RCRA/SUPERFUND HOTLINE SUMMARY

APRIL 84

2. The dry cleaning industry use carbon filters to filter the solvent. perchloroethylene. Are the resulting carbon filters which contain spent perchloroethylene viewed as hazardous waste?

The filters are viewed as F002. and the weight of the filter is counted toward the small quantity generator (SQG) limit of 1000 kg. These filters are typically generated by the dry cleaning industry and may contain up to one gallon of perchloroethylene.
