The following information is included to inform and assist the Permit Holder in achieving compliance with applicable provisions of Federal, State, and District Rules and Regulations. The following set of referenced regulations are not intended to be either comprehensive or exclusive, nor are they intended to be emission limiting permit conditions, but they are still applicable rules of the District. Occasionally laws are amended. The amended versions of the referenced rules shall be deemed to be in effect. **It is the Permit Holder's responsibility to comply with all applicable Rules and Regulations.**

1. The Permit Holder shall submit the Permit Notification Card after completing construction, installation, initial adjustment, or shakedown, and no later than 48 hours after beginning actual operation of the equipment listed in the Authority to Construct (ATC). For modifications of existing permits not requiring a physical change, the Permit Holder shall submit the Permit Notification Card no later than 48 hours after beginning operation of the equipment under the revised conditions of this ATC. The Permit Notification Card serves as the Permit to Operate (PTO) application, while the ATC and its conditions shall function as a temporary PTO until the final PTO is issued or denied. Operation beyond the shakedown period and the allowable 48 hours of actual operation without the submission of a Permit Notification Card will be considered operation without a valid permit and may be subject to enforcement action. [District Rule 3.1, §402]
2. The District requires an inspection of the equipment after completion of the construction and prior to the issuance of the Permit to Operate. [District Rule 3.1, §402]
3. An authorization to construct shall remain in effect only until the application for Permit to Operate is granted or denied; however, such an authorization shall not remain in effect beyond two years from the date of issuance unless the District finds that the time required for construction requires an extension and grants one or more extensions, for a total time not to exceed five years from the date of issuance. [District Rule 3.1, §407]

The following set of conditions are established by the District to provide enforceable operating parameters as authorized by California Health and Safety Code Section 42301 and District Rule 3.1, Section 402. If any of the rules and regulations referenced below are amended subsequent to the issuance date of this permit, resulting in the amended rule differing from or superseding the corresponding condition, then the Permit Holder shall be required to comply with the amended rule or regulation and shall no longer be required to comply with the superseded condition.

4. The Permit Holder shall not discharge into the atmosphere from any single source of emissions whatsoever, any air contaminant for a period or periods aggregating more than three (3) minutes in any one (1) hour which is:
  - a. As dark or darker in shade than No. 1 on the Ringelmann Chart; or
  - b. Greater than 20% opacity. [District Rule 2.3]
  
5. The Permit Holder shall not discharge into the atmosphere, from the dust collection system, any air contaminant for a period or periods aggregating more than three (3) minutes in any one (1) hour which is:
  - a. As dark or darker in shade than No. 1/4 on the Ringelmann Chart; or
  - b. Greater than 5% opacity. [District Rule 3.4]
  
6. The Permit Holder shall not release or discharge into the atmosphere, from the dust collection system, particulate matter in excess of 0.1 grains per cubic foot of exhaust as calculated at standard conditions. [District Rule 2.11]
  
7. All control equipment, including ducts, shall be properly maintained, kept in good operating condition per manufacturer's specifications, and be operated at all times in conjunction with its associated process. [District Rule 3.4]
  
8. The Permit Holder shall dispose of all material collected in the control equipment in a manner to minimize the release of the collected material into the atmosphere. [District Rule 3.4]
  
9. The Permit Holder shall maintain a complete list of all equipment associated with the process, which includes a description and horsepower rating for each piece of woodworking equipment and the rating of the associated the control equipment in cubic feet per minute (CFM). This list shall be maintained with the Permit to Operate and shall be made available to the District upon request. [District Rule 3.4]
  
10. The Permit Holder shall maintain quarterly and yearly records of the operational hours for the dust collection system. Historic data shall be retained for the five (5) previous calendar years and made available to the District upon request. [District Rule 3.4]

This permit does not authorize the emission of air contaminants in excess of those allowed by Division 26, Part 4, Chapter 3, of the Health & Safety Codes of the State of California or the Rules and Regulations of the Yolo-Solano Air Quality Management District.

Mat Ehrhardt, P.E.  
AIR POLLUTION CONTROL OFFICER
