### TITLE V PERMIT EVALUATION (REVISION)

**Applicant's Name:** LA CITY, TERMINAL ISLAND TREATMENT PLANT

**Mailing Address:** 445 FERRY ST.  
SAN PEDRO, CA 90731

**Equipment Location:** SAME

**Facility ID NO.:** 10245

**Background:**

The application 474644 was submitted for Title V permit revision on 10/17/07 for a new construction of a Digester Gas Treatment/Control System & Fuel Cell Power Plant (A/N 471518) and modification (A/N 474645) of a Digester Gas Firing System (P/O # D89982). Also, based on the applicant's request, the existing ICE with P/O # F48753 will be removed the Section D.

The facility NOX emissions (Potential to Emit) are greater than the NOX threshold level in Table 2 of Rule 3001 (b) and therefore the facility is required to obtain a Title V permit.

Note:

- 1) A 45-day EPA review period and a 30-day public notice is required for the revision of TV permit. Therefore, prior to the issuance of the of TV revision permit, a copy of the TV revision permit will be sent to EPA for a 45-day review and a 30-day public notice issued.
- 2) Based on Final Facility HRA (6/2/2000), the MICR is determined to be  $1.83 \times 10^{-6}$  (see attached copy).

**Rules Evaluation:**

Compliance with applicable Reg. XXX, Title V permit is expected.

**RECOMMENDATION:**

Recommend issuing an TV Permit revision pending EPA and Public comments.
