Re: Rule 1176 Plan
Application Number: 478120
Plan Owner/Operator: Ultramar Inc. dba: Valero Wilmington Refinery
Facility ID: 800026
Facility Address: 2402 E. Anaheim Street, Wilmington, CA 90744

Dear Mr. Lee:

The South Coast Air Quality Management District (AQMD) has reviewed your latest Rule 1176 Plan application (A/N 478120), which Ultramar submitted pursuant to paragraph (d)(2) of District Rule 1176. Based on the information provided, your compliance plan supplemented with additional information provided on May 15, 2013 is approved and is subject to the conditions as shown below.

1. As the result of selecting the compliance option specified in Rule 1176(e)(7)(A) for repeat emitting drain system components (DSCs), your facility shall comply with the following schedule:

Within 60 days or longer, as approved by the Executive Officer, after a DSC becomes a repeat emitting DSC, effectively control the DSC by installing a DSC control, if previously uncontrolled, or a more efficient DSC control to eliminate excess emissions from the DSC.

Repeat-emitting DSC is a DSC that has emitted VOC, measured pursuant to paragraph (h)(1) of Rule 1176, greater than 500 ppm above background levels at least three times during any consecutive 12 months.

2. As a result of selecting the compliance option specified in Rule 1176(e)(7)(A) for repeat emitting DSCs, the operator shall inspect and monitor wastewater separators, closed vent systems, and all DSCs in accordance to the requirements of Rule 1176(f)(1)(A).
3. All new process drains installed after September 13, 1996 shall be equipped with water seal controls, or alternative controls as approved by the Executive Officer.

If you have any questions concerning this plan, please contact Ms. Janice West at (909) 396-3763 or jwest@aqmd.gov.

Sincerely,

Danny Luong, P.E.
