Subject: January 22, 2015 EPA hearing for the Florence Copper Project.

As we learned in the case of the ADEQ-issued Aquifer Protection Permit, there were failures on the part of ADEQ to consider significant information before issuing the permit, which resulted in a successful appeal. I believe it is possible that similarities may exist in the EPA's process.

An extension to the public comment period will allow time for the professionals involved in reviewing the basis for issuance of the draft permit time to formulate questions and comment on the information provided to the EPA by Florence Copper.

Please extend the public comment period until April 30, 2015.

Thank you,

Regards,

John L. Anderson
