DRAFT Title V Permit

Dear Hamed:

Thank you for granting us the opportunity to review the draft Title V permit. Below we have provided a few comments. Additionally, we included an updated Form 500A-2 and Form 500C-1.

- 1) Under the Rule 219 Equipment section -- On Condition 4 of the Woodworking Operations, could the SCAQMD please remove the reference to Rule 1155 and 0 opacity. Rule 1155 was meant to capture permitted PM air pollution control devices. Dust collectors tied to woodworking operations are not required to obtain a permit.
- 2) Under Rule 219 Equipment section - Condition 3 of the Woodworking Operations, could the SCAQMD change the visible emission observations to a semi-annual frequency to be consistent with Rule 401 within the Title V Periodic Monitoring Guidelines? In addition, could the SCAQMD please consider changing the condition to reflect the language in the Title V Periodic Monitoring Guidelines?

If you have any questions please give me a call at 714-996-2500.

Sincerely,

Lillian Allen
Vice President

PROCEDURES FOR DETERMINING COMPLIANCE STATUS

1. **Equipment verification:** Review the list of pending applications, and either the preliminary Title V facility permit or the list of current permits to operate that the AQMD provided you, to determine if they completely and accurately describe all equipment operating at the facility. Attach a statement to describe any discrepancies.
2. **Identify applicable requirements*:** Use the checklist in Section II to identify all applicable and federally-enforceable local, state, and federal rules and regulations, test methods, and monitoring, recordkeeping and reporting (MRR) requirements that apply to any equipment or process (including equipment exempt from a permit by Rule 219) at your facility. The potential applicable requirements, test methods and MRR requirements are identified and listed adjacent to each given equipment/process description. Check off each box adjacent to the corresponding requirement as it applies to your particular equipment/process.
Note: Even if there is only one piece of equipment that is subject to a particular requirement, the appropriate box should be checked.
3. **Identify additional applicable requirements*:** Use Section III to identify any additional requirements not found in Section II. Section II is not a complete list of all applicable requirements. It does not include recently adopted NESHAP regulations by EPA or recent amendments to AQMD rules. Do not add rules listed in Section V here.
4. **Identify any requirements that do not apply to a specific piece of equipment or process:** Also use Section III to identify any requirements that are listed in Section II but that do not apply to a specific piece of equipment or process. Fill out Section III of this form and attach a separate sheet to explain the reason(s) why the identified rules do not apply. Note: Listing any requirement that does not apply to a specific piece of equipment will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and is approved by AQMD.
5. **Identify SIP-approved rules that are not current AQMD rules:** Use Section IV to identify older versions of current AQMD rules that are the EPA-approved versions in the State Implementation Plan (SIP), and that are still applicable requirements as defined by EPA. The facility is not required to certify compliance with the items checked in Section IV provided that the non-SIP approved rule in Section II is at least as stringent as the older SIP-approved version in Section IV. **
6. **Identify Local-Only Enforceable Regulatory Requirements:** Use Section V to identify AQMD rules that are not SIP-approved and are not federally enforceable.
7. **Determine compliance:** Determine if all equipment and processes are complying with all requirements identified in Sections II and III. If each piece of equipment complies with all applicable requirements, complete and attach Form 500-A2 to certify the compliance status of the facility. If any piece of equipment is not in compliance with any of the applicable requirements, complete and attach Form 500-C2 in addition to Form 500-A2.

* The following AQMD rules and regulations are not required to be included in Section II and do not have to be added to Section III: Regulation I, List and Criteria in Regulation II, Rule 201, Rule 201.1, Rule 202, Rule 203, Rule 205, Rule 206, Rule 207, Rule 208, Rule 209, Rule 210, Rule 212, Rule 214, Rule 215, Rule 216, Rule 217, Rule 219, Rule 220, Rule 221, Regulation III, Regulation V, Regulation VIII, Regulation XII, Regulation XV, Regulation XVI, Regulation XIX, Regulation XXI, Regulation XXII, and Regulation XXX.

** Emission units adversely affected by the gap between current and SIP-approved versions of rules may initially be placed in a non-Title V portion of the permit

¹ Cleaning and painting activities qualify as trivial if they are not subject to VOC or HAP control requirements. Asphalt batch plant owners/operators must still get a permit if otherwise required.

² Moved by hand" means it can be moved without the assistance of any motorized or non-motorized vehicle, conveyor or device.

³ Brazing, soldering and welding equipment, and cutting torches related to manufacturing and construction activities that emit HAP metals are more appropriate for treatment as unpermitted equipment. Brazing, soldering, welding and cutting torches directly related to plant maintenance and upkeep and repair or maintenance shop activities that emit HAP metals are treated as trivial and listed separately in this appendix.

⁴ Many lab fume hoods or vents might qualify for treatment as unpermitted equipment.

⁵ Exemptions for storage tanks containing petroleum liquids or other volatile organic liquids should be based on size limits such as storage tank capacity and vapor pressure of liquids stored and are not appropriate for this list.

To provide the compliance status of your facility with applicable federally enforceable requirements, and identify other local only requirements, complete this form and attach to a completed compliance certification Form 500-A2. An appropriate, all-submitted Form 500-C2, as appropriate, should also be attached to this form.

PROCEDURES FOR DETERMINING COMPLIANCE STATUS

- 1 Equipment verification: Review the list of pending applications, and either the preliminary Title V facility permit or the list of current permits to operate that the AQMD provided you, to determine if they completely and accurately describe all equipment operating at the facility. Attach a statement to describe any discrepancies.
2 Identify applicable requirements*: Use the checklist in Section II to identify all applicable and federally-enforceable local, state, and federal rules and regulations, test methods, and monitoring, recordkeeping and reporting (MRR) requirements that apply to any equipment or process (including equipment exempt from a permit by Rule 219) at your facility. The potential applicable requirements, test methods and MRR requirements are identified and listed adjacent to each given equipment/process description. Check off each box adjacent to the corresponding requirement as it applies to your particular equipment/process. Note: Even if there is only one piece of equipment that is subject to a particular requirement, the appropriate box should be checked.
3 Identify additional applicable requirements*: Use Section III to identify any additional requirements not found in Section II. Section II is not a complete list of all applicable requirements. It does not include recently adopted NESHAP regulations by EPA or recent amendments to AQMD rules. Do not add rules listed in Section V here.
4 Identify any requirements that do not apply to a specific piece of equipment or process: Also use Section III to identify any requirements that are listed in Section II but that do not apply to a specific piece of equipment or process. Fill out Section III of this form and attach a separate sheet to explain the reason(s) why the identified rules do not apply. Note: Listing any requirement that does not apply to a specific piece of equipment will not provide the facility with a permit shield unless one is specifically requested by completing Form 500-D and is approved by AQMD.
5 Identify SIP-approved rules that are not current AQMD rules: Use Section IV to identify older versions of current AQMD rules that are the EPA-approved versions in the State Implementation Plan (SIP), and that are still applicable requirements as defined by EPA. The facility is not required to certify compliance with the items checked in Section IV provided that the non-SIP approved rule in Section II is at least as stringent as the older SIP-approved version in Section IV. **
6 Identify Local-Only Enforceable Regulatory Requirements: Use Section V to identify AQMD rules that are not SIP approved and are not federally enforceable.
7 Determine compliance: Determine if all equipment and processes are complying with all requirements identified in Sections II and III. If each piece of equipment complies with all applicable requirements, complete and attach Form 500-A2 to certify the compliance status of the facility. If any piece of equipment is not in compliance with any of the applicable requirements, complete and attach Form 500-C2 in addition to Form 500-A2.

* The following AQMD rules and regulations are not required to be included in Section II and do not have to be added to Section III: Regulation I, List and Criteria in Regulation II, Rule 201, Rule 201.1, Rule 202, Rule 203, Rule 205, Rule 206, Rule 207, Rule 208, Rule 209, Rule 210, Rule 212, Rule 214, Rule 215, Rule 216, Rule 217, Rule 219, Rule 220, Rule 221, Regulation III, Regulation V, Regulation VIII, Regulation XII, Regulation XV, Regulation XVI, Regulation XIX, Regulation XXII, and Regulation XXV.

** Emission units adversely affected by the gap between current and SIP approved versions of rules may initially be placed in a non-Title V portion of the permit.

Section II - CAM Status Summary for Emission Units

3. Based on the criteria in the instructions (check one and attach additional pages as necessary)

a. The emission units identified below are subject to the CAM rule¹ and a CAM plan² is attached for each affected emissions unit.

b. There are no emission units with control devices at this Title V facility that are subject to the CAM rule.

Emission Unit ³ (Application, Permit or Device No.)	Equipment Description ⁴	Uncontrolled Emissions		Connected to Control Unit ³ (Application, Permit or Device No.)	Equipment Description ⁴	Controlled Emissions	
		Pollutant	PTE ⁵ (tons/year)			Pollutant	PTE ⁵ (tons/year)

1. For more details of emission regulations that CAM may apply to, refer to Title V, Part 61 of the Federal Register and the Code of Federal Regulations, Title 40, Chapter I, Subchapter D. The rules can be accessed via the internet at: <http://www.ecp.aqmd.gov/aqmd/cam/camrules.html>.

2. Only one CAM plan is required for a control device that is a simple device that does not have any mechanical parts controlled by more than one control device, and a design and operation manual and operation and maintenance manuals are required for each control device.

3. List all new and existing emission units and the controlled control devices that are listed by AQMD application permit or device number. When the emission unit is new and has not yet been assigned an application number, leave this column blank.

4. Provide a brief equipment description of the emission units and control devices by indicating equipment type, make, and model and serial numbers as appropriate.

5. Potential to Emit.

Instructions for Determining Applicability to the CAM Rule

Use the following information to determine if an individually owned load up utility power unit is subject to 40 CFR Part 61, Section 64.1(b)(7)¹ the CAM rule applicable to each emission unit (excluding wet scrubbers) at a Title V facility that meets ALL of the following criteria:

1. The emission unit is subject to an emission limitation or standard² (often found in permit conditions)
2. The emission unit uses a control device to achieve compliance with the emission limitation or standard listed.
3. The emission unit has a potential to emit (PTE)⁴ either pre-control or post-control, depending on the type of Title V application. The PTE depends on permit conditions and source thresholds shown in the following table:

CAM Potential to Emit (PTE) Emission Threshold⁵ For Individual Emission Units at a Title V Facility (tons per year)			
Pollutant	South Coast Air Basin (SOCAB)	Riverside County Portion of Salton Sea Air Basin (SSAB) and Los Angeles County Portion of Mojave Desert Air Basin (MDAB)	Riverside County Portion of Mojave Desert Air Basin (MDAB)
VOC	10	25	100
NOx	10	25	100
SOx	100	100	100
CO	50	100	100
PM-10	70	70	100
1 HAP ⁷	10	10	10
2+ HAPs	25	25	25

1. The facility must affect the decarbonation response by 40 CFR Part 61, Section 64.2(b)(2) to determine if the load up utility power unit is subject to the standard work of peak demand or emergency generator load to actual emissions averaged over the last three calendar years of operation for 50% of the major sources source unit thresholds.

2. A permit document about the CAM rule can be found on the EPA website at <http://www.epa.gov/permits/cam.html>.

3. The permit document must have a Title V application, permit or regulation with a permit condition or regulation that requires the use of a control device to achieve compliance with the emission limitation or standard listed. The permit document must be approved by EPA or the State Implementation Plan (SIP) approved authority. The permit document must be approved by the State Implementation Plan (SIP) approved authority. The permit document must be approved by the State Implementation Plan (SIP) approved authority.

4. The permit document must be approved by EPA or the State Implementation Plan (SIP) approved authority. The permit document must be approved by the State Implementation Plan (SIP) approved authority. The permit document must be approved by the State Implementation Plan (SIP) approved authority.

5. The permit document must be approved by EPA or the State Implementation Plan (SIP) approved authority. The permit document must be approved by the State Implementation Plan (SIP) approved authority.

6. For more information on permit and permit revision applications submitted after June 23, 2007, see the <http://www.epa.gov/permits/cam.html> website to determine CAM applicability. For Title V permit revision applications, all initial, will-equivalent, and CAM applicability will be based on the permit condition listed.

7. The following table is based on Rule 5001 (Amended December 14, 1997) and Rule 5001 (Amended March 16, 2001). Please be advised that the threshold values may change based on rule amendments.

 Tel: (909) 396-3385
 www.aqmd.gov

The SCAGMD is required by state law, the California Environmental Quality Act (CEQA), to review discretionary permit project applications for potential air quality and other environmental impacts. This form is a screening tool to assist the SCAGMD in clarifying whether or not the project has the potential to generate significant adverse environmental impacts that might require preparation of a CEQA document (CEQA Guidelines § 15060 et seq.). Refer to the attached instructions for guidance in completing this form. For each Form 400-A application, also complete and submit one Form 400-CEQA. If submitting multiple Form 400-A applications for the same project at the same time, only one 400-CEQA form is necessary for the entire project. If you need assistance completing this form, contact Permit Services at (909) 396-3385 or (909) 396-2668.

If Yes is checked for any question in Section B, your application does not require additional evaluation for CEQA applicability. Skip to Section D - Signature, on page 2 and sign and date this form.

Section C - Review of Impacts Which May Trigger CEQA

Complete Part I by checking Yes or No as applicable. To avoid delays in processing your applications, explain all "Yes" responses on a separate sheet and attach it to this form.

	Yes	No	Part I - General
1.		<input checked="" type="checkbox"/>	Has this project generated any known public controversy regarding potential adverse impacts that may be generated by the project? (Controversy may be construed as concerns raised by local groups at public meetings, adverse media attention, or as negative articles in newspapers or other periodical publications, local news programs, environmental justice issues, etc.)
2.		<input checked="" type="checkbox"/>	Is this project part of a larger project? If yes, attach a separate sheet to briefly describe the larger project.

A project means the whole of an action which has a potential for resulting in physical change to the environment, including construction activities, clearing or grading of land, improvements to existing structures, and activities or equipment involving the issuance of a permit. For example, a project might include installation of a new modification of an existing internal combustion engine, dry-cleaning facility, boiler, gas turbine, screw cleaning boom, solvent cleaning tank, etc.

Part IX - Public Services

12		Will the project create a permanent need for new or additional public services in any of the following areas: (Check all that apply): a. Solid waste disposal? Check "No" if the projected potential amount of wastes generated by the project is less than five tons per day. b. Hazardous waste disposal? Check "No" if the projected potential amount of hazardous wastes generated by the project is less than 42 pounds per day, or equivalent in volume.
