### TITLE V PERMIT (REV 02) EVALUATION

**Applicant's Name**                      Inland Empire Utilities Agency (IEUA), Regional Plant 1 (RP-1)

**Mailing Address**                      P.O. Box 9020  
Chino Hills, CA 91709

**Equipment Location**                2450 Philadelphia Avenue  
Ontario, CA 91761

**FACILITY ID 009163**  
**APPLICATION 533319- Title V De Minimis Significant Permit Revision**

**Background**

Inland Empire Utilities Agency (IEUA), Regional Plant 1 (RP-1) A/N 533319 was submitted for Title V permit revision (03) on February 16, 2012. Application 533317 and 526318 were submitted for the permitting of two identical digester gas/natural gas fired boilers installed without prior approval. For additional information please refer to the attached evaluation prepared for the EPA review.

Note: Title V Revision 02 (A/N 526324) was issued December 28, 2011.

**Rules Evaluation**

Reg. XXX:

The permitting of two identical digester gas and natural gas boilers installed without prior approval is considered a Title V De Minimis Significant permit revision under Rule 3000(b)(6), since the cumulative emission increases of non-RECLAIM pollutants or HAPS due to these permit revisions do not exceed thresholds, listed under Draft Technical Guidance Document for Title V Program, Version 4.0, March 2005, Chapter 5, Table 5-4 (lbs/day VOC: 30, CO: 220, PM10: 30 and HAP: 30), does not require any significant change in monitoring or permit conditions, does not require relaxation or avoidance of a requirement, does not result in new or additional NSPS or NESHAP requirements and will be subject to an EPA review (Rule 3003 (j)). A public notice is not required. Compliance is expected.

**Conclusions and Recommendations**

A Permit to Operate is recommended for applications 533317 and 533318. A revised Title V permit is recommended after the completion of EPA review.
