The purpose of the revision is to remove the natural gas firing restriction for the Cogen Gas Turbine S-1030, pursuant to permit condition 19177, Part 18d. During commissioning of the Cogen unit, the required source test in January, 2003 indicated that the unit did not comply with the POC mass emission limits of Condition 19177, Part 18d when firing only the gas turbine exclusively on natural gas. A Source Test was conducted on December 2, 2003, which demonstrated compliance with the POC mass emission limit.
