and to confirm that any contaminated groundwater remains within the original area of contamination.
- f. Prepare a report, either prior to or as part of the Environmental Indicators Report, that describes and justifies any interim actions performed pursuant to paragraph 12, above, to meet the requirements of this Section, including sampling documentation, construction completion documentation and/or confirmatory sampling results.

15. DuPont will propose to U.S. EPA within 180 days of U.S. EPA approval of the reports required by paragraphs 13 and 14, above, final Corrective Measures necessary to protect human health and the environment from all current and future unacceptable risks due to releases of hazardous waste or hazardous constituents at or from the Facility, except to the extent DuPont establishes that such contamination originated from some place other than the Facility as a result of off-site migration, (the “Final Corrective Measures Proposal”). The proposal will describe all Corrective Measures implemented at the Facility since the effective date of this Order. It will also include a description of all other Corrective Measures evaluated by DuPont, a detailed explanation of why the proposed final Corrective Measures are preferred by DuPont, and cost estimates for all Corrective Measures evaluated. The proposal will also include a detailed schedule for construction and implementation of the final Corrective Measures, and for submittal of a Final Remedy Construction Completion Report. This schedule will provide for initiation of as much of the initial construction work as practicable within one year after U.S. EPA selects the final Corrective Measures and completion of all final Corrective Measures within a reasonable period of time such that human health and the environment are protected.

16. As part of the development of its proposal, DuPont will propose appropriate risk screening criteria, cleanup objectives, and points of compliance under current and reasonably expected future land use scenarios and provide the basis and justification for these decisions.

17. U.S. EPA may request supplemental information from DuPont if it determines that the proposal and supporting information do not provide an adequate basis for selection of final Corrective Measures that will protect human health and the environment from the release of hazardous waste and hazardous constituents at or from the Facility. DuPont will provide such supplemental information in a timely manner as reasonably directed in writing by U.S. EPA.

18. U.S. EPA will provide the public with an opportunity to review and comment on its proposed final Corrective Measures, including a detailed description and justification for the proposal (the "Statement of Basis"). Following the public comment period, U.S. EPA will select the final Corrective Measures to be implemented by DuPont, and provide notification of its decision and rationale in a "Final Decision and Response to Comments" (the "Final Decision").

19. Upon notice by U.S. EPA, DuPont will implement the final Corrective Measures selected in U.S. EPA's Final Decision in accordance with the schedule therein, subject to Section XI – Dispute Resolution.

20. Reporting and other requirements:

- a. DuPont will establish a publicly accessible repository for final approved documents regarding site activities, and shall develop and submit by December 31, 2009, a plan for U.S. EPA review and approval for public outreach and involvement activities.
- b. DuPont will provide quarterly progress reports to U.S. EPA by the fifteenth day of the month after the end of each quarter, provided, however, that the first such quarterly report shall not be due before December 31, 2008. The report must list work performed to date, data collected, problems encountered, project schedule, and percent project completed.
- c. The parties will communicate frequently and in good faith to assure successful completion of the requirements of this Order, and will meet on at least a semi-annual basis to discuss the work proposed and performed under this Order.
- d. DuPont will provide a Final Remedy Construction Completion Report documenting all work DuPont has performed pursuant to the schedule in U.S. EPA's Final Decision selecting the final Corrective Measures.
- e. If ongoing monitoring or operation and maintenance is required after construction of the selected final Corrective Measures, DuPont will include an operations and maintenance plan in the Final Remedy Construction Completion Report. DuPont will revise and resubmit the Report in response to U.S. EPA's written comments, if any, by the due dates specified by U.S. EPA. Upon U.S. EPA's written approval, DuPont will implement the approved operation and maintenance plan in accordance with the schedule and provisions contained therein.
- f. Any risk assessments conducted by DuPont must estimate human health and ecological risk under reasonable maximum exposure for both current and reasonably expected future land use scenarios. Risk assessments will be conducted in accordance with the Risk Assessment Guidance for Superfund (RAGS) or other appropriate U.S. EPA guidance. DuPont will utilize appropriate, conservative screening values when screening to determine whether

further investigation is required. Appropriate screening values include those derived from Federal Maximum Contaminant Levels (MCL), U.S. EPA, Region 9 Preliminary Remediation Goals (PRG), U.S. EPA, Region 5 Ecological Screening Levels (ESL formerly known as EDQL), U.S. EPA, Region 5 Risk Based Screening Levels (RBSL), or RAGS.

- g. All sampling and analysis conducted under this Order will be performed in accordance with the Region 5 RCRA Quality Assurance Project Plan (QAPP) Policy (April 1998) as appropriate for the Facility, and be sufficient to identify and characterize the nature and extent of all releases as required by this Order. U.S. EPA reserves the right to audit laboratories selected by DuPont or to require DuPont to purchase and have analyzed any Performance Evaluation (PE) samples selected by U.S. EPA which are compounds of concern. DuPont will notify U.S. EPA in writing at least fourteen (14) days before beginning each separate phase of field work performed under this Order. At the request of U.S. EPA, DuPont will provide or allow U.S. EPA or its authorized representative to take split or duplicate samples of all samples collected by DuPont pursuant to this Order.

21. Project Managers can agree in writing to extend, for ninety (90) days or less, any deadline in this Section VI. However, extensions of greater than ninety (90) days require obtaining approval from the Chief of the Remediation and Reuse Branch, Land and Chemicals Division.

VII. ACCESS

22. Upon reasonable notice, and at reasonable times, U.S. EPA, its contractors, employees, and any designated U.S. EPA representatives may enter and freely move about the Facility pursuant to this Order, respecting Dupont's reasonable and appropriate safety and security procedures to, among other things: interview Facility personnel and contractors in the presence of a DuPont representative; review DuPont's progress in carrying out the terms of this Order; conduct tests, sampling, or monitoring as U.S. EPA deems necessary; use a camera, sound recording, or other documentary equipment; and verify the reports and data DuPont submits to U.S. EPA. DuPont will permit such persons to inspect and copy all non-privileged records, files, photographs, and documents, including all sampling and monitoring data that pertain to work undertaken under this Order and that are within the possession or under the control of DuPont or its contractors or consultants. U.S. EPA will permit DuPont to take split samples during any sampling events conducted by U.S. EPA.

23. To the extent that work being performed pursuant to this Order must be done beyond the Facility property boundary, DuPont will use good faith efforts to obtain access agreements necessary to complete work required by this Order from the present owner(s) of such property within thirty (30) days of the date that the need for access becomes known to DuPont. Any such access agreement will provide for access by U.S. EPA and its representatives. DuPont will submit a copy of any access agreement to U.S. EPA's Project Manager. In the event that agreements for access are not obtained within thirty (30) days, DuPont will notify U.S. EPA in writing within fourteen (14) days thereafter of both the efforts undertaken to obtain access and

the failure to obtain access agreements. U.S. EPA may, at its discretion, assist DuPont in obtaining access to such properties.

24. Nothing in this Section limits or otherwise affects U.S. EPA's right of access and entry under applicable law, including RCRA and the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. §§ 9601-9675.

VIII. COST ESTIMATES AND ASSURANCES OF FINANCIAL RESPONSIBILITY FOR COMPLETING THE WORK

25. Estimated Cost of the Work.

- a. Within thirty (30) days after U.S. EPA issues the Final Decision as described in paragraph 18 above, DuPont shall submit to U.S. EPA for approval detailed written estimates, in current dollars, of the estimated cost of all Work to be Performed under Section VI of this Order (Cost Estimate), including the final Corrective Measures. The Cost Estimate must account for the costs of all remaining long term care work in addition to all remaining construction work.
- b. DuPont shall annually adjust the Cost Estimate for inflation and for changes in the scope of the Work to be Performed, within sixty (60) days prior to the anniversary date of the establishment of the financial assurance instrument(s), until the work required by this Order is completed. DuPont shall submit each annual Cost Estimate to U.S. EPA for review.

26. Assurances of Financial Responsibility for Completing the Work

- a. Within forty-five (45) days after U.S. EPA approves the initial Cost Estimate (the "Financial Assurances Due Date"), DuPont shall establish and maintain financial assurance for the benefit of the U.S. EPA in the amount of the most recent Cost Estimate, even if U.S. EPA has not yet approved the Cost Estimate. However, U.S. EPA may request in writing that DuPont establish and maintain the financial assurance in the amount of the draft initial Cost Estimate prior to final approval. DuPont may use one or more of the financial assurance forms described in subparagraphs i - vi below. Any and all financial assurance instruments or mechanisms provided pursuant to subparagraphs i - v below, shall be submitted to U.S. EPA for review and approval in draft form at least thirty (30) days before the date they are required to be finalized and shall be satisfactory in form and substance as determined by U.S. EPA.
 - i. A trust fund established for the benefit of U.S. EPA, administered by a trustee;
 - ii. A surety bond unconditionally guaranteeing performance of the Work to be Performed in accordance with this Order, or guaranteeing payment at the direction of U.S. EPA into a standby trust fund that meets the requirements of the trust fund in subparagraph i above;

- iii. An irrevocable letter of credit, payable at the direction of the Director, Land and Chemicals Division, into a standby trust fund that meets the requirements of the trust fund in subparagraph i above;
- iv. An insurance policy that provides U.S. EPA with rights as a beneficiary, issued for a face amount at least equal to the current Cost Estimate, except where costs not covered by the insurance policy are covered by another financial assurance instrument;
- v. A corporate guarantee, executed in favor of the U.S. EPA by one or more of the following: (1) a direct or indirect parent company, or (2) a company that has a "substantial business relationship" with DuPont [as defined in 40 C.F.R. § 264.141(h)], to perform the Work to be Performed under Section VI of this Order or to establish a trust fund as permitted by subparagraph i above; provided, however, that any company providing such a guarantee shall demonstrate to the satisfaction of the U.S. EPA that it satisfies the financial test requirements of 40 C.F.R. § 264.143(f) with respect to the portion of the Cost Estimate that it proposes to guarantee; or
- vi. A demonstration by DuPont that it meets the financial test criteria of 40 C.F.R. § 264.143(f) with respect to the Cost Estimate, provided that all other requirements of 40 C.F.R. § 264.143(f) are satisfied. To the extent DuPont intends to provide financial assurance through this mechanism, it must provide all documentation required under 40 C.F.R. § 264.143(f) prior to the Financial Assurances Due Date.

DuPont shall submit all executed and/or otherwise finalized instruments or other documents to Project Officer Chris Black, within thirty (30) days after the date they are required to be finalized pursuant to paragraph 26(a), 26(f) or 27 (b) of this Section. DuPont shall also provide copies to:

Chris Black, Project Manager (LU-9J)
Land and Chemicals Division
U.S. EPA, Region 5
77 West Jackson Blvd.
Chicago, IL 60604

- b. If at any time DuPont provides financial assurance for completion of the Work to be Performed by means of a corporate guarantee or financial test, DuPont shall also comply with the other relevant requirements of 40 C.F.R. § 264.143(f), 40 C.F.R. § 264.151(f), and 40 C.F.R. § 264.151(h)(1) relating to these methods, and will promptly provide any additional information requested by U.S. EPA from DuPont or corporate guarantor at any time.
- c. For purposes of the corporate guarantee or the financial test described above, references in 40 C.F.R. § 264.143(f) to "the sum of current closure and post-

closure costs and the current plugging and abandonment cost estimates” shall mean “the sum of all environmental remediation obligations” (including obligations under CERCLA, RCRA, UIC, TSCA and any other state or tribal environmental obligation) guaranteed by such company or for which such company is otherwise financially obligated in addition to the Cost Estimate.

- d. DuPont may combine more than one mechanism to demonstrate financial assurance for the Work to be Performed under this Order.
 - e. DuPont may satisfy its obligation to provide financial assurance for the Work to be Performed by providing a third party who assumes full responsibility for the Work to be Performed and otherwise satisfies the obligations of the financial assurance requirements of this Order; however, DuPont shall remain responsible for providing financial assurance in the event such third party fails to do so and any financial assurance from a third party shall be in one of the forms provided in subparagraphs 26(a)(i) through 26(a)(iv) above.
 - f. If at any time U.S. EPA determines that a Cost Estimate or a financial assurance mechanism provided pursuant to this Section is inadequate, U.S. EPA shall notify DuPont in writing. If at any time DuPont becomes aware of information indicating that any Cost Estimate(s) or financial assurance mechanism(s) provided pursuant to this Section is inadequate, DuPont shall notify U.S. EPA in writing of such information within ten days. Within thirty (30) days of receipt of notice of U.S. EPA's determination, or within thirty (30) days of DuPont's becoming aware of such information, DuPont shall obtain and present to U.S. EPA for approval a proposal for a revised Cost Estimate or a revised or alternative form of financial assurance listed in paragraph a. above that satisfies all requirements set forth in this Section. Within ten (10) days of U.S. EPA's approval of a revised financial assurance mechanism, DuPont shall execute or otherwise finalize all instruments or other documents required to make the financial assurance mechanisms legally binding.
 - g. DuPont's inability or failure to establish or maintain financial assurance for completion of the Work to be Performed shall in no way excuse performance of any other requirements of this Order.
27. **Modification of Amount and/or Form of Performance Guarantee**
- a. Reduction of Amount of Financial Assurance. If DuPont believes that the Cost Estimate has diminished below the amount covered by the existing financial assurance provided under this Order, DuPont may, at the same time that DuPont submits its annual Cost Estimate, submit a written proposal to U.S. EPA for approval to reduce the amount of the financial assurance to equal the revised Cost Estimate.
 - b. Change of Form of Financial Assurance. If DuPont desires to change the form or terms of financial assurance, DuPont may, at the same time that DuPont submits

the annual Cost Estimate, submit a written proposal to U.S. EPA for approval to change the form of financial assurance. The written proposal shall specify all proposed instruments or other documents required in order to make the proposed financial assurance legally binding and shall satisfy all requirements set forth in this Section. Within ten (10) days after receiving written approval of the proposed revised or alternative financial assurance, DuPont shall execute and/or otherwise finalize all instruments or other documents required in order to make the selected financial assurance legally binding. DuPont shall submit all executed and/or otherwise finalized instruments or other documents required in order to make the selected financial assurance legally binding to U.S. EPA with a copy to U.S. EPA's Project Manager, as provided in Section 26(a)(vi), above.

- c. Release of Financial Assurance. DuPont may submit a written request to the Director, Land and Chemicals Division that U.S. EPA release DuPont from the requirement to maintain financial assurance under this Section once U.S. EPA and DuPont have both executed an "Acknowledgment of Termination and Agreement to Record Preservation and Reservation of Right" pursuant to Section XVIII (Termination and Satisfaction) of the Order. The Director, Land and Chemicals Division, shall notify both the DuPont and the provider(s) of the financial assurance that DuPont is released from all financial assurance obligations under this Order.

28. Performance Failure

- a. If U.S. EPA determines that DuPont (i) has ceased implementing any portion of the Work, (ii) is significantly or repeatedly deficient or late in its performance of the Work, or (iii) is implementing the Work in a manner that may cause an endangerment to human health or the environment, U.S. EPA may issue a written notice ("Performance Failure Notice") to both DuPont and the financial assurance provider of DuPont's failure to perform. The notice issued by U.S. EPA will specify the grounds upon which such a notice was issued and will provide DuPont with a period of twenty (20) days within which to remedy the circumstances giving rise to the issuance of such notice.
- b. Failure by DuPont to remedy the relevant Performance Failure to U.S. EPA's satisfaction before the expiration of the twenty-day notice period specified in paragraph 28.a shall trigger U.S. EPA's right to have immediate access to and benefit of the financial assurance provided pursuant to subparagraphs 26.a.i, 26.a.ii, 26.a.iii, 26.a.iv, or 26.a.v. If U.S. EPA is unable after reasonable efforts to secure payment of funds or performance of work from the financial assurance provider, then upon written notice from U.S. EPA, DuPont shall within twenty (20) days deposit into a trust fund approved by U.S. EPA, a cash amount equal to the Cost Estimate.

IX. RECORD PRESERVATION

29. DuPont will retain, during the pendency of this Order and for a minimum of six (6) years

after the Order terminates, all data and all final documents now in its possession or control or which come into its possession or control which relate in any way to this Order. DuPont will notify U.S. EPA in writing ninety (90) days prior to the destruction of any such records, and provide U.S. EPA with the opportunity to take possession of such non-privileged documents. DuPont's notice will refer to the effective date, caption, and docket number of this Order and will be addressed to:

Director, LCD (L-8J)
U.S. EPA, Region 5
77 W. Jackson Blvd.
Chicago, IL 60604

DuPont will also promptly provide a copy of any such notification to U.S. EPA's Project Manager.

30. DuPont further agrees that within thirty (30) days of retaining or employing any agent, consultant, or contractor ("Agents") for the purpose of carrying out the terms of this Order, DuPont will enter into an agreement with any such Agents whereby such Agents will be required to give DuPont a copy of all data and final non-privileged documents pursuant to this Order.

31. DuPont agrees that it will not assert any privilege claim concerning any data or technical information developed in performing the work required by this Order, including information relating to any reports, investigations, or other actions required by this Order. DuPont does not waive any privilege that would attach to communications between it and its counsel. DuPont does not waive any privilege that would attach to communications, including opinions, between it and its consultants not performing work under this Order, but retained in anticipation of litigation.

X. STIPULATED PENALTIES

32. DuPont will be subject to pay the following stipulated penalties to the United States for violations of this Order:

- a. For failure to submit quarterly progress reports by the dates scheduled in paragraph 20, above: \$1,500 per day for the first fourteen (14) days and \$3,000 per day thereafter.
- b. For failure to adequately demonstrate that Current Human Exposures are Under Control by the date required in paragraph 11(c), above: \$4,500 per day.
- c. For failure to adequately demonstrate that Groundwater Migration is stabilized by the date required in paragraph 11(c), above: \$4,500 per day.
- d. For failure to submit the Final Corrective Measures Proposal by the date in paragraph 15, above: \$1,500 for the first fourteen (14) days and \$3,000 per day thereafter.

- e. For failure to implement in accordance with the approved schedule, the selected final Corrective Measures as described in paragraphs 18 and 19, above: \$4,500 for the first fourteen (14) days and \$9,000 per day thereafter.
- f. For failure to submit the Final Remedy Construction Completion Report as scheduled in paragraph 15, above: \$1,500 per day for the first fourteen (14) days and \$3,000 per day thereafter.
- g. For failure to submit the Current Conditions Report required in paragraph 11 within sixty (60) days after the effective date of the Order: \$2,250 per day for the first fourteen (14) days and \$3,000 per day thereafter.
- h. For failure to timely submit the Cost Estimate or establish and maintain the financial assurance as required by Section VIII: \$2,250 per day for the first fourteen (14) days and \$4,500 per day thereafter.

33. Whether or not DuPont has received notice of a violation, stipulated penalties will begin to accrue on the day a violation occurs, and will continue to accrue until DuPont complies. For items b and c above, stipulated penalties will not accrue during the period, if any, beginning 31 days after the Environmental Indicators Report is due until the date that U.S. EPA notifies DuPont in writing of any deficiency in the required demonstration(s). Separate stipulated penalties for separate violations of this Order will accrue simultaneously.

34. DuPont must pay any stipulated penalties owed to the United States under this Section within thirty (30) days of receiving U.S. EPA's written demand to pay the penalties, unless DuPont invokes the dispute resolution procedures under Section XI: Dispute Resolution. A written demand for stipulated penalties will describe the violation and will indicate the amount of penalties due.

35. Interest will begin to accrue on any unpaid stipulated penalty balance beginning thirty-one (31) days after DuPont receives U.S. EPA's demand letter. Interest will accrue at the Current Value of Funds Rate established by the Secretary of the Treasury. Pursuant to 31 U.S.C. § 3717, DuPont must pay an additional penalty of six (6) percent per year on any unpaid stipulated penalty balance more than ninety (90) days overdue.

36. DuPont must pay all penalties by certified or cashier's check payable to the United States of America, and will send the check to:

U.S. Environmental Protection Agency
Fines and Penalties
Cincinnati Finance Center
P.O. Box 979077
St. Louis, MO 63197-9000

A transmittal letter stating the name of the Facility, DuPont's name and address, and the U.S. EPA docket number of this action must accompany the payment. DuPont will

simultaneously send a copy of the check and transmittal letter to the U.S. EPA Project Manager.

37. DuPont may dispute U.S. EPA's assessment of stipulated penalties by invoking the dispute resolution procedures under Section XI: Dispute Resolution. The stipulated penalties in dispute will continue to accrue, but need not be paid, during the dispute resolution period. DuPont will pay stipulated penalties and interest, if any, according to the dispute resolution decision or agreement. DuPont will submit such payment to U.S. EPA within thirty (30) days after receiving the resolution according to the payment instructions of this Section.

38. Neither invoking dispute resolution nor paying penalties will affect DuPont's obligation to comply with the terms of this Order not directly in dispute.

39. The stipulated penalties set forth in this Section X do not preclude U.S. EPA from pursuing any other remedies or sanctions which may be available to U.S. EPA for DuPont's violation of any terms of this Order. However, U.S. EPA will not seek both a stipulated penalty under this Section and a statutory penalty for the same violation.

XI. DISPUTE RESOLUTION

40. The parties will use their best efforts to informally and in good faith resolve all disputes or differences of opinion arising under or in connection with this Order.

41. If either party disagrees, in whole or in part, with any decision made or action taken pursuant to this Order, that party will notify the other party's Project Manager of the dispute. The Project Managers will attempt to resolve the dispute informally.

42. If the Project Managers cannot resolve the dispute informally, either party may pursue the matter formally by placing its objections in writing. A written objection must state the specific points in dispute, the basis for that party's position, and any matters which it considers necessary for determination.

43. U.S. EPA and DuPont will in good faith attempt to resolve the dispute through formal negotiations within twenty-one (21) days, or a longer period if agreed in writing by the parties. During formal negotiations, either party may request a conference with appropriate senior management to discuss the dispute.

44. If the parties are unable to reach an agreement through formal negotiations, within fourteen (14) business days after any formal negotiations have concluded, DuPont and U.S. EPA's Project Manager may submit additional written information to the Director of the Land and Chemicals Division, U.S. EPA Region 5. U.S. EPA will maintain a record of the dispute, which will contain all statements of position and any other documentation submitted pursuant to this Section. U.S. EPA will allow timely submission of relevant supplemental statements of position by the parties to the dispute. Based on the record, U.S. EPA will respond to DuPont's arguments and evidence and provide a detailed written decision on the dispute signed by the Director of the Land and Chemicals Division, U.S. EPA, Region 5 ("U.S. EPA Dispute Decision").

45. If, at the conclusion of the Dispute Resolution process, DuPont notifies U.S. EPA that it refuses to implement U.S. EPA's selected final Corrective Measures, U.S. EPA will endeavor to pursue the action(s) it deems necessary, if any, within a reasonable period of time.

XII. FORCE MAJEURE AND EXCUSABLE DELAY

46. Force majeure, for purposes of this Order, is any event arising from causes not foreseen and beyond the control of DuPont that delays or prevents the timely performance of any obligation under this Order despite its best efforts.

47. If any event occurs or has occurred that may delay the performance of any obligation under this Order, whether or not caused by a force majeure event, DuPont will notify U.S. EPA within seven (7) days after learning that the event may cause a delay. If DuPont wishes to claim a force majeure event, within twenty (20) days thereafter DuPont must provide to U.S. EPA in writing all relevant information relating to the claim, including a proposed revised schedule.

48. If U.S. EPA determines that a delay or anticipated delay is attributable to a force majeure event, U.S. EPA will extend in writing the time to perform the obligation affected by the force majeure event for such time as U.S. EPA determines is necessary to complete the obligation or obligations.

XIII. MODIFICATION

49. This Order may be modified only by mutual agreement of U.S. EPA and DuPont, except as provided in Section VI - Work to be Performed. Any agreed modifications will be in writing, will be signed by both parties, will be effective on the date of signature by U.S. EPA, and will be incorporated into this Order.

XIV. RESERVATION OF RIGHTS

50. Nothing in this Order restricts U.S. EPA's authority to seek DuPont's compliance with the Order and applicable laws and regulations. For violations of this Order, U.S. EPA reserves its rights to bring an action to enforce the Order, to assess penalties under Section 3008(h)(2) of RCRA, 42 U.S.C. § 6928(h)(2), and to issue an administrative order to perform corrective actions or other response measures. In any later proceeding, DuPont shall not assert or maintain any defense or claim based upon the principles of waiver, res judicata, collateral estoppel, issue preclusion, claim-splitting, or other defenses based upon a contention that the claims raised by the United States in the later proceeding were or should have been raised here. This Order is not a covenant not to sue, release, waiver, or limitation of any rights, remedies, powers, or authorities of U.S. EPA.

51. U.S. EPA reserves all of its rights to perform any portion of the work consented to here or any additional site characterization, feasibility study, and remedial work as it deems necessary to protect human health or the environment.

52. If U.S. EPA determines that activities in compliance or noncompliance with this Order

have caused or may cause a release of hazardous waste or hazardous constituent(s), or a threat to human health or the environment, or that DuPont is not capable of undertaking any of the work ordered, U.S. EPA may order DuPont to stop implementing this Order for the time U.S. EPA determines may be needed to abate the release or threat and to take any action that U.S. EPA determines is necessary to abate the release or threat.

53. DuPont does not admit any of U.S. EPA's factual or legal determinations, including specifically the determinations set forth in Section 8 above. Except for the specific waivers in this Order, DuPont reserves all of its rights, remedies and defenses, including all rights and defenses it may have: (a) to challenge U.S. EPA's performance of work; (b) to challenge U.S. EPA's stop work orders; and (c) regarding liability or responsibility for conditions at the facility, except for its right to contest U.S. EPA's jurisdiction to issue or enforce this Order. DuPont has entered into this Order in good faith without trial or adjudication of any issue of fact or law. DuPont reserves its right to seek judicial review of U.S. EPA actions taken under this Order, including a proceeding brought by the United States to enforce the Order or to collect penalties for violations of the Order.

XV. OTHER CLAIMS

54. Nothing in this Order will constitute or be construed as a release from any claim, cause of action, demand, or defense in law or equity, against any person, firm, partnership, or corporation for any liability it may have arising out of or relating in any way to the generation, storage, treatment, handling, transportation, release, or disposal of any hazardous constituents, hazardous substances, hazardous wastes, pollutants, or contaminants found at, taken to, or taken or migrating from the Facility. DuPont waives any claims or demands for compensation or payment under Section 106(b), 111, and 112 of CERCLA against the United States or the Hazardous Substance Superfund established by 26 U.S.C. § 9507 for, or arising out of, any activity performed or expense incurred under this Order. Additionally, this Order is not a decision on preauthorization of funds under Section 111(a)(2) of CERCLA.

XVI. INDEMNIFICATION OF THE UNITED STATES GOVERNMENT

55. DuPont agrees to indemnify, save and hold harmless the United States Government, its agencies, departments, agents, and employees, from all claims or causes of action arising from or on account of acts or omissions of DuPont or its officers, employees, agents, independent contractors, receivers, trustees, and assignees in carrying out activities required by this Order. This indemnification will not affect or limit the rights or obligations of DuPont or the United States under their various contracts. This indemnification will not create any obligation on the part of DuPont to indemnify the United States from claims arising from the acts or omissions of the United States.

XVII. SEVERABILITY

56. If any judicial or administrative authority holds any provision of this Order to be invalid, the remaining provisions will remain in force and will not be affected.

XVIII. TERMINATION AND SATISFACTION

57. DuPont may request that U.S. EPA issue a determination that DuPont has met the requirements of the Order for all or a portion of the Facility. DuPont may also request that U.S. EPA issue a "No Further Interest" or "No Further Action" determination for all or a portion of the Facility.

58. The provisions of the Order will be satisfied upon DuPont's and U.S. EPA's execution of an "Acknowledgment of Termination and Agreement on Record Preservation and Reservation of Rights," consistent with U.S. EPA's Model Scope of Work.

59. DuPont's execution of the Acknowledgment will affirm its continuing obligation to preserve all records as required by Section VIII, to maintain any necessary institutional controls or other long terms measures, and to recognize U.S. EPA's reservation of rights as required in Section IX.

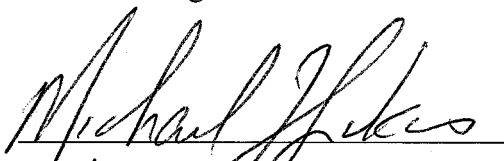

XIX. EFFECTIVE DATE

60. This Order is effective on the date that U.S. EPA signs the Order.

IT IS SO AGREED:

DATE: 6/11/08

BY:

MICHAEL J. LUKAS
Name

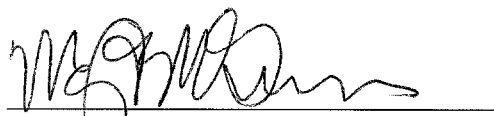

CEO BUSINESS TEAM MANAGER

Title
DuPont Corporation

IT IS SO ORDERED:

DATE: 7/1/08

BY:

Margaret Guerriero, Director
Land and Chemicals Division
U.S. Environmental Protection Agency
Region 5

CERTIFICATE OF SERVICE

DuPont Toledo Plant
Administrative Order on Consent under 3008(h) of RCRA
EPA ID # OHD 005 041 843
U.S. EPA Docket # *RCRA-05-2008-001022*.

Certified Mail Receipt Number: 7001 0320 0006 1454 0199

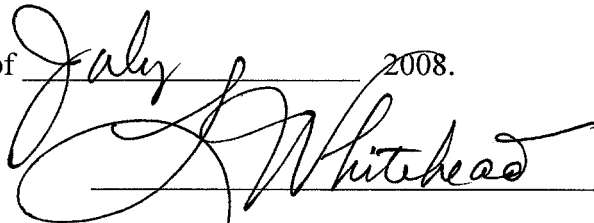

I hereby certify that I have caused a copy of the foregoing Consent Order to be served upon the persons designated below, on the date below, by causing said copy to be deposited in the U.S. Mail First Class and certified-return receipt requested, postage prepaid at Chicago, Illinois, in an envelope addressed to:

Maria S. Angelo
Counsel
DuPont Legal, Environmental Group
1007 Market Street, Room D-7086
Wilmington, DE 19898

I have further caused the original of the Consent Order and this Certificate of Service to be served in the Office of the Regional Hearing Clerk, U.S. EPA, Region 5, 77 West Jackson Boulevard, Chicago, Illinois, 60604, on the date below.

This is said person's last known address to the subscriber.

Dated this 7th day of July 2008.

LaDawn Whitehead, Administrative Program Assistant
Remediation and Reuse Branch
Land and Chemicals Division
U.S. EPA, Region 5
