MINOR PERMIT REVISION DESCRIPTION

This is a Minor Permit Revision to Air Quality Permit No. 39756 that is issued to El Paso Natural Gas Company for the operation of a compressor station in Flagstaff, AZ.

On March 3, 2006 El Paso Natural Gas Company requested to replace the existing emergency generator rated at 74 Horsepower with another generator rated at 184 Horsepower. The net increase in emissions of CO, NO_x, SO_x, VOCs, and PM₁₀ is 3.23, 14.94, 0.96, 1.2, and 1.06 tons per year respectively. The net emissions increase for all pollutants are all less than the significance level listed in A.A.C. R18-2-106. This project meets all the gatekeepers as outlined in A.A.C. R18-2-319.A

In accordance with A.A.C. R18-2-319.A, this permit revision incorporates into El Paso Natural Gas Company's Class I Permit No. 27931, a change to their equipment list which allows the facility to replace their current emergency generator.
