Subject: Proposed Minor Revision to Title V Facility Permit for Air Products and Chemicals, Inc. (Facility ID # 003417)

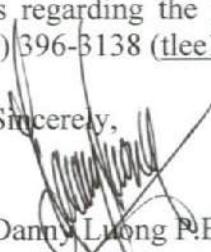

Dear Mr. Rios:

Enclosed for your 45-day review is the proposed Minor revision to the Title V facility permit for Air Products and Chemicals, Inc. located at 23300 S. Alameda St., Carson, California. The renewed Title V permit for this facility was issued on January 23, 2014.

Under this revision, the South Coast Air Quality Management District (SCAQMD) proposes to reissue the revised Flare Monitoring and Recording Plan (FMRP) that was approved under A/N 458528 on February 24, 2011 to comply with SCAQMD Rule 1118. The reissuance of this FMRP is necessary to reflect a change of condition in the plan approval letter to allow the use of an alternate methodology in determining the Higher Heating Value of the PSA Purge Gas stream to the flare for emissions calculation purposes pursuant to Rule 1118.

There will be no impact on emissions from the reissuance of this FMRP. The SCAQMD plans to approve the revised plan with the conditions shown in the attached draft approval letter. The revised portion of the Title V permit (Section I) and our evaluation are also attached for your review. This FMRP supersedes the previous plan approved on February 24, 2011. If you have any questions or wish to provide comments regarding the proposed plan, please contact the permitting engineer, Mr. Thomas Lee, at (909) 396-3138 (tlee1@aqmd.gov).

Sincerely,

Danny Luong P.E.
