Fred Longenberger
Senior Technical Adviser
Air Quality Section - EPA
Suite 900, 1860 Lincoln St.
Denver, CO 80203

Dear Mr. Longenberger:

Reference is made to our telephone conference last week during which you requested compliance schedules which are in effect in Wyoming.

The following schedules have been imposed by the Wyoming Air Resources Council by the three soda ash industries in Sweetwater County:

1. Stauffer Chemical Company - Green River, Wyoming

The completion date for the new construction on plant expansion has been set for September 1972. Control equipment is incorporated in this expansion to meet Wyoming's standards.

Redesign and alteration of the present plant to meet state requirements is scheduled for completion in July 1973.

Quarterly reports are submitted to the Wyoming Air Resources Council.

2. Allied Chemical Company - Green River, Wyoming

The final date for compliance with Wyoming's air quality requirements by this firm is July 1973.

Quarterly reports are required by the Wyoming Air Resources Council.

3. Food Machinery Corporation - Green River, Wyoming

Page 2
Fred Longenberger
March 28, 1972

Major plant modifications will be in place by July 1973 and the complete control system has a scheduled operational date of October 1973.

Quarterly reports are required by the Wyoming Air Resources Council.

In addition to the above schedules, a coking plant near Kemmerer, operated by the Food Machinery Corporation is now developing a compliance schedule which will be available within the next few weeks.

Quarterly reports are being furnished by this operation to the Wyoming Air Resources Council since control measures are now being instituted.

We hope the above information is that which you require.

Very truly yours,

Robert E. Sundt
Director
Air Quality Section

STATE OFFICE BUILDING CHEYENNE, WYOMING 82001

May 29, 1973

John A. Green, Regional Administrator
Environmental Protection Agency - Region VIII
Suite 900, 1860 Lincoln Street
Denver, CO 80203

Dear Mr. Green:

A public meeting of the Wyoming Air Resources Council was held in Room 303, Engineering Building, University of Wyoming, beginning at 3:00 pm on Thursday, May 24, 1973.

This meeting was held as described by the attached affidavit and the Council unanimously approved the following revisions in Wyoming's Implementation Plan for air quality:

~~Section III, Control Strategies, Page 6. The paragraph following Table 1 is replaced in its entirety by the following paragraph:~~

~~"The state of Wyoming will require compliance with particulate standards as soon as practicable but not later than January 31, 1974, except for facilities where other final compliance dates have been approved by the Administrator of the Environmental Protection Agency. In regions where concentrations are already below the levels of secondary standards, it is the intention of the State of Wyoming to comply with Section 410.2 (c), of the April 30, 1971, Federal Register, Volume 36, No. 84, by not allowing significant degradation of existing air quality."~~

Section IV, Compliance Schedules, Page 9, Paragraph G. is replaced in its entirety by the following paragraph:

G. "Any compliance schedule or revision thereof extending over a period of more than one year from the date of its adoption by the Wyoming Air Resources Council and requiring compliance 18 or more months from the date of approval or promulgation of an applicable control strategy by the Administrator of the EPA shall provide for legally enforceable increments of progress toward compliance by the affected source. Such increments shall be sufficiently detailed to permit close and effective supervision of progress by the source toward timely compliance."

The enclosed compliance schedules submitted by the Town of Lovell and the Federal Bentonite Company were considered and accepted for forwarding to

John A. Green

the Environmental Protection Agency. No statements were made regarding these schedules.

The minutes of this public meeting also reflect Council action to approve amending Page 2 of the acceptance of all previous schedules to recognize such schedules as revisions to the implementation plan. As such, they are submitted pursuant to 40 CFR Section 51.6. This action was taken to satisfy requirements outlined in Mr. Dickstein's letter received in our office on April 23, 1973.

Very truly yours,

Robert E. Sundin
Director
Air Quality Section
