This is an existing facility applying for a renewal to their Title V permit. The facility manufactures a variety of consumer polystyrene products. This facility operates one expandable polystyrene cup-molding process, one extruded polystyrene foam process, one transparent oriented polystyrene process and one opaque high impact polystyrene process. Emissions from the equipment described above are vented to two dust collectors, and eight Electrostatic Precipitators to control the PM emissions, and one Regenerative Thermo Oxidizer and four boiler/afterburners to control the VOC emissions.

Pursuant to Title V of the Federal Clean Air Act and AQMD Rule 3004(f), a Title V permit shall expire five years from the date of issuance unless such permit has been renewed. Accordingly, the above facility has submitted a Title V renewal application and requested the AQMD to renew their Title V permit. The proposed permit incorporates updates to the facility information provided in the facility's Title V renewal application and all rules and regulations that are currently applicable to the facility.

The proposed permit is available for public review at AQMD, 21865 Copley Dr., Diamond Bar, CA 91765 and Corona Public Library at 650 South Main Street, Corona, CA 92882-3417. Information regarding the facility owner's compliance history submitted to the AQMD pursuant to California Health & Safety Code Section 42336, or otherwise known to the AQMD based on credible information, is also available from the AQMD for public review. For more information or to review additional supporting documents, call the AQMD's Title V hotline at (909) 396-3013. Written comments should be submitted to:
