April 4, 2008

Mr. John Gates
H System Asset Management Commercial Manager
Inland Empire Energy Center, LLC
26226 Antelope Road
Romoland, CA 92585

Dear Mr. Gates:

Attached please find the revised Section H of your Title V facility permit (ID# 129816) for equipment located at 26226 Antelope Road, Romoland. The revised section reflects the change of operating conditions for the auxiliary boiler. The following is a summary of the applications.

| Application | Purpose | Facility Permit |
|-------------|--|-----------------|
| 479818 | Auxiliary boiler D3 change of condition A99.2, A99.4, A195.4 | Section H |
| 479817 | Title V facility minor permit revision | |

This permit revision to the auxiliary boiler is a minor revision that is subject to an EPA 45-day review. The draft permit was sent to EPA on March 28, 2008. EPA provided written comments on April 3, 2008 regarding the proposed 200 hours of commissioning operation without the full use of the SCR catalyst. AQMD has reviewed the materials you provided on April 3, 2008, and considered them satisfactory to EPA's concern. Thus, the final permit is issued without any revisions to the draft permit. Please review the attached Section H carefully, then insert the enclosed sections into your Facility Permit and discard the earlier version. Questions concerning changes to your permit should be directed to Mr. Li Chen at (909) 396-2426.

Sincerely,

Michael D. Mills, P.E.
