Re: **Owens-Brockway Glass Container– Facility #A0030**  
Administrative Permit Amendment / Minor Modification

Dear Ms. Jordan:

This is to advise you that the Bay Area Air Quality Management District has made administrative permit amendments and minor modifications to the Major Facility Review Permit for Owens-Brockway Glass Container (Facility Number A0030).

In response to Owens-Brockway's appeal of their Title V permit, the District is proposing minor modifications to make the following changes:

- The daily capacity of S11 and S12, Glass Furnaces, has been corrected from 201 and 177 tons per day, respectively, to 357 and 314 tons per day. This change will bring the daily capacity in line with the annual production allowed by the existing permit conditions.
- The capacity of S39, Raw Material Unloading Station, has been corrected from 1.7 lb/hr to 60 tons per hour.
- The deadline for installation of the continuous emission monitor for NO<sub>x</sub> at S10, Glass Furnace, has been extended to October 1, 2000.
- The recordkeeping for glass production at the furnaces has been changed from a monthly to a daily basis, and a recordkeeping procedure has been added.

The District has also made administrative amendments to standardize the wording of Section I, Standard Conditions, and to make changes to the dates of District rules.

The District has made a preliminary decision to issue the Major Facility Review Permit, but the final decision on the permit issuance will consider EPA comments on this preliminary decision.

A strikeout/underline copy of the modified Major Facility Review Permit is enclosed for your information. If you have any questions on this matter, please call **Gregory Solomon, Air Quality Engineer II, at (415) 749-4715**.

Very truly yours,

Ellen Garvey, Executive Officer/  
Air Pollution Control Officer
