

QUESTION: If a small quantity generator (SQG) periodically becomes subject to the 262.34 generator regulations, e.g., only once every five years, must his personnel training be updated annually per 265.16 (c)?

ANSWER: No; the SQG need only comply with the 265.16 (c) requirements when he is subject to all of 262.34 which, in this case, is once every five years. Hence, personnel training would be updated every five years.
