Background:

This application 576058 was submitted for Title V permit revision on 06/16/2015, to include;

A/N 576057, Modifications to existing LFG Collection system permit to operate G35513 issued under A/N 492235.

This revision is considered a de-minimis significant permit revision and it includes proposed installations for the new horizontal gas collectors (trenches) and LFG collection wells planned over the next five years. Proposed modifications are shown in the permit Equipment Description, and are prefaced with "By the Addition of". LFG collected shall be sent to the air pollution control equipment to control VOCs/TACs emissions.

Public notice is not required; however, the de-minimis revision is subject to EPA 45-day review and comment period.

Rules Evaluation:

Compliance with applicable District and Federal rules and Reg. XXX -Title V permits is expected.

Conclusions & Recommendations:

Issue the revised Title V permit, under a/n 576058, Section D, Rev 06, upon completion of 45-day EPA review, and PC-PO approval.
