This is an existing facility applying for a Title V permit renewal. The facility is located in the city of Carson and produces pure hydrogen through a process known as steam methane reforming (using natural gas and steam) for sale and delivery to neighboring refineries.

Pursuant to Title V of the federal Clean Air Act and AQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such permit has been renewed. Accordingly, the above facility has submitted a Title V renewal application and requested the AQMD to renew their Title V permit. The proposed permit incorporates updates to the facility information, as provided in the facility's Title V renewal application, as well as updates to all rules and regulations that are currently applicable to the facility.

As required by Title V of the federal Clean Air Act, the Title V permits include all of the emission limits, applicable requirements and operating conditions imposed on the equipment. Title V facilities are required to certify compliance with the Title V permits in addition to recordkeeping and mandatory reporting of any deviation from the permit conditions.

The proposed permit is available for public review at the South Coast Air Quality Management District, 21865 Copley Drive, Diamond Bar, CA 91765, and at the Los Angeles City Public Library, 1300 N. Avalon Blvd., Wilmington, CA 90744. The proposed permit can also be viewed at <http://www3.aqmd.gov/webappl/publicnotices2/> by entering the facility's ID number. Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code, Section 42336, or otherwise known to the AQMD based on credible information, is also available from AQMD for public review. For more information or to review additional supporting documents, please call Thomas Lee at (909) 396-3138. **Anyone wishing to comment on the issuance of the proposed renewal permit should submit their comments in writing by December 31, 2013.
