MEMO TO THE FILE

From: Jeffrey R. McDonald
Date: August 28, 2014
Subject: Phone conversations with Tyler Gilmore of the PNNL and Doug Shutt of the IDNR about alleged water well contamination

I called Doug and Tyler during the week of July 7th about some landowners who claimed that when the FutureGen stratigraphic test well was drilled, their water well experienced some temporary problems. I asked both the State and FutureGen if they were aware of any local water well issues when the stratigraphic well was constructed. Neither of them were aware of any issues.
