Gobbler's Knob construction under way

Gobbler's Knob, the home of the annual Groundhog Day celebration featuring Punxsutawney Phil's weather predictions, is being updated.

Attendees at the next event on Feb. 2, 2013, will see a new entrance thanks to funds received from a \$4,500 matching grant from Pennsylvania Wilds. Additional funding for construction of a new

AARON SILVERS FLICKR.COM

entrance arch is being provided by the D.E. Limited Family Partnership, members of the Punxsutawney Groundhog Club Inner Circle and individual donations.

The arch is one of the planned additions on the grounds where several thousand people gather each year to see if the groundhog sees its shadow. The ceremony supposedly determines whether area residents are likely to see an early spring or if the winter weather will stick around for six more weeks.

New life jacket requirements in place

Beginning Nov. 1, 2012, and lasting through April 30, 2013, Pennsylvania boaters are required to wear a life jacket while on the water or at anchor on boats less than 16 feet in length, or any canoe or kayak. The new state regulation was passed in September by the Pennsylvania Fish and Boat Commission (PFBC).

According to a PFBC official, almost 80 percent of all boating fatalities happen

to boaters who are not wearing a life jacket, and a disproportionate number of those fatalities occur during the winter months when boaters are at risk due to water temperature. When a person is unexpectedly plunged into cold water (below 70 degrees Fahrenheit) the body's first response is usually an involuntary gasp. Without a life jacket, the victim may inhale while under water and drown without coming back to the surface. If the individual does make it to the surface, his or her ability is usually restricted because of shortness of breath or hyperventilation due to the water temperature.

To learn more about life jacket wear and cold water survival, visit the PFBC website at fishandboat.com or the Safe Boating Campaign website at safeboatingcampaign.com.

PA Great Outdoors Visitors Bureau has mobile app

The Pennsylvania Great Outdoors Visitors Bureau, which serves Cameron, Clarion, Elk, Forest and Jefferson counties, recently launched the first mobile app to promote tourism in the region. It is designed to help travelers navigate through the region while visiting businesses, lodging facilities, restaurants and attractions.

There is no charge to download the mobile app, which can be found at the App Store for iPhone, iPad and iPod touch. The Android app is available from the Google Play Store.

The app is location-based, and turn-by-turn directions are available so tourists can navigate to any location on the app. The navigation feature is satellite-driven so it can be used in areas without cell service.

East Coast earthquakes travel farther than previously thought

U.S. Geological Survey (USGS) scientists have found that East Coast earthquakes can travel much farther and do more damage over larger areas than previously thought.

Studies show that 2011's magnitude 5.8 earthquake in Virginia triggered landslides at distances four times farther — and over an area 20 times larger — than previous research had shown.

"Scientists are confirming with empirical data what more than 50 million people in the eastern U.S. experienced firsthand: this was one powerful earthquake," USGS Director Marcia McNutt reported in a USGS release. "Calibrating the distance over which landslides occur may also help us reach

TAKENote

Penn Lines reader input needed

Penn Lines is sending a four-page reader survey to a small sampling of randomly selected *Penn Lines* readers. In fact, you may have already received a copy of the survey.

The questionnaire takes just minutes to complete and all responses are kept in strict confidence.

The survey is one of the important ways in which *Penn Lines'* magazine and advertising staff gauges reader's likes and dislikes and assists them in determining editorial and advertising content for the publication.

If you should receive a survey in the mail, please complete and return it in the provided postage-paid reply envelope. As an added bonus, all those members who return a completed survey will be entered for a chance to win an iPad Mini with Wi-Fi 16GB (retail value \$329).

Thank you in advance for your participation.

back into the geologic record to look for evidence of past history of major earthquakes from the Virginia seismic zone."

The recently released study found that the farthest landslide from the 2011 earthquake was 150 miles from the earthquake's epicenter, which is the greatest landslide distance reported from any earthquake of similar magnitude (earlier studies put the farthest distance about 36 miles from the epicenter of a magnitude 5.8 earthquake).

The USGS reported approximately one-third of the U.S. population could have felt the 2011 earthquake, more than any other earthquake in U.S. history. Reports of shaking came from Canada to Florida and as far west as Texas.

According to the USGS, the difference between seismic shaking in the east versus the west is due in part to the geologic structure and rock properties that allow seismic waves to travel farther without weakening.

State launches free online tool for job seekers, students

Pennsylvania has unveiled "Pennsylvania Career Coach," a first-of-its-kind, statewide, free online tool designed to help Pennsylvania students and job seekers with career choices.

Developed by the Pennsylvania Department of Labor and Industry, Pennsylvania Career Coach will provide up-to-date local employment data such as current and projected job openings, recent job growth areas, estimated earnings and occupations that match with a user's current skills and knowledge, as well as specific educational programs in the local area that will prepare an individual for a given occupation.

"My No. 1 priority as governor is jobs; and today we take another step toward making sure Pennsylvanians are ready for the jobs that become available," Gov. Tom Corbett said during the recent launch of the program.

Pennsylvania Career Coach is part of a more comprehensive job-matching initiative that will be launched soon.

Deficiencies

Notice of Deficiency

For

Windfall Oil and Gas

Underground Injection Control (UIC) Permit Application PAS2D020BCLE

Please provide additional information on the deficiencies outlined below so that EPA Region III can take additional steps to process the UIC permit application.

Attachment A: Area of Review

Although you have selected the one-quarter mile fixed radius around the injection well as your area of review, EPA Region III traditionally calculates the zone of endangering influence to confirm that the one-quarter mile area of review is sufficient. To the extent possible, please provide the following information for the reservoir characteristics of the injection formation: permeability, porosity and current reservoir pressure. The application did indicate the permeability of the injection zone was .0061 millidarcies, but that seems extremely low. The Oriskany formation more typically exhibits a permeability range between 10 – 100 millidarcies.

Attachment B: Maps of Wells in Area of Review

Please provide information on the names and addresses of property owners that live within one-quarter mile of the proposed area of review. We need this information for purposes of public notification.

Attachment E: Name and Depth of USDWs

We need to confirm the depth to the lowermost USDW. The application referenced a drilling log for well 37-033-20597 which indicated fresh water at 750 feet below land surface (BLS). There was also a reference to fresh water at 900 feet MSL. This appears to equate to a depth of approximately 800 feet BLS at the well location. Would you please verify this information and provide the depth to the lowermost USDW in feet BLS.

Attachment G: Geologic Data

The application discusses the subsurface displacement of the Onondaga south of the facility. Gas storage in the area seems to indicate that faulting has acted as traps with definitive boundaries. Can you provide more information on the non-transmissive nature of the faulting and how the injection over time will be contained within the boundaries of the faulting. The presence of faults has become a big issue due to recent seismic events throughout the country.

We need as much information as possible to show that faulting in the area will not be influenced by injection.

Attachment K: Injection Procedures

Please submit an analysis of the total organic carbon (TOC) contained within the injection fluid.

Attachment L: Construction Procedures

The application indicates that 11 3/4 inch casing will be run to 375 feet and cemented back to the surface. This will protect the depth of the deepest ground water used in the area. A string of 8 5/8 inch casing is then proposed to be run to 1200 feet and cemented back to the surface. This casing will protect the lowermost USDW. If the lowermost USDW is at approximately 800 feet BLS, why set casing at 1200 feet BLS? Is there any possibility that a carbon bearing reservoir with high TDS exists between 800 feet and 1200 feet? We have some concern that, depending on how the well is drilled, fluids could migrate upwards from 1200 feet, into the lowermost USDW before it is cased off. Would it make sense to place the 8 5/8 inch casing at 850 feet?

Attachment O: Plans for Well Failures

Since a commercial facility is planned, we need more information on how security will be maintained at the facility. The application mentioned that a fence will surround the facility. Will it have a locking gate? What will be the hours of operation for the facility and will the facility be staffed during hours of operation? Will security cameras be installed? Will a manifest system for produced fluid delivery be required? These are all important issues that need to be addressed to prevent unauthorized access to the injection well.

Attachment P: Monitoring Program

Commercial injection wells require more frequent mechanical integrity testing; every two years, not every five.

Attachment Q: Plugging and Abandonment Plan

What kind of spacers will be provided between plugs, gel? Please provide a schematic diagram of the injection well after it has been plugged and abandoned.

Property One Mile

APPRAISAL ADDENDUM

ENVIRONMENTAL ISSUES - SPECIAL CLAUSES

ENVIRONMENTAL ISSUES & DISCLAIMER

The value estimate is based on the assumption that the property is not negatively affected by the existence of hazardous substances or detrimental environmental conditions unless otherwise stated in this report. The appraiser is not an expert in the identification of hazardous substances or detrimental environmental conditions. The appraiser's routine inspection of and inquiries about the subject property did not develop any information that indicated any apparent significant hazardous substances or detrimental environmental conditions which would affect the property negatively unless otherwise stated in this report. It is possible that tests and inspections made by a qualified hazardous substance and environmental expert would reveal the existence of hazardous substances or detrimental environmental conditions on or around the property that would negatively affect its value.

SPECIAL CLAUSES:

- 1) **SUBSIDENCE** in the area is unknown or uncommon, but the Appraiser does not warrant against the condition or occurrence.
 - 2) **RADON**: The Appraiser has no information pertaining to the presence/absence of radon gas or hazardous waste on/near the site.
 - 3) **ASBESTOS**: Unless otherwise stated, the appraiser did not detect asbestos or other hazardous material in the property, but he does not warrant against this and assumes no responsibility.
-

 The Oklahoma Department of Transportation (ODOT) is a state agency responsible for the planning, construction, and maintenance of the state's highway system. It is a part of the Oklahoma Department of Transportation.

PA2D010BVEN	Stonehaven Energy	Venango	Unknown	Latshaw #9

Notes:

Exco Resources (Irvin A-19) fined \$159, 624 (Docket: SDWA-03-2012-0061) on February 16, 2012

Range Resources injection well (Cross #2) plugged and abandoned May 23, 2012

Stonehaven Energy Management LLC well (Latshaw #9) permitted as non-commercial (private) on __/__/2012. Well Depth: Unknown (well is one of many existing wells in an existing oil field). Target formation: Speechly (1935' to 1992') Permitted: 4500 bbls a month.

The Bear Lake Properties injection wells in Warren County are the **only** wells permitted (UIC Class IID) as "commercial" use facilities in Pennsylvania (meaning the permittee can solicit and dispose of waste from third parties anywhere in the US).

Key:

Permitted by EPA as a non-commercial (private) facility

Fined by EPA for violations of the SDWA

Permitted by EPA as a commercial (non-private) facility

Plugged and abandoned

Brine Disposal in Pennsylvania

Cottonwood	Somerset	Oriskany	3250	27,000
EXCO-North Coast	Clearfield	Oriskany	1450	4200
Dominion	Somerset	Huntersville/Oriskany	3218	30,000
*Only commercial facility				
# Recently Plugged				

This is from the EPA:

There are 2 permitted injection wells in Clearfield County.

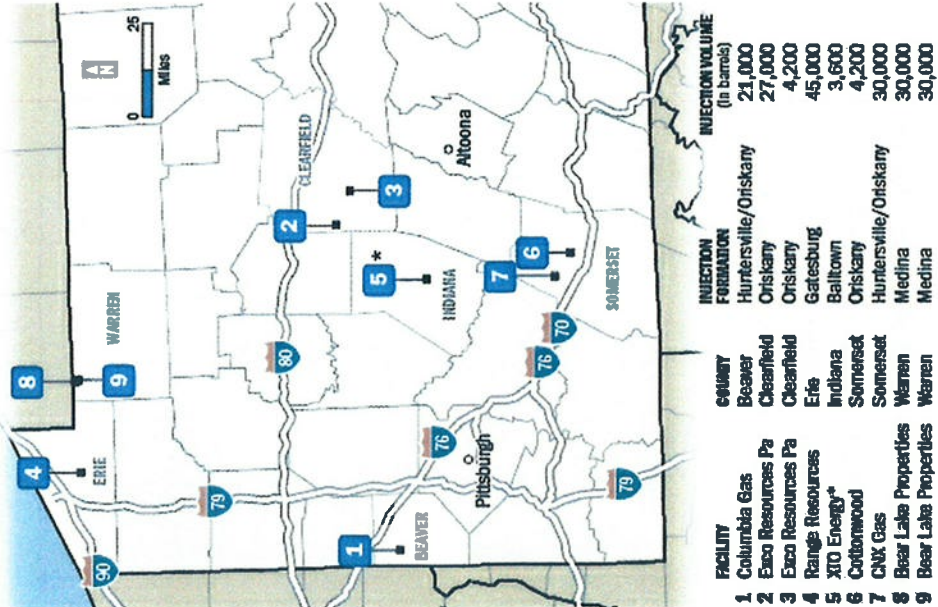

There is one in Ferguson Twp named the "Spencer Injection Well" that has been permitted and in use since 1988. The EPA tests it every 2 years and this site has had no problems reported. It is on a 65 acre site addressed as 1156 Cemetery Rd and the surface acreage is owned by Richard Humphreys.

The second is the "Irvin A-19 Injection Well" located in Bell Twp on a 118 acre site off Frantz Hollow Road and the surface is owned by New Forestry LLC. It was permitted by the EPA in 2005 but is offline currently. Per the EPA since it has been offline for several years it isn't under scheduled inspection now until it comes back online.

Northwest Clearfield County Region

Northwest Clearfield County Region Comprehensive Plan

Brady Township, City of DuBois, Falls Creek Borough,
Huston Township, and Sandy Township

Land Use Policies

- The protection of existing, viable, residential neighborhoods as well as new developments is the area's primary land use goal.
- Commercial and industrial development will be focused along, or near, major transportation corridors (rail or road).
- **Village:** This is a mixed-used designation centered on the Luthersburg and Salem areas.

Future Land Use Designations

• **Village:** Smaller, rural, densely developed areas where mixed use (i.e., residential, light retail, small office and possible light industrial) is present or planned. Though the Village designation assumes mixed use, future development should focus commercial and industrial uses along primary transportation corridor, reserving less traveled regions for residential uses. Generally, the Village designation assumes current or future sewer and water services. Residential density at 4 to 7 dwelling units per acre.

Future Land Use

The plan for land use has, as its core, the following principal concepts:

- Protection of existing and future residential areas
- The preservation of Rural Resource Areas
- The preservation of land essential for current and future economic development

Individual Water System Needs

In the "Regional" approach, an overview of needs is presented along with cooperative solutions. In this section, detailed needs are presented.

Brady Township

Currently, this system is in generally good condition, though there are some areas of concern. The recommended short-term projects are set forth below:

- Water Tanks: In the next five years, replace two and refurbish one tank.
- Rehabilitate or develop new wells to resolve mineral content problems of the water.
- If the water quality issue cannot be solved soon, there is the problem of excessive backwash sludge. Current facilities are inadequate to handle the volumes being produced.

Beyond these major items, the only need for this system is scheduled line replacement and maintenance. If not completely now available, the system should be documented "on plan" with a listing and description of its mechanical/treatment facilities. A CAD or GIS electronic file is also needed. **No significant expansion of the service area is recommended.**
