San Francisco, CA 94105

FID: 08009
Permit: AP 13489
SSID: 01482

Re: Proposed Minor Permit Modification to Platform Hondo Part 70/APCD ATC/PTO 13489

Dear Mr. Rios:

This letter transmits Proposed Part 70 Minor Modification Permit to Operate No. 13489 for the Exxon - SYU Project Stationary Source. Included with this proposed permit is the permit application. The source is a major source of nitrogen oxides.

We plan to issue this permit as final after September 25, 2011 provided your office has not objected to such issuance before this date. If you have any questions regarding this permit, please call Jim Menno of my staff at (805) 614-6787.

Sincerely,

Michael Goldman, Manager
Engineering & Compliance Division

EQUIPMENT OWNER:

ExxonMobil Production Company

220113

EQUIPMENT OPERATOR:

ExxonMobil Production Company

EQUIPMENT LOCATION:

Platform Hondo, Parcel OCS P-0188

STATIONARY SOURCE/FACILITY:

Exxon - SYU Project
Platform Hondo

SSID: 01482

FID: 08009

AUTHORIZED MODIFICATION:

This permit incorporates existing fugitive emission component leak paths, currently categorized as de minimis at Platform Hondo, into the total permitted fugitive component leak path inventory. The emissions associated with this permit are required to be offset.

EQUIPMENT DESCRIPTION:

The equipment subject to this permit is listed in the table at the end of this permit.

PROJECT/PROCESS DESCRIPTION:

Platform Hondo is an offshore oil and gas platform which produces natural gas and crude oil. Emulsion and produced gas from Platform Hondo are shipped via sub-sea pipelines to onshore processing facilities in Las Flores Canyon approximately 20 miles west of Santa Barbara. Primary oil emulsion and gas separation takes place on Platform Hondo.

CONDITIONS:

9.A Standard Administrative Conditions

The following federally enforceable administrative permit conditions apply to Platform Hondo. In the case of a discrepancy between the wording of a condition and the applicable District rule, the wording of the rule shall control.

- A.1 **Condition Acceptance.** Acceptance of this operating permit by ExxonMobil shall be considered as acceptance of all terms, conditions, and limits of this permit. [Re: PTO 9100]
- A.2 **Grounds for Revocation.** Failure to abide by and faithfully comply with this permit or any Rule, Order, or Regulation may constitute grounds for revocation pursuant to California Health & Safety Code Section 42307 *et seq.* [Re: PTO 9100]
- A.3 **Defense of Permit.** ExxonMobil agrees, as a condition of the issuance and use of this PTO, to defend at its sole expense any action brought against the District because of issuance of this permit. ExxonMobil shall reimburse the District for any and all costs including, but not limited to, court costs and attorney's fees which the District may be required by a court to pay as a result of such action. The District may, at its sole discretion, participate in the defense of any such action, but such participation shall not relieve ExxonMobil of its obligation under this condition. The District shall bear its own expenses for its participation in the action. [Re: PTO 9100]
- A.4 **Reimbursement of Costs.** All reasonable expenses, as defined in District Rule 210, incurred by the District, District contractors, and legal counsel for all activities that follow the issuance of this PTO permit, including but not limited to permit condition implementation, implementation of Regulation XIII (*Part 70 Operating Permits*), compliance verification and emergency response, directly and necessarily related to enforcement of the permit shall be reimbursed by ExxonMobil as required by Rule 210. [Re: PTO 9100, District Rule 210]
- A.5 **Access to Records and Facilities.** As to any condition that requires for its effective enforcement the inspection of records or facilities by the District or its agents, ExxonMobil shall make such records available or provide access to such facilities upon notice from the District. Access shall mean access consistent with California Health and Safety Code Section 41510 and Clean Air Act Section 114A. [Re: PTO 9100]
- A.6 **Compliance.** Nothing contained within this permit shall be construed to allow the violation of any local, State or Federal rule, regulation, ambient air quality standard or air quality increment. [Re: PTO 9100]
- A.7 **Consistency with Analysis.** Operation under this permit shall be conducted consistent with all data, specifications and assumptions included with the application and supplements thereof (as documented in the District's project file) and the District's analyses under which this permit is

Authority to Construct/Permit to Operate 13489

Page 3 of 12

issued as documented in the Permit Analyses prepared for and issued with the permit. [Re: PTO 9100]

- A.8 **Consistency with State and Local Permits.** Nothing in this permit shall relax any air pollution control requirement imposed on the Santa Ynez Unit Project by:
- (a) The County of Santa Barbara in Final Development Plan Permit 87-DP-32cz and any subsequent modifications;
 - (b) The Santa Barbara County Air Pollution Control District in Authority to Construct 5651, Permit to Operate 5651, and any subsequent modifications to either permit; and
 - (c) The California Coastal Commission in the consistency determination for the Project with the California Coastal Act. [Re: PTO 9100]
- A.9 **Compliance with Department of Interior Permits.** ExxonMobil shall comply with all air quality control requirements imposed by the Department of the Interior in the *Plan of Development* approved for Platform Hondo on August 29, 1974 and any subsequent modifications. Such requirements shall be enforceable by the District. [Re: PTO 9100]
- A.10 **Compliance with Permit Conditions.**
- (a) The permittee shall comply with all permit conditions in Sections 9.A, 9.B and 9.C.
 - (b) This permit does not convey property rights or exclusive privilege of any sort.
 - (c) Any permit noncompliance with sections 9.A, 9.B, or 9.C constitutes a violation of the Clean Air Act and is grounds for enforcement action; for permit termination, revocation and re-issuance, or modification; or for denial of a permit renewal application.
 - (d) It shall not be a defense for the permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.
 - (e) A pending permit action or notification of anticipated noncompliance does not stay any permit condition.
 - (f) Within a reasonable time period, the permittee shall furnish any information requested by the Control Officer, in writing, for the purpose of determining:
 - (i) Compliance with the permit, or
 - (ii) Whether or not cause exists to modify, revoke and reissue, or terminate a permit or for an enforcement action.

Authority to Construct/Permit to Operate 13489

Page 4 of 12

- (g) In the event that any condition herein is determined to be in conflict with any other condition contained herein, then, if principles of law do not provide to the contrary, the condition most protective of air quality and public health and safety shall prevail to the extent feasible.

[Re: 40 CFR Part 70.6.(a)(6), District Rules 1303.D.1]

- A.11 **Emergency Provisions.** The permittee shall comply with the requirements of the District, Rule 505 (Upset/Breakdown rule) and/or District Rule 1303.F, whichever is applicable to the emergency situation. In order to maintain an affirmative defense under Rule 1303.F, the permittee shall provide the District, in writing, a “notice of emergency” within 2 working days of the emergency. The “notice of emergency” shall contain the information/documentation listed in Sections (1) through (5) of Rule 1303.F. [Re: 40 CFR 70.6(g), District Rule 1303.F]
- A.12 **Compliance Plans.**
 - (a) The permittee shall comply with all federally enforceable requirements that become applicable during the permit term in a timely manner.
 - (b) For all applicable equipment, the permittee shall implement and comply with any specific compliance plan required under any federally-enforceable rules or standards. [Re: District Rule 1302.D.2]
- A.13 **Right of Entry.** The Regional Administrator of USEPA, the Control Officer, or their authorized representatives, upon the presentation of credentials, shall be permitted to enter upon the premises where a Part 70 Source is located or where records must be kept:
 - (a) To inspect the stationary source, including monitoring and control equipment, work practices, operations, and emission-related activity;
 - (b) To inspect and duplicate, at reasonable times, records required by this Permit to Operate;
 - (c) To sample substances or monitor emissions from the source or assess other parameters to assure compliance with the permit or applicable requirements, at reasonable times. Monitoring of emissions can include source testing. [Re: District Rule 1303.D.2]
- A.14 **Severability.** The provisions of this Permit to Operate are severable and if any provision of this Permit to Operate is held invalid, the remainder of this Permit to Operate shall not be affected thereby. [Re: District Rules 103 and 1303.D.1]
- A.15 **Permit Life.** The Part 70 permit shall become invalid three years from the date of issuance unless a timely and complete renewal application is submitted to the District. Any operation of the source to which this Part 70 permit is issued beyond the expiration date of this Part 70 permit and without a valid Part 70 operating permit (or a complete Part 70 permit renewal application) shall be a violation of the CAAA, § 502(a) and 503(d) and of the District rules.

Authority to Construct/Permit to Operate 13489

Page 5 of 12

- (a) The permittee shall apply for renewal of the Part 70 permit no later than 6 months before the date of the permit expiration. Upon submittal of a timely and complete renewal application, the Part 70 permit shall remain in effect until the Control Officer issues or denies the renewal application. [Re: District Rule 1304.D.1]
- A.16 **Payment of Fees.** The permittee shall reimburse the District for all its Part 70 permit processing and compliance expenses for the stationary source on a timely basis. Failure to reimburse on a timely basis shall be a violation of this permit and of applicable requirements and can result in forfeiture of the Part 70 permit. Operation without a Part 70 permit subjects the source to potential enforcement action by the District and the USEPA pursuant to section 502(a) of the Clean Air Act. [Re: District Rules 1303.D.1 and 1304.D.11, 40 CFR 70.6(a)(7)]
- A.17 **Prompt Reporting of Deviations.** The permittee shall submit a written report to the District documenting each and every deviation from the requirements of this permit or any applicable federal requirements within 7 days after discovery of the violation, but not later than 6 months after the date of occurrence. The report shall clearly document:
- (a) The probable cause and extent of the deviation,
- (b) Equipment involved,
- (c) The quantity of excess pollutant emissions, if any, and
- (d) Actions taken to correct the deviation.
- (e) The requirements of this condition shall not apply to deviations reported to District in accordance with Rule 505. Breakdown Conditions, or Rule 1303.F Emergency Provisions. [District Rule 1303.D.1, 40 CFR 70.6(a) (3)]
- A.18 **Reporting Requirements/Compliance Certification.** The permittee shall submit compliance certification reports to the USEPA and the Control Officer every six months. These reports shall be submitted on District approved forms and shall identify each applicable requirement/condition of the permit, the compliance status with each requirement/condition, whether the compliance was continuous or intermittent, and include detailed information on the occurrence and correction of any deviations from permit requirement. The reporting periods shall be each half of the calendar year, e.g., January through June for the first half of the year. These reports shall be submitted by September 1st and March 1st, respectively, each year. Supporting monitoring data shall be submitted in accordance with the "Semi-Annual Compliance Verification Report" condition in section 9.C. The permittee shall include a written statement from the responsible official, which certifies the truth, accuracy, and completeness of the reports. [Re: District Rules 1303.D.1, 1302.D.3, 1303.2.c]
- A.19 **Federally Enforceable Conditions.** Each federally enforceable condition in this permit shall be enforceable by the USEPA and members of the public. None of the conditions in the District-only enforceable section of this permit are federally enforceable or subject to the public/USEPA review [Re: CAAA, § 502(b)(6), 40 CFR 70.6(b)]

- A.20 **Recordkeeping Requirements.** The permittee shall maintain records of required monitoring information that include the following:
- (a) The date, place as defined in the permit, and time of sampling or measurements;
 - (b) The date(s) analyses were performed;
 - (c) The company or entity that performed the analyses;
 - (d) The analytical techniques or methods used;
 - (e) The results of such analyses; and
 - (f) The operating conditions as existing at the time of sampling or measurement;
 - (g) The records (electronic or hard copy), as well as all supporting information including calibration and maintenance records, shall be maintained for a minimum of five (5) years from date of initial entry by the permittee and shall be made available to the District upon request. [*Re: District Rule 1303.D.1.f, 40 CFR 70.6(a)(3)*]
- A.21 **Conditions for Permit Reopening.** The permit shall be reopened and revised for cause under any of the following circumstances:
- (a) Additional Requirements: If additional applicable requirements (e.g., NSPS or MACT) become applicable to the source which has an unexpired permit term of three (3) or more years, the permit shall be reopened. Such a reopening shall be completed no later than 18 months after promulgation of the applicable requirement. However, no such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended. All such re-openings shall be initiated only after a 30 day notice of intent to reopen the permit has been provided to the permittee, except that a shorter notice may be given in case of an emergency.
 - (b) Inaccurate Permit Provisions: If the District or the USEPA determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emission standards or other terms or conditions of the permit, the permit shall be reopened. Such re-openings shall be made as soon as practicable.
 - (c) Applicable Requirement: If the District or the USEPA determines that the permit must be revised or revoked to assure compliance with any applicable requirement including a federally enforceable requirement, the permit shall be reopened. Such re-openings shall be made as soon as practicable.
 - (d) Administrative procedures to reopen a permit shall follow the same procedures as apply to initial permit issuance. Re-openings shall affect only those parts of the permit for which cause to reopen exists.

- (e) If a permit is reopened, the expiration date does not change. Thus, if the permit is reopened, and revised, then it will be reissued with the expiration date applicable to the reopened permit. [Re: 40 CFR 70.7(f), 40 CFR 70.6(a)]

A.22 **Credible Evidence.** Nothing in this permit shall alter or affect the ability of any person to establish compliance with, or a violation of, any applicable requirement through the use of credible evidence to the extent authorized by law. Nothing in this permit shall be construed to waive any defenses otherwise available to the permittee, including but not limited to, any challenge to the Credible Evidence Rule (see 62 Fed. Reg. 8314, Feb. 24, 1997), in the context of any future proceeding. [Re: 40 CFR 52.12(c)]

9.B. Generic Conditions

The generic conditions listed below apply to all emission units, regardless of their category or emission rates. These conditions are federally enforceable. In the case of a discrepancy between the wording of a condition and the applicable District rule, the wording of the rule shall control.

- B.1 **Circumvention (Rule 301).** A person shall not build, erect, install, or use any article, machine, equipment or other contrivance, the use of which, without resulting in a reduction in the total release of air contaminants to the atmosphere, reduces or conceals an emission which would otherwise constitute a violation of Division 26 (Air Resources) of the Health and Safety Code of the State of California or of these Rules and Regulations. This Rule shall not apply to cases in which the only violation involved is of Section 41700 of the Health and Safety Code of the State of California, or of District Rule 303. [Re: District Rule 301]
- B.2 **Visible Emissions (Rule 302).** ExxonMobil shall not discharge into the atmosphere from any single source of emission any air contaminants for a period or periods aggregating more than three minutes in any one hour which is:
 - (a) As dark or darker in shade as that designated as No. 1 on the Ringelmann Chart, as published by the United States Bureau of Mines, or
 - (b) Of such opacity as to obscure an observer's view to a degree equal to or greater than does smoke described in subsection B.2.(a) above.
 - (c) ExxonMobil shall determine compliance with the requirements of this Condition/Rule and Condition C.49. [Re: District Rule 302]
- B.3 **Nuisance (Rule 303).** No pollutant emissions from any source at ExxonMobil shall create nuisance conditions. No operations shall endanger health, safety or comfort, nor shall they damage any property or business. [Re: District Rule 303]
- B.4 **PM Concentration - South Zone (Rule 305).** ExxonMobil shall not discharge into the atmosphere, from any source, particulate matter in excess of the concentrations listed in Table 305(a) of Rule 305. [Re: District Rule 305]

B.5 **Contaminants (Rule 309).** ExxonMobil shall not discharge into the atmosphere from any single source sulfur compounds, hydrogen sulfide, combustion contaminants and carbon monoxide in excess of the standards listed in Sections A, B and G of Rule 309. ExxonMobil shall not discharge into the atmosphere from any fuel burning equipment unit, sulfur compounds, nitrogen oxides or combustion contaminants in excess of the standards listed in Section E and F of Rule 309. [*Re: District Rule 309*]

9.C Requirements and Equipment Specific Conditions

This section contains non-generic federally-enforceable conditions, including emissions and operations limits, monitoring, recordkeeping, and reporting for each specific equipment group. This section may also contain other non-generic conditions. Permit condition 9.C.3 supersedes permit condition 9.C.3 of PTO 9100-R4 and condition 9.C.14 modifies permit condition 9.C.14 of PTO 9100-R4. All remaining permit conditions of PTO 9100-R4 remain in full force and effect.

C.3 **Fugitive Hydrocarbon Emissions Components.** The following equipment are included in this emissions unit category:

Device Name	APCD Device No	Device Name	APCD Device No
<i>Fugitive Components - Gas</i>		<i>Fugitive Components - Oil</i>	
Valve/Connection - Accessible	102281	Valve/Connection - Accessible	4964/113967
Valve/Connection - Unsafe	102282	Valve/Connection - Category B	102279
Valve/Connection - Category B	102283	Valve/Connection - Category F	102280
Valve/Connection - Category F	102284	Valve/Connection - Unsafe	113968

- a. Emission Limits: Mass emissions from the gas/light liquid service (sub-total) and oil service (sub-total) components listed above shall not exceed the limits listed in Tables 5.3 and 5.4. Compliance with this condition shall be based on actual component-leakpath counts as documented through the monitoring, recordkeeping and reporting conditions in this permit.
- b. Operational Limits: Operation of the equipment listed in this section shall conform to the requirements listed in District Rule 331.D and E. Compliance with these limits shall be assessed through compliance with the monitoring, recordkeeping and reporting conditions in this permit. In addition ExxonMobil shall meet the following requirements:

Authority to Construct/Permit to Operate 13489

Page 9 of 12

- (i) *VRS Use* - The vapor recovery and gas collection (VR & GC) systems at Platform Hondo shall be in operation when equipment connected to these systems are in use. These systems include piping, valves, and flanges associated with the VR & GC systems. The VR & GC systems shall be maintained and operated to minimize the release of emissions from all systems, including pressure relief valves and gauge hatches.
- (ii) *I&M Program* - The District-approved I&M Plan, *Fugitive Emissions Inspection and Maintenance Program for Platform Hondo* shall be implemented for the life of the project. The Plan, and any subsequent District approved revisions, is incorporated by reference as an enforceable part of this permit.
- (iii) *Leakpath Count* - The total component-leakpath count listed in ExxonMobil's most recent I&M component-leakpath inventory shall not exceed the component-leakpath sub-totals listed in Table 5.1 by more than five percent. This five percent range is to allow for minor differences due to component counting methods and does not constitute allowable emissions growth due to the addition of new equipment.
- (iv) *Venting* - All routine venting of hydrocarbons shall be routed to either the main gas compressors, flare header, injection wells or other District-approved control device.
- (v) *BACT* - ExxonMobil shall apply BACT, as defined in Table 4.1 of PTO 9100-R4 to all component- leakpaths in hydrocarbon service for the Hondo Topsides Integration Project for the life of the project.
- (vi) *Rule 331 BACT* - The component-leakpaths in hydrocarbon service listed in Table 4.2 of PTO 9100-R4 are subject to BACT requirements pursuant to Rule 331. BACT, as defined in Table 4.2 of PTO 9100-R4, shall be implemented for the life of the project.
- (vii) *Category B Requirements* - Component-leakpaths monitored quarterly at less than 500 ppmv shall achieve a mass emission control efficiency of 85 percent. Category B component-leakpaths are defined as component-leakpaths associated with closed vent systems (e.g., vapor recovery systems) for which screening values are maintained at or below 500 ppmv as methane, monitored per EPA Reference Method 21. Category B component-leakpaths also include components subject to enhanced fugitive inspection and maintenance programs for which screening values are also maintained at or below 500 ppmv as methane, monitored per EPA Reference Method 21. For Category B components, screening values above 500 ppmv shall trigger the Rule 331 repair process per the minor leak schedule.
- (viii) *Category F Requirements* - Low emitting design component-leakpaths monitored quarterly at less than 100 ppmv shall achieve a mass emission control efficiency of 90 percent. Category F component-leakpaths are subject to BACT per Rule 331 for

Authority to Construct/Permit to Operate 13489

Page 10 of 12

which screening values are maintained at or below 100 ppmv as methane, monitored per EPA Reference Method 21. For Category F components, screening values above 100 ppmv shall trigger the Rule 331 repair process per the minor leak schedule.

- c. Monitoring: The equipment listed in this section are subject to all the monitoring requirements listed in District Rule 331.F. The test methods in Rule 331.H shall be used.
 - d. Recordkeeping: The equipment listed in this section are subject to all the recordkeeping requirements listed in District Rule 331.G. In addition, ExxonMobil shall:
 - (i) *I&M Log* - ExxonMobil shall record in a log the following: a record of leaking components found (including name, location, type of component, date of leak detection, the ppmv or drop-per-minute reading, date of repair attempts, method of detection, date of re-inspection and ppmv or drop-per-minute reading following repair); a record of the total components inspected and the total number and percentage found leaking by component type; a record of leaks from critical components; a record of leaks from components that incur five repair actions within a continuous 12-month period; and, a record of component repair actions including dates of component re-inspections. For the purpose of the above paragraph, a leaking component is any component which exceeds the applicable limit:
 - (1) greater than 1,000 ppmv for minor leaks under Rule 331 (includes Accessible/Inaccessible components, Category A, Category H, and Category I components);
 - (2) greater than 100 ppmv for components subject to current BACT (includes Bellows, Category F and Category G)
 - (3) greater than 100 ppmv for components subject to enhanced fugitive inspection and maintenance programs (Category C and Category E)
 - (4) greater than 500 ppmv for components subject to enhanced fugitive inspection and maintenance programs (Category B and Category D)
 - e. Reporting: The equipment listed in this section are subject to all the reporting requirements listed in District Rule 331.G. Within one calendar quarter whenever there is a change in the component list or diagrams, ExxonMobil shall provide an updated fugitive hydrocarbon component inventory per Rule 331.I. On a semi-annual basis, a report detailing the previous six month's activities shall be provided to the District. The report must list all data required by the *Compliance Verification Reports* condition of PTO 9100-R4. (Re: *District Rules 331 and 1303, ATC 9037, ATC 9044, ATC 9044-01, PTO 9100, ATC/PTO 10041, 40 CFR 70.6*)
- C.13 **Offsets - NSR.** ExxonMobil shall offset all emissions of reactive organic compounds (ROC) associated with the issuance of ATC 9037, ATC 9044 and ATC 9044-01 as detailed in Section 7 of PTO 9100-R4 and Table 7.1 of this permit. Emission reduction credits sufficient to offset the

permitted quarterly ROC emissions shall be in place for the life of the project. [Re: ATC 9037, ATC 9044, ATC 9044-01, PTO 9100]

9.D Requirements and Equipment Specific Conditions

The following section lists permit conditions that are not federally enforceable (i.e., not enforceable by the USEPA or the public). However, these conditions are enforceable by the District and the State of California. These conditions have been determined as being necessary to ensure that operation of the facility complies with all applicable local and state air quality rules, regulations and laws. Failure to comply with any of these conditions shall be a violation of District Rule 206, this permit, as well as any applicable section of the California Health & Safety Code.

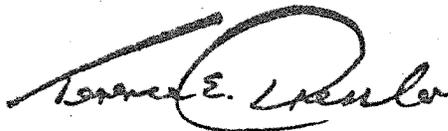

D.1 Permit Activation. All aspects of this permit are enforceable by the District and the State of California upon the issuance date stamped below. The Part 70 aspects of this permit are not final until:

- (a) The USEPA has either provided written comments to the District and these comments require no modification to this permit or the USEPA does not provide written comments during their review period. The District will issue a letter stating that this permit is a final Part 70 permit. The effective date that this permit will be considered a final Part 70 permit will be the date stamped on the District's letter.

Authority to Construct/Permit to Operate 13489

Page 12 of 12

- (b) After the USEPA has provided the District written comments that require a modification to this permit, the District will modify this permit to address the USEPA's comments and issue the Part 70 permit as final. The re-issued permit will supersede this permit in its entirety.

7. ERC # 0235-0811 ^(h)	0.013	0.052	1.2	0.011	0.044
Total Offsets:	2.68	10.73		1.60	6.39

Notes:

- (a) Ratios set according to District Guidelines and based on source distance from the SYU project. The discounted offset values shown are the undiscounted offset values divided by the discount ratio.
- (b) ERCs from removal of OS&T.
- (c) ERC Certificate #0079 is for ERCs generated due the shutdown of McGhan Medical Corporation's Carpinteria facility.
- (d) ERC Certificate #0080 is for ERCs generated due the shutdown of McGhan Medical Corporation's Goleta facility at 600 Pine Avenue.
- (e) ERC Certificate #0081 is for ERCs generated due the shutdown of BioEnterics Corporation facility at 1035 Cindy Lane in Carpinteria.
- (f) ERC Certificate #0083 is for ERCs generated due the shutdown of Grefco's Lompoc diatomaceous earth processing plant.
- (g) ERC Certificate #0188 is for ERCs generated due the installation of low NOx engines on the M/V Broadbill. Inter-pollutant trade - NOx for ROC.
- (h) ERC Certificate #0811 is for ERCs generated by repowerin of the M/V Broadbill.

**PERMIT EVALUATION FOR
AUTHORITY TO CONSTRUCT/PERMIT TO OPERATE 13489**

Page 1 of 3

1.0 BACKGROUND

- 1.1 General: Project modifications have occurred at Platform Hondo for which the emissions associated with fugitive emission components have qualified as de minimis. This permit action incorporates all the existing fugitive emission component leak paths (clps) currently categorized as de minimis at Platform Hondo, into the total fugitive clp count currently permitted at this facility.
- 1.2 Permit History: Platform Hondo is an offshore oil and gas platform which produces natural gas and crude oil. Primary separation occurs at the platform prior to shipment to Las Flores Canyon. See PTO 9100-R4 for a brief description of all permit modifications that have been issued.

2.0 ENGINEERING ANALYSIS

- 2.1 Equipment/Processes: The additional clps subject to this permit action consist of 50 valve/connection clps (oil service) and 43 valve/connection clps (oil service - unsafe). These clps represent the total number of de minimis fugitive emission clps currently inventoried at Platform Hondo. Following issuance of this permit, there will be no de minimis clps at the platform.
- 2.2 Emission Controls: There are no emission controls associated with this permit action.
- 2.3 Emission Factors: Emission factors are documented in Table 5.2 of this permit.
- 2.4 Reasonable Worst Case Emission Scenario: Worst case emissions are based on facility operations 24 hours/day, 365 days/year.
- 2.5 Emission Calculations: The total emission increase from the additional clps is 0.233 lb/day ROC and 0.011 tpy ROC. Detailed emission calculation spreadsheets are provided in Tables 5.1 through 5.6. The additional clps have been included in these tables.
- 2.6 Special Calculations: There are no special calculations.
- 2.7 BACT Analyses: Best Available Control Technology was not required for this project.

PERMIT EVALUATION FOR
AUTHORITY TO CONSTRUCT/PERMIT TO OPERATE 13489

Page 2 of 3

- 2.8 Enforceable Operational Limits: The enforceable operating limits are listed in permit condition 9.C.3(b) of this permit.
- 2.9 Monitoring Requirements: Monitoring of fugitive emissions is required per condition 9.C.3(c) of this permit.
- 2.10 Recordkeeping and Reporting Requirements: Recordkeeping and reporting is required per condition 9.C.3(d) and 9.C.3(e) of this permit.

3.0 REEVALUATION REVIEW (not applicable)

4.0 REGULATORY REVIEW

- 4.1 Partial List of Applicable Rules: This project is anticipated to operate in compliance with the following rules:

- Rule 101. Compliance of Existing Facilities
- Rule 201. Permits Required
- Rule 202. Exemptions to Rule 201
- Rule 205. Standards for Granting Permits
- Rule 302. Visible Emissions
- Rule 303. Nuisance
- Rule 309. Specific Contaminants
- Rule 331. Fugitive Emissions Inspection and Maintenance
- Rule 505. Breakdown Procedures
- Rule 801. New Source Review
- Rule 802. Nonattainment Review
- Rule 803. Prevention of Significant Deterioration

- 4.2 Rules Requiring Review: None.

- 4.3 NEI Calculations: The net emission increase calculation is used to determine whether new source review (NSR) requirements must be applied to a project (e.g., offsets, AQIA, PSD BACT). The emissions associated with this permit action constitute NEI. The appropriate NSR requirements have been applied as discussed in this engineering evaluation.

5.0 AQIA

This permit action is not subject to the Air Quality Impact Analysis requirements of Regulation VIII.

6.0 OFFSETS/ERCs

- 6.1 Offsets: The emissions associated with this permit action do not exceed the offset thresholds of Rule 802, however, the Exxon SYU Project stationary source exceeds these offset thresholds for

PERMIT EVALUATION FOR
AUTHORITY TO CONSTRUCT/PERMIT TO OPERATE 13489

Page 3 of 3

NO_x, ROC, PM, PM₁₀ and SO₂. Thus, the ROC emissions associated with this permit action are required to be offset. Emission Reduction Credit certificate 0235-0811 (M/V Broadbill repower) was used to provide reductions at a 1.2 to 1 offset ratio, as documented in Table 7.1.

6.2 ERCs: This project does not generate emission reduction credits.

7.0 AIR TOXICS

An air toxics health risk assessment was not performed for this permitting action.

8.0 CEQA / LEAD AGENCY

The District is the lead agency for CEQA for this project. This project is a minor modification of an existing facility involving no expansion of use beyond that previously existing, therefore this project is exempt from CEQA pursuant to Appendix A of the District's CEQA guidelines.

9.0 SCHOOL NOTIFICATION

A school notice pursuant to the requirements of H&SC §42301.6 was not required.

10.0 PUBLIC and AGENCY NOTIFICATION PROCESS/COMMENTS ON DRAFT PERMIT

This permit was not subject to the public notice requirements of Rule 802 and 803. There were only minor comments on the draft permit.

11.0 FEE DETERMINATION

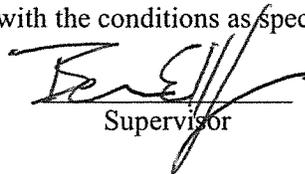

Fees for this permit are assessed under the cost reimbursement provisions of Rule 210.

12.0 RECOMMENDATION

It is recommended that this permit be granted with the conditions as specified in the permit.
