**Re: Final - Authority to Construct / Certificate of Conformity (Significant Mod)  
District Facility # N-2321  
Project # N-1092377**

Dear Mr. Scott:

The Air Pollution Control Officer has issued Authorities to Construct (ATCs) with Certificates of Conformity to RME, Inc. - Woodbridge Winery at 5950 E. Woodbridge Rd in Acampo. The ATCs were issued for a specific limiting condition (SLC) for wine production operations, 141 new wine fermentation and storage tanks, and modification of 13 existing wine storage tanks.

Enclosed are the Authorities to Construct. The application and proposal were sent to US EPA Region IX on November 18, 2009. Following the notice of preliminary action, you requested that facility tank identification numbers be inserted into the equipment description sections of the ATCs for new tanks. You also requested a correction of the capacity of one new tank that was listed as 6,050 gallons in the original application, but should have been listed as 6,284 gallons. The District has determined that insertion of facility tank identification numbers has no effect on the project, and the effect of correcting the capacity of one tank from 6,050 gallons to 6,284 gallons is negligible. The District has therefore made the requested changes.

The notice of final decision for this project will be published approximately three days from the date of this letter.

Prior to operating with modifications authorized by the Authorities to Construct, you must submit an application to modify the Title V permit as an administrative amendment in accordance with District Rule 2520, Section 11.5.

Enclosed is an invoice for the engineering evaluation fees and reimbursable overtime fees. Please remit the amount owed, along with a copy of the attached invoice, within 30 days.

**Seyed Sadredin**

Executive Director/Air Pollution Control Officer
