The descriptions for all sections of your Facility Permit are included below in Section I – Facility Permit Description. Please note that AQMD Rule 216 also provides you with an opportunity to appeal the terms and conditions of the Facility Permit by petitioning the Hearing Board as described below in Section II – Appeals.

I. FACILITY PERMIT DESCRIPTION

The enclosed Facility Permit contains the following sections as described below:

Section A: This section contains pertinent information relating to your facility. Please note your facility is a Cycle 1 facility. The compliance year for Cycle 1 is from January 1 of each year to December 31 of the next year.

Section B: This section contains annual emission allocations for your facility, if applicable.

Sect D & H: Sections D and H of your RECLAIM/Title V Facility Permit list emission sources at your facility that have been issued a Permit to Operate or a Permit to Construct along with permit conditions for emission sources at your facility. The following principles were used to develop these sections of the permit:

- Each source of emission and air pollution control equipment was assigned a special identification (ID) number. Based on your comments and additional information we received the device ID number may have been changed from the draft permit you received.
- The only equipment listed in your permit are those with emission potentials. The only non-emitting equipment listed are those that are associated with requirements of a specific AQMD rule. The listing of non-emitting equipment do not have any identification numbers assigned to them.
- All equipment exempt under Rule 219 are aggregated and listed together in Appendix A. If your facility is subject to Title V regulations, your exempt equipment may be listed in Section D instead of Appendix A.
- All fugitive sources are aggregated and listed together in your permit.

Section E: This section contains administrative conditions that apply to all permitted equipment operating at your facility.

Section F: This section highlights some of the monitoring and source testing requirements in Rule 2011 for SO_x and Rule 2012 for NO_x.

- Section G: This section contains key recordkeeping and reporting requirements in Rule 2011 for SO_x and 2012 for Rule NO_x.
- Section I: This section lists all compliance plans and conditions that have been approved by AQMD. All approved compliance plans for your facility must be included in this section.
- Section K: This section contains administrative conditions for facilities that are subject to Title V.
- Appendix A: This appendix will list all NO_x and SO_x equipment exempt from written permit pursuant to Rule 219 at your facility. If your facility currently operates any NO_x and/or SO_x emitting equipment exempt from written permit pursuant to Rule 219, please make a list of all these equipment and submit this list with your Facility Permit Comments.
- Appendix B: This appendix lists all applicable rule emission limits for facilities that are subject to Title V regulation.

II. APPEALS

As mentioned above, if you determine that certain changes or clarifications need to be made to the description of equipment or permit conditions in any section of your permit, you may appeal the terms and conditions by petitioning the Hearing Board within 30 days of the receipt of the enclosed permit. If you determine there are administrative errors in these sections of your permit, please notify AQMD staff within 30 days of the receipt of your permit. Your facility is still bound by the requirements of your enclosed Facility Permit while your appeal is under consideration by AQMD staff and/or the Hearing Board.

Please note that Condition F52.1 in Section H of your Facility Permit specifies that Walnut Creek Energy, LLC shall not start operation of any equipment until both boiler units 3 and 4 currently located at AES Huntington Beach Generating Station have been retired and permits for boiler units 3 and 4 have been surrendered. Please also note that Conditions I296.1 and I296.3 in Section H of your Facility Permit requires that prior to operation of these equipment for each compliance year, Walnut Creek Energy, LLC shall hold NO_x and SO_x RECLAIM Trading Credits (RTCs) as specified in these conditions.

If you have any comments or questions regarding this letter, please contact Mr. Brian Yeh, Senior Manager at (909) 396-2584. For any questions regarding your facility permit, please contact Mr. Kenneth L. Coats at (909) 396-2527 or Mr. John Yee at (909) 396-2531.

The operator shall comply with the terms and conditions set forth below:

For the purpose of this condition, the PM emission limit shall be defined as particulate matter with aerodynamic diameter of 2.5 microns or less.

The CO emission limit of 112.96 tons per year in this condition shall only apply during non-commissioning years. The total annual CO emissions during the commissioning year shall not exceed 134.6 tons per year

The operator shall calculate the monthly emissions for PM_{2.5} and CO using the equation below and the following emission factors:

Monthly emissions, lb/month = x (EF); where x = monthly fuel usage in mmcf/month and EF = emission factor indicated above

Compliance with the CO emission limit shall be verified through valid CEMS data.

The operator shall calculate the emission limits for the purpose of determining compliance with the CO limit in the absence of valid CEMS data by using the above equation and the following emission factors:

A) During the commissioning period and prior to CO catalyst installation - 125.87 lb CO/mmcf

B) After installation of the CO catalyst but prior to CO CEMS certification testing - 13.76 lb CO/mmcf. The emission rate shall be recalculated in accordance with condition D82.1 if the approved CEMS certification test results in emission concentration higher than 4 ppmv.

C) After CO CEMS certification testing - 13.76 lb CO/mmcf. After CO CEMS certification test is approved by the AQMD, the emissions monitored by the CEMS and calculated in accordance with condition D82.1 shall be used to calculate emissions

For the purpose of this condition, the yearly emission limit shall be defined as a period of 12 consecutive months determined on a rolling basis with a new 12 month period beginning on the first day of each calendar month

FACILITY PERMIT TO OPERATE WALNUT CREEK ENERGY PARK

SECTION H: PERMIT TO CONSTRUCT AND TEMPORARY PERMIT TO OPERATE

The operator shall comply with the terms and conditions set forth below:

For the purpose of this condition, the PM emission limit shall be defined as particulate matter with aerodynamic diameter of 2.5 microns or less.

The CO emission limit of 112.96 tons per year in this condition shall only apply during non-commissioning years. The total annual CO emissions during the commissioning year shall not exceed 134.6 tons per year

The operator shall calculate the monthly emissions for PM_{2.5} and CO using the equation below and the following emission factors:

Monthly emissions, lb/month = x (EF); where x = monthly fuel usage in mmcf/month and EF = emission factor indicated above

Compliance with the CO emission limit shall be verified through valid CEMS data.

The operator shall calculate the emission limits for the purpose of determining compliance with the CO limit in the absence of valid CEMS data by using the above equation and the following emission factors:

A) During the commissioning period and prior to CO catalyst installation - 125.87 lb CO/ mmcf

B) After installation of the CO catalyst but prior to CO CEMS certification testing - 13.76 lb CO/mmcf. The emission rate shall be recalculated in accordance with condition D82.1 if the approved CEMS certification test results in emission concentration higher than 4 ppmv.

C) After CO CEMS certification testing - 13.76 lb CO/mmcf. After CO CEMS certification test is approved by the AQMD, the emissions monitored by the CEMS and calculated in accordance with condition D82.1 shall be used to calculate emissions

For the purpose of this condition, the yearly emission limit shall be defined as a period of 12 consecutive months determined on a rolling basis with a new 12 month period beginning on the first day of each calendar month

FACILITY PERMIT TO OPERATE WALNUT CREEK ENERGY PARK

SECTION K: TITLE V Administration EMERGENCY PROVISIONS

17. An emergency¹ constitutes an affirmative defense to an action brought for noncompliance with a technology-based emission limit only if:
- (A) Properly signed, contemporaneous operating records or other credible evidence demonstrate that:
 - (1) An emergency occurred and the operator can identify the cause(s) of the emergency;
 - (2) The facility was operated properly (i.e. operated and maintained in accordance with the manufacturer's specifications, and in compliance with all regulatory requirements or a compliance plan), before the emergency occurred;
 - (3) The operator took all reasonable steps to minimize levels of emissions that exceeded emissions standard, or other requirements in the permit; and,
 - (4) The operator submitted a written notice of the emergency to the AQMD within two working days of the time when the emissions limitations were exceeded due to the emergency. The notice shall contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken; and
 - (B) The operator complies with the breakdown provisions of Rule 430 – Breakdown Provisions, or subdivision (i) of Rule 2004 – Requirements, whichever is applicable. [3002(g), 430, 2004(i)]
18. The operator is excused from complying with any regulatory requirement that is suspended by the Executive Officer during a state of emergency or state of war emergency, in accordance with Rule 118 - Emergencies. [118]

¹ "Emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the operator, including acts of God, which: (A) requires immediate corrective action to restore normal operation; and (B) causes the facility to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency; and (C) is not caused by improperly designed equipment, lack of preventative maintenance, careless or improper operation, or operator error.

FACILITY PERMIT TO OPERATE WALNUT CREEK ENERGY PARK

SECTION K: TITLE V Administration RECORDKEEPING PROVISIONS

19. In addition to any other recordkeeping requirements specified elsewhere in this permit, the operator shall keep records of required monitoring information, where applicable, that include:

- (A) The date, place as defined in the Title V permit, and time of sampling or measurements;
- (B) The date(s) analyses were performed;
- (C) The company or entity that performed the analyses;
- (D) The analytical techniques or methods used;
- (E) The results of such analyses; and
- (F) The operating conditions as existing at the time of sampling or measurement. [3004(a)(4)(B)]

20. The operator shall maintain records pursuant to Rule 109 and any applicable material safety data sheet (MSDS) for any equipment claimed to be exempt from a written permit by Rule 219 based on the information in those records. [219(t)]

21. The operator shall keep all records of monitoring data required by this permit or by regulatory requirements for a period of at least five years from the date of the monitoring sample, measurement, report, or application. [3004(a)(4)(E)]

REPORTING PROVISIONS

22. The operator shall comply with the following requirements for prompt reporting of deviations:

- (A) Breakdowns shall be reported as required by Rule 430 – Breakdown Provisions or subdivision (i) of Rule 2004 - Requirements, whichever is applicable.

FACILITY PERMIT TO OPERATE WALNUT CREEK ENERGY PARK

SECTION K: TITLE V Administration

- (B) Other deviations from permit or applicable rule emission limitations, equipment operating conditions, or work practice standards, determined by observation or by any monitoring or testing required by the permit or applicable rules that result in emissions greater than those allowed by the permit or applicable rules shall be reported within 72 hours (unless a shorter reporting period is specified in an applicable State or Federal Regulation) of discovery of the deviation by contacting AQMD enforcement personnel assigned to this facility or otherwise calling (800) CUT-SMOG.
- (C) A written report of such deviations reported pursuant to (B), and any corrective actions or preventative measures taken, shall be submitted to AQMD, in an AQMD approved format, within 14 days of discovery of the deviation.
- (D) All other deviations shall be reported with the monitoring report required by condition no. 23. [3004(a)(5)]
23. Unless more frequent reporting of monitoring results are specified in other permit conditions or in regulatory requirements, the operator shall submit reports of any required monitoring to the AQMD at least twice per year. The report shall include a) a statement whether all monitoring required by the permit was conducted; and b) identification of all instances of deviations from permit or regulatory requirements. A report for the first six calendar months of the year is due by August 31 and a report for the last six calendar months of the year is due by February 28. [3004(a)(4)(F)]
24. The operator shall submit to the Executive Officer and to the Environmental Protection Agency (EPA), an annual compliance certification. For RECLAIM facilities, the certification is due when the Annual Permit Emissions Program (APEP) report is due and shall cover the same reporting period. For other facilities, the certification is due on March 1 for the previous calendar year. The certification need not include the period preceding the date the initial Title V permit was issued. Each compliance certification shall include:
- (A) Identification of each permit term or condition that is the basis of the certification;

FACILITY PERMIT TO OPERATE WALNUT CREEK ENERGY PARK

SECTION K: TITLE V Administration

- (D) The method(s) used to determine compliance over the reporting period and currently, and
- (E) Any other facts specifically required by the Executive Officer to determine compliance.

The EPA copy of the certification shall be sent to: Director of the Air Division Attn:
Air-3 USEPA, Region IX 75 Hawthorne St. San Francisco, CA 94105 [3004(a)(10)(E)]

25. All records, reports, and documents required to be submitted by a Title V operator to AQMD or EPA shall contain a certification of accuracy consistent with Rule 3003(c)(7) by a responsible official (as defined in Rule 3000). [3004(a)(12)]

PERIODIC MONITORING

26. All periodic monitoring required by this permit pursuant to Rule 3004(a)(4)(c) is based on the requirements and justifications in the AQMD document "Periodic Monitoring Guidelines for Title V Facilities" or in case-by-case determinations documented in the TitleV application file. [3004(a)(4)]

APPENDIX B: RULE EMISSION LIMITS [40CFR 72 - Acid Rain Provisions 11-24-1997]

1. A Title V permit revision is not required for emission increases that are authorized by allowances acquired under the Acid Rain Program, provided that the increases do not trigger a Title V permit revision under any other applicable requirement. [70.6 (a)(4)(ii)]

Monitoring Requirements

2. The owners and operators and, to the extent applicable, the designated representative of each affected source and each affected unit at the source shall comply with the monitoring requirements as provided in 40 CFR Parts 74, 75, and 76. [40 CFR 72.50, 72.31, 72.9(b)(1)]
3. The emissions measurements recorded and reported in accordance with 40 CFR Part 75 shall be used to determine compliance by the unit with the acid rain emissions limitations and emissions reduction requirements for sulfur dioxide (SO₂) under the Acid Rain Program. [40 CFR 72.9(b)(2), 40 CFR 75.2]
4. The requirements of 40 CFR Parts 74 and 75 shall not affect the responsibility of the operator to monitor emissions of other pollutants or other emissions characteristics at the unit under other applicable requirements and other provisions of this permit. [40 CFR 72.9(b)(3), 40 CFR 72.5]

Sulfur Dioxide Requirements

5. The owners and operators of each source and each affected unit at the source shall:
 - (A) Hold allowances, as of the allowance transfer deadline, in the unit's compliance subaccount (after deductions under 40 CFR Part 73, Section 73.34(C)) not less than the total annual emissions of SO₂ for the previous calendar year from the unit; and, [40 CFR 72.9(c)(i)],
 - (B) Comply with the applicable acid rain emissions limitations for SO₂. [40 CFR 72.9(c)(ii)]
6. Each ton of SO₂ emitted in excess of the acid rain emissions limitations for sulfur dioxide shall constitute a separate violation of the Act. [40 CFR 72.9(g)(7)]

FACILITY PERMIT TO OPERATE WALNUT CREEK ENERGY PARK

APPENDIX B: RULE EMISSION LIMITS [40CFR 72 - Acid Rain Provisions 11-24-1997]

7. SO₂ allowances shall be held in, deducted from, or transferred among allowance tracking system accounts in accordance with the Acid Rain Program. [40 CFR 72.9(g)(4)]
8. A SO₂ allowance shall not be deducted in order to comply with the requirements under paragraph 41(A) of the SO₂ requirements prior to the calendar year for which the allowance was allocated. [40 CFR 72.9(g)(5)]
9. An affected unit shall be subject to the SO₂ requirements under the Acid Rain Program as follows:[40 CFR 72.6(a)]
 - (A) Starting January 1, 2000, an affected unit under 40 CFR Part 72, Section 72.6(a)(2); or [40 CFR 72.6(a)(2)]
 - (B) Starting on the later of January 1, 2000 or the deadline for monitor certification under 40 CFR Part 75, an affected unit under 40 CFR Part 72, Section 72.6(a)(3). [40CFR 72.6(a)(3)]
10. An allowance allocated by the EPA administrator under the Acid Rain Program is a limited authorization to emit SO₂ in accordance with the Acid Rain Program. No provision of the Acid Rain Program, the acid rain permit application, the acid rain permit, or the written exemption under 40 CFR Part 72, Sections 72.7, 72.8, or 72.14, and no provision of law shall be construed to limit the authority of the United States to terminate or limit such authorization. [40 CFR 72.9 (c)(6)]
11. An allowance allocated by the EPA Administrator under the Acid Rain Program does not constitute a property right. [40 CFR 72.9(c)(7)]

Excess Emissions Requirements

12. The designated representative of an affected unit that has excess emissions in any calendar year shall submit a proposed offset plan, as required under 40 CFR Part 77. [40 CFR 72.9(e)]

(A) Pay without demand the penalty required, and pay upon demand the interest on that penalty, as required by 40 CFR Part 77; and [40 CFR 72.9(e)(2)(i)]

(B) Comply with the terms of an approved offset plan, as required by 40 CFR Part 77. [40 CFR 72.9(e)(2)(ii)]

Recordkeeping and Reporting Requirements

14.
