Subject: Materials for Hydraulic Fracturing Research Advisory Panel

Mr. Hanlon,

I would like to submit the below linked report for consideration by the Hydraulic Fracturing Research Advisory Panel in their recommendations to the EPA hydraulic fracturing study team. I realize this is past deadline but would like to submit it nonetheless in the event that you will still accept materials.

<http://www.ucsusa.org/assets/documents/center-for-science-and-democracy/fracking-report-full.pdf>

The report was produced by the Union of Concerned Scientists and comprehensively covers the scientific, legal, and public concerns around hydraulic fracturing. The report has undergone an informal peer-review process and heavily cites peer-reviewed literature. We believe this may be of value to the advisory panel as it articulately outlines many of the concerns shared by the public, especially populations more directly impacted by oil and gas development. Please let me know if any further information on this would be helpful.

Regards,

Gretchen T. Goldman, Ph.D.
