**Re: Notice of Minor Title V Permit Modification
District Facility # N-1237
Project # N-1122461**

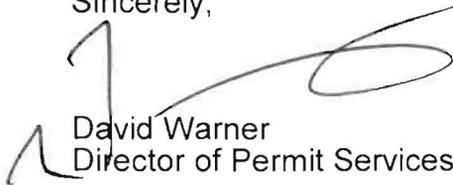

Dear Mr. Martin:

Enclosed is the District's analysis of your application for minor Title V permit modification for the facility identified above. You proposed a Title V minor permit modification to incorporate recently issued N-1237-603-0 into the Title V operating permit. The purpose of the project was to install an oak sawdust handling system consisting of one dry oak chip batching hopper equipped with a dust hood collection system served by a dust collector with integral fan and a grape must tub.

Enclosed is the engineering evaluation with the following attachments: proposed Title V permit, recently issued N-1237-603-0, emission increases, and application. This project will be subject to a 45-day EPA commenting period prior to the District taking final action.

Thank you for your cooperation in this matter. If you have any questions, please contact Mr. Jim Swaney at (559) 230-5900.

Sincerely,

David Warner
Director of Permit Services

Re: **Notice of Minor Title V Permit Modification**
District Facility # N-1237
Project # N-1122461

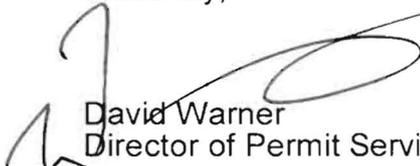

Dear Mr. Rios:

Enclosed for you to review is an application for minor Title V permit modification for the facility identified above. E&J Gallo-Livingston Winery is proposing a Title V minor permit modification to incorporate the recently issued N-1237-603-0 into the Title V operating permit. The purpose of the project was to install an oak sawdust handling system consisting of one dry oak chip batching hopper equipped with a dust hood collection system served by a dust collector with integral fan and a grape must tub.

Enclosed is the engineering evaluation with the following attachments: proposed Title V permit, recently issued N-1237-603-0, emission increases, and application. Please submit your written comments on this project within the 45-day comment period that begins on the date you receive this letter.

Thank you for your cooperation in this matter. If you have any questions, please contact Mr. Jim Swaney at (559) 230-5900.

Sincerely,

David Warner

TITLE V APPLICATION REVIEW

Minor Modification
Project #: N-1122481

Engineer: Sandra Lowe-Leseth
Date: January 3, 2013

Facility Number: N-1237
Facility Name: E&J Gallo Winery-Livingston
Mailing Address: 18000 West River Road
Livingston, CA 95334

Contact Name: John Chavez
Phone: 209-394-5872

Responsible Official: Dan Martin
Title: Plant Manager

I. PROPOSAL

E&J Gallo Winery-Livingston is proposing a Title V minor permit modification to incorporate the recently issued Authority to Construct (ATC) N-1237-603-0 into the Title V operating permit. The purpose of the project was to install an oak sawdust handling system consisting of one dry oak chip batching hopper equipped with a dust hood collection system served by a dust collector with integral fan and a grape must tub.

The purpose of this evaluation is to identify all applicable requirements, determine if the facility will comply with the applicable requirements and to provide the legal and factual basis for the proposed revisions.

II. FACILITY LOCATION

The site is located at 18000 West River Road, in Livingston, CA.

III. EQUIPMENT DESCRIPTION

N-1237-603-1 OAK SAWDUST HANDLING SYSTEM CONSISTING OF OAK BIN INVERTER HYDRAULIC SYSTEM, ONE 206 CUBIC FEET DRY OAK CHIP BATCHING HOPPER EQUIPPED WITH A DUST HOOD COLLECTION SYSTEM SERVED BY AN

AMERICAN AIR FILTER MODEL FABRIPULSE DESIGN M,
 SIZE 6-168-600 DUST COLLECTOR WITH INTEGRAL FAN,
 ENCLOSED FEEDER SCREW CONVEYOR, ENCLOSED
 TAKE-AWAY CONVEYOR, ENCLOSED INCLINE CONVEYOR,
 AND FULLY ENCLOSED GRAPE MUST TUB

IV. SCOPE OF EPA AND PUBLIC REVIEW

This change to a Title V permit is considered to be a minor modification and, as such, requires no public review.

V. APPLICABLE REQUIREMENTS

District Rule 2520, Federally Mandated Operating Permits (Adopted June 21, 2001)

VI. DESCRIPTION OF PROPOSED MODIFICATIONS

E&J Gallo Winery-Livingston is proposing to implement a new oak sawdust handling system. PM₁₀ is the pollutant of concern emitted from the material handling operation. The PM₁₀ emissions are controlled with a baghouse dust collector and cartridge filters.

Because this project establishes a new permit unit, there is no current Permit to Operate (PTO) for the unit. The following table compares the ATC conditions to the proposed PTO.

ATC Condition #	Condition	Proposed Condition #	Comments
1	The facility shall submit an application to modify the Title V permit in accordance with the timeframes and procedures of District Rule 2520.	---	ATC condition only - Operator has submitted an application to modify the facility's Title V operating permit. Application is included in Appendix D of this document
2	No air contaminant shall be released into the atmosphere which causes a public nuisance.	---	Condition removed because it is already contained in facility-wide permit N-1237-0-2 as Condition #41
3	This Authority to Construct (ATC) cancels and supersedes ATC N-1237-602-0.	---	ATC condition only - ATC N-1237-602-0 has been cancelled
4	The grape must tub shall not contain any VOC-containing material.	1	No change from ATC condition <i>This table continues on next page</i>

ATC Condition #	Condition	Proposed Condition #	Comments
5	Visible emissions from the baghouse serving the oak chip batching hopper shall not equal or exceed 5% opacity for a period or periods aggregating more than three minutes in any one hour.	2	No change from ATC condition
6	Material removed from the dust collector shall be disposed of in a manner preventing entrainment into the atmosphere.	3	No change from ATC condition
7	All equipment shall be maintained in good operating condition and shall be operated in a manner to minimize emissions of air contaminants into the atmosphere.	4	No change from ATC condition
8	Particulate matter emissions shall not exceed 0.1 grains/dscf in concentration.	5	No change from ATC condition
9	The baghouse shall be maintained and operated according to manufacturer's specifications.	6	No change from ATC condition
10	The cleaning frequency and duration for the baghouse shall be adjusted to optimize the control efficiency.	7	No change from ATC condition
11	Replacement bags numbering at least 10% of the total number of bags in each baghouse shall be maintained on the premises.	8	No change from ATC condition
12	The baghouse shall be equipped with a pressure differential gauge to indicate the pressure drop across the bags. The gauge shall be maintained in good working condition at all times and shall be located in an easily accessible location.	9	No change from ATC condition
13	The differential pressure gauge reading range for the baghouse shall be established per manufacturer's recommendation at time of start up inspection.	10	Operating range established - The baghouse shall operate at all times with a minimum differential pressure of 2.5 inches water column and a maximum differential pressure of 6 inches water column.
14	Controlled PM10 emissions from the dust collector shall not exceed 0.2 lb/ton oak sawdust material throughput.	11	No change from ATC condition

This table continues on next page

ATC Condition #	Condition	Proposed Condition #	Comments
15	Maximum amount of oak sawdust material throughput shall not exceed either of the following: 24,000 pounds per day or 1,152,000 pounds per year.	12	No change from ATC condition
16	Differential operating pressure for the baghouse shall be monitored and recorded on each day that the baghouse operates.	13	No change from ATC condition
17	Records of all maintenance of each baghouse, including all change outs of filter media, shall be maintained.	14	No change from ATC condition
18	Records of daily and annual amount of oak sawdust material throughput shall be maintained.	15	No change from ATC condition
19	All records shall be maintained and retained on-site for a period of at least 5 years and shall be made available for District inspection upon request.	16	No change from ATC condition

VII. COMPLIANCE

In accordance with Rule 2520, 3.20, these modifications:

1. Do not violate requirements of any applicable federally enforceable local or federal requirement;
2. Do not relax monitoring, reporting, or recordkeeping requirements in the permit and are not significant changes in existing monitoring permit terms or conditions;
3. Do not require or change a case-by-case determination of an emission limitation or other standard, or a source-specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;
4. Do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject. Such terms and conditions include;
 - a. A federally enforceable emission cap assumed to avoid classification as a modification under any provisions of Title I of the Federal Clean Air Act; and
 - b. An alternative emissions limit approved pursuant to regulations promulgated under section 112(i)(5) of the Federal Clean Air Act; and

5. Are not Title I modifications as defined in District Rule 2520 or modifications as defined in section 111 or 112 of the Federal Clean Air Act; and
6. Do not seek to consolidate overlapping applicable requirements.

In accordance with Rule 2520, the application meets the procedural requirements of section 11.4 by including;

1. A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
2. The source's suggested draft permit; and
3. Certification by a responsible official that the proposed modification meets the criteria for use of minor permit modification procedures and a request that such procedures be used.

LVW- ES 2012 New Oak Handling System, N-1237-603
Minor Modification Permit Application

Dear Mr. Roberts:

Attached please find the following documents comprising the minor modification permit application:

- Completed Authority to Construct Permit Application for the LVW-ES 2012 Oak Handling System, N-1237-603 (TV-8)
- Completed Compliance Certification

The minor modification permit application is submitted to the District prior to the pre-startup inspection.

Thank you for your time in regard to this matter. If you have questions or require additional information, please contact Mr. John Chavez at 209-394-5872.

Regards,
