

posted on the OALJ's website.¹ The parties agree that having these witnesses available via videoconferencing technology only will be satisfactory to the parties.

The parties intend to reserve their right to have some or all of these witnesses appear in person instead of by videoconference. The parties propose to notify OALJ by Wednesday, June 29, 2022, which of these witnesses will appear in person instead of by videoconference. This motion is not intended to in any way limit the scope of evidence that any party may offer in rebuttal, by calling witnesses in person at the hearing or otherwise.

The parties have conferred concerning a preferred videoconference platform. The parties first preference for a videoconference platform is Zoom. The parties have confirmed that Zoom is a feasible videoconference technology for all sixteen witnesses who provided verified written statements. The parties are available to confer with OALJ regarding other platforms if Zoom is not well suited for use in the OALJ courtroom.

Each party will take steps to ensure that each witness that provided direct testimony in support of its position is available for cross-examination by any other party. Each witness shall be available for cross-examination during a period mutually-agreeable to all parties, or during the entirety of the scheduled hearing, as appropriate.

WHEREFORE, the parties jointly move that some or all of the witnesses who provided verified written witness statements in this matter be allowed to appear via videoconference during the scheduled hearing.
