Re: Minor revisions to Acme Fiberglass, Inc. Title V Permits  
Application # 906, Plant #A0575

Dear Mr. Howekamp:

This is to advise you that the Bay Area Air Quality Management District has made minor modifications to the Major Facility Review Permit for Acme Fiberglass, Inc. – Plant #A0575.

This purpose of this modification is to allow the use of new chopper guns for the fiberglass operation and to change the name of the sources from “Chopper Gun” to “Polyester Resin Spray Operation,” which is the customary name for this type of source. The applicant has stated that the new guns will reduce the styrene emissions. There are also minor corrections to the permit and changes in SIP dates.

All changes are clearly shown in strikeout/underline format.

A copy of the modified Major Facility Review Permit is enclosed for your records. If you have any questions on this matter, please call Dharam Singh, Air Quality Engineer II, at (415) 749-4714.

Very truly yours,

Ellen Garvey  
Executive Officer/  
Air Pollution Control Officer
